Computer Log-in & Connecting to Wireless Internet

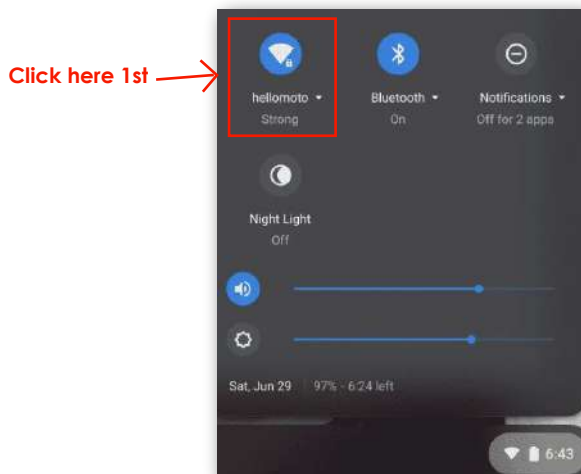

STEP 1 - Open Chromebook, hit power button (if it is off)

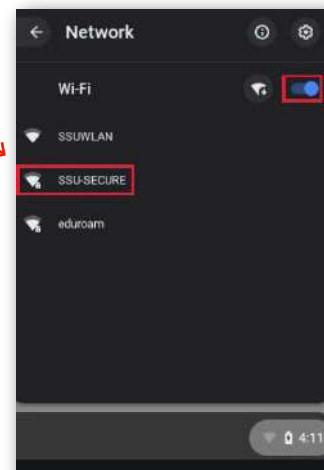

STEP 2 - Once on and open you will see a sign into your Chromebook window, ignore that for now, move mouse to lower right corner and click on wireless internet network icon.

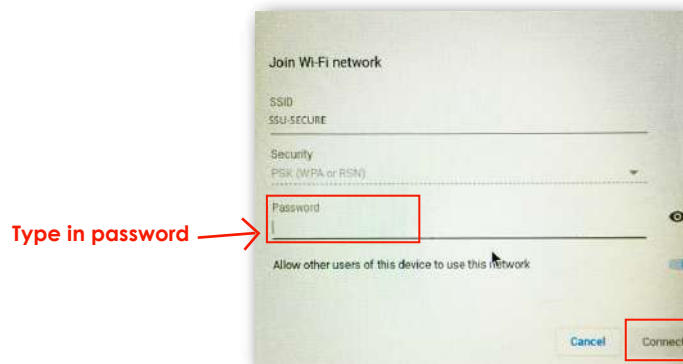

STEP 3 - Connect to your home wireless internet by clicking on your wireless internet name (this is known as the network/Wi-Fi name). **NOTE:** If after opening the chromebook, you see a wireless network list pop-up, you will click on your wireless internet name to connect to your wireless internet.

This will appear
then click on
your internet name.

STEP 4 - A "Join Wi-Fi Network" Pop-up box will appear, type in your home wireless password (Wi-Fi password), then click Connect.
