

# Infographic Rough

Name \_\_\_\_\_ P \_\_\_\_\_

VERTICAL

## Instructions:

Create an infographic that includes data, statistics, text and graphics in an attractive and professional visual design. All images should relate to the topic and represent your data set. Think about what you are trying to say, how you want to say it, and who you are saying it to. Your infographic should be more than a single graph; it should be an accumulation of bar graphs, pie graphs, maps, tables, graphic images, and text to accurately depict the data. (Refer to the infographic presentation).

You will pick a topic of choice for your infographic. Make sure it is not too general. Some topic examples are social media, youth sports, comic books, gaming, you tube, music, food, movies, pets, cars, anything goes as long as it is school appropriate. Pick something that is of interest to you; do research to find data and statistics that represent your topic.

PLEASE don't plagiarize! Use ideas, colors, and styles from others...but do not copy an entire infographic from the internet that has already been created by another artist.

*See assignment sheet for additional directions.*
