REGRESO A LA ESCUELA: Guía para después de una evaluación positiva de síntomas de COVID-19

Quienes presenten síntomas deben aislarse desde que estos comiencen y ser evaluados tan pronto como sea posible (incluso con pruebas de detección). Si los síntomas aparecen en la escuela y se dispone de pruebas de detección en el lugar de atención médica, estas se pueden hacer después de una evaluación inicial con la herramienta «Cuando se presentan síntomas en la escuela».

Cualquier persona que dé positivo en cualquier tipo de prueba de diagnóstico viral (no en las pruebas de detección de anticuerpos) debe ser tratada como un caso positivo y debe aislarse. Ningún resultado adicional en las pruebas de detección puede poner fin anticipadamente al periodo de aislamiento de un individuo sintomático positivo.

Las personas que presentan síntomas dentro de un plazo de 90 días posteriores a una prueba de diagnóstico viral positiva (no a una prueba de detección de anticuerpos) y las que estén completamente vacunadas (2 semanas después de la última dosis) deben aislarse, ser investigadas en consulta con los organismos de salud pública y/o un proveedor de atención médica para detectar una posible infección y pueden requerir que se les hagan pruebas antes de regresar a la escuela.

PARA EL USO DEL PERSONAL Y LOS ESTUDIANTES DE TODAS LAS ESCUELAS Y GUARDERÍAS

Recordatorio:

- Los síntomas habituales y sin cambios de una enfermedad crónica conocida no deben provocar la exclusión.

Síntomas principales

- Fiebre, escalofríos, temperatura de 100.4 °F (38 °C)
- Tos reciente o que empeora
- Falta de aire o dificultad para respirar
- Pérdida del gusto o del olfato

Síntomas menores

- Dolor de garganta
- Congestión o goteo nasal
- Dolores musculares o corporales
- Dolor de cabeza
- Fatiga
- Náuseas o vómito

RETURN TO LEARN: Guidance Following a Positive COVID-19 Symptom Screen

Any symptomatic individuals should isolate from symptom onset and pursue evaluation, including testing as soon as possible. If symptoms develop at school and point of care testing is available, testing may be performed following an initial assessment using the Addressing Symptoms at School tool.

Anyone who tests positive using any viral diagnostic test type (not antibody tests) should be treated as a case and should isolate. No additional test results can end a symptomatic positive individual's isolation period early.

Symptomatic individuals within 90 days of a previous positive viral diagnostic test (not antibody test) and those who are fully vaccinated (2 weeks after final dose) should isolate, be investigated for potential infection in consultation with public health and/or a healthcare provider, and may require testing prior to return to school.

FOR USE IN ALL SCHOOLS AND
CHILD CARE SETTINGS FOR STAFF
AND STUDENTS

Reminder:

- Unchanged, usual symptoms of a known chronic condition should not prompt exclusion

Major Symptoms

- Feeling feverish, having chills, temperature of 100.4° F or greater
- New or worsening cough
- Shortness of breath or difficulty breathing
- Loss of taste or smell

Minor Symptoms

- Sore throat
- Runny nose or congestion

Herramienta de detección de síntomas del COVID-19 en casa para padres y miembros del personal escolar

Los padres y tutores pueden usar estas listas de verificación para detectar síntomas y determinar cuándo sus hijos deben quedarse en casa. Asimismo, los miembros del personal de la escuela pueden utilizar esta herramienta para determinar si deben quedarse en casa. **Cualquier estudiante o miembro del personal diagnosticado con el COVID-19 o que haya tenido un contacto cercano con un caso de COVID-19 no deberá ir a la escuela y debe [aislarse o hacer cuarentena](#), de acuerdo con las recomendaciones de los organismos de salud pública.**

Las siguientes listas se refieren solamente a los síntomas nuevos o a un cambio de los síntomas normales. Un estudiante o miembro del personal no deberá quedarse en casa a causa de síntomas que normalmente experimentan debido a una condición crónica, a menos que se sientan peor de lo normal. Dichas directrices se proporcionan como suplemento a las normas regulares de la escuela (ej. un niño con vómitos no deberá asistir a la escuela, de acuerdo con las normas regulares de la escuela). Por favor refiérase a la directriz de [Regreso a la Escuela](#) (en inglés) cuando sea apropiado regresar a las clases.

Si su hijo o usted presentan síntomas que podrían poner su vida en peligro, por favor, llame al 911.

Prueba de síntomas:

Si presenta cualquiera de los siguientes síntomas, el niño deberá quedarse en casa y no ir a la escuela; además, debe informar los síntomas a la escuela y comunicarse con un proveedor de atención médica en relación con una prueba de detección del COVID-19 y los próximos pasos a seguir para el tratamiento.

- Tiene fiebre, escalofríos o una temperatura de 100.4°F o superior.
- Tos persistente reciente o inexplicada.
- Falta de aire.
- Dificultad para respirar.
- Pérdida del gusto u olfato.
- Fatiga.
- Dolores musculares.
- Dolor de cabeza.
- Dolor de garganta.
- Náusea o vómito
- Diarrea.
- Goteo nasal o congestión.

At Home COVID-19 Symptom Screening Tool For Parents and Staff

Parents and guardians can use these symptom checklists to determine when to keep their child at home. School staff can also use this tool to determine if they need to stay at home. **Any student or staff diagnosed with COVID-19 or who is a close contact of a COVID-19 case should not go to school and should [isolate or quarantine](#) according to public health recommendations regardless of current symptoms.**

This symptom screen refers only to new symptoms or a change in usual symptoms. A student/staff should not be kept home for usual symptoms they experience due to a chronic condition unless they are worse than usual. These guidelines are in addition to your regular school guidance (for example, a child with vomiting should also not attend school based on usual school guidance). Please refer to the [Return to Learn](#) guidance to determine when it is appropriate to return to school.

If your child is/you are experiencing any potentially life-threatening symptoms please call 911.

Symptom Screen:

If any of the following symptoms are present, keep the child at home/stay at home, inform the school of symptoms, and reach out to a health care provider about COVID-19 testing and next steps for treatment.

- Feeling feverish, having chills, or temperature 100.4°F or higher.
- New or unexplained persistent cough.
- Shortness of breath.
- Difficulty breathing.
- Loss of taste or smell.
- Fatigue.
- Muscle aches.
- Headache.
- Sore throat.
- Nausea or vomiting.
- Diarrhea.
- Runny nose or congestion.
