What is an archetype?

In your notebook, review the names of these images. Next, try to create a definition of an archetype.

What is an archetype? Create a list of criteria (characteristics) of an archetype. Start by answering these questions:

Where do they exist? When do they exist?
How do they exist? In what do they exist?

The origin of ARCHETYPES

- **Carl Jung**, (1875 – 1961) was a Swiss psychiatrist, an influential thinker and the founder of Analytical Psychology.
- Though not the first to analyze dreams, he is one of the best known researchers in the field of dream analysis and symbolization.

The Theory:

- *Both the reader and writer share memories derived from this collective unconscious.
- *When we encounter these memories or images in stories, they create very strong emotional reactions, as we can relate to them unconsciously.
