

PARAMOUNT UNIFIED SCHOOL DISTRICT

GREAT THINGS ARE HAPPENING IN PARAMOUNT SCHOOLS

Mathematics Initiatives

Ruth Pérez, Ed.D.
Superintendent

Deborah Stark, Ed.D.
Assistant Superintendent, K-8 Educational Services

Ryan Smith, Ed.D.
Assistant Superintendent, Secondary Educational Services

Kelly Morales
Facilitator, Curriculum and Professional Development

Gregoire Francois, Ed.D.
Director, Secondary Education

Leonardo Gonzalez
Curriculum Specialist, 9-12 Mathematics

Purpose of Presentation

Provide an update on how math instruction has changed to focus on mathematical thinking and understanding in grades K-8.

How is math instruction different in a K-8 classroom?

Math Standards

Content Standards

Grade-level
K-8 standards

$$3 \cdot x = 12$$

Practice Standards

Address habits of mind
that foster
mathematical thinking

Curriculum and Instruction that Support New Ways of Teaching

Grades K-8

- Instruction, curriculum guides and assessments that promote inquiry and problem solving.
- Integration of technology.
- ST Math—on line program that develops conceptual understanding of math concepts.
- “A Thinking Classroom” pilot at Jackson (6th grade)

Professional Development that Supports New Ways of Teaching

Grades K-8

- Professional development on Cognitively Guided Instruction (CGI) for grades K-5 and Math Institutes (6-8).
- Teacher Lab: K-5 teacher teams bring evidence of CGI implementation to analyze students' understanding.
- Foundation of Fractions, and online course, completed by 25 teachers over summer.
- Math lesson study facilitated at each middle school.

PARAMOUNT UNIFIED SCHOOL DISTRICT

PREPARING STUDENTS FOR COLLEGE AND CAREERS

Purpose of Presentation

Provide an update on how math instruction the various math initiatives taking place in Paramount's high schools.

Our Work With Teachers Development Group

- High School Math Teams:
 - PHS West – Algebra 1 and Geometry
 - PHS Senior – Geometry, Algebra 2, and Pre-Calculus
 - Odyssey – Integrated Math Program
 - CDS/Buena Vista
- Best Practices in Teaching Mathematics Workshop
- Support for Mathematics Coaches
- 3 “Studio” Cycles for each team

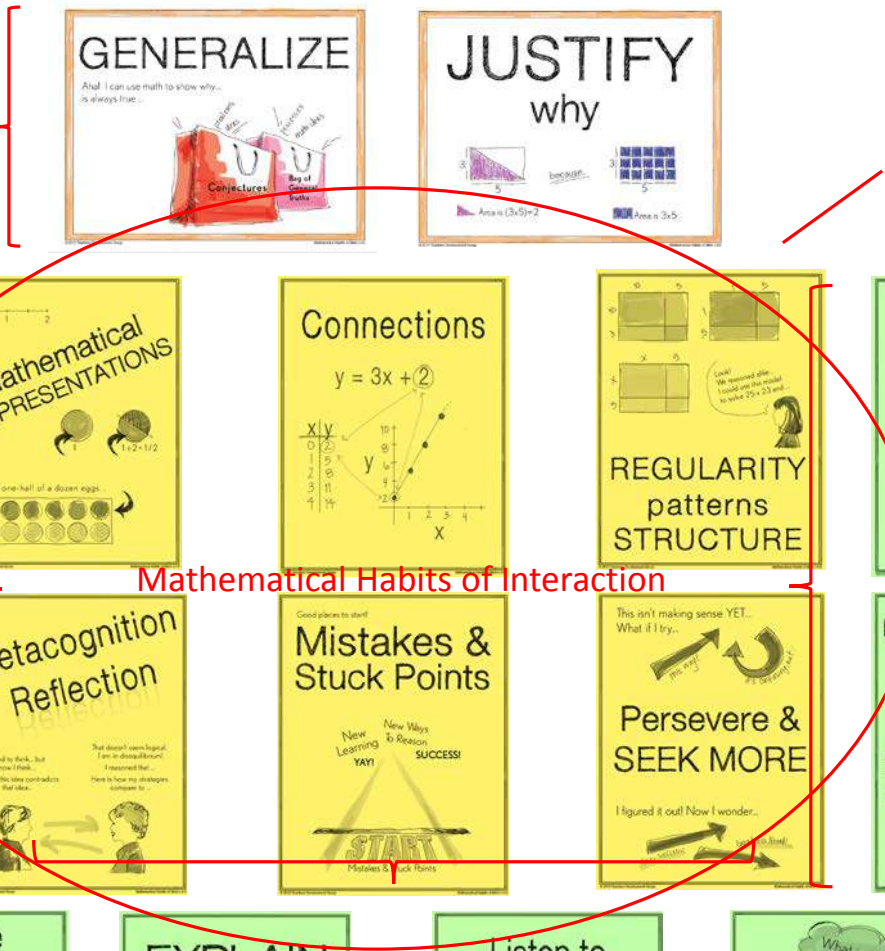

PARAMOUNT UNIFIED SCHOOL DISTRICT

PREPARING STUDENTS FOR COLLEGE AND CAREERS

What we want students to do with their mathematical knowledge

Mathematical Habits of Mind

GENERALIZE

Alah! I can use math to show why... is always true...

Conjectures

Reasoning

Proving

Patterns

JUSTIFY

why

Area is $(3 \times 5) \div 2$

Area is 3×5

EXPLORE Multiple Pathways

Jose's Way

My Way

Marika's Way

Kendall's Path

Rob's Route

Mathematical REPRESENTATIONS

Head one-half of a dozen eggs

$1 + 2 + 1/2$

Connections

$y = 3x + 2$

$x \ y$

0 2

1 5

2 8

3 11

4 14

REGULARITY patterns STRUCTURE

Look! We measured after I looked over the results to solve 25×23 well...

CRITIQUE & DEBATE

Relating to the distributive property helped.

I disagree because it contradicts what we learned about...

COMPARE our LOGIC & IDEAS

Jose's Way

Everyone's Path

My Way

Your Way

You reasoned from triangles & I used rectangles... here's why both make sense!

Metacognition Reflection

I need to think, but now I think...

That doesn't seem logical... I am so disappointed!

I reasoned that...

How to solve my strategies... explain it!

Mistakes & Stuck Points

Good places to start!

New Learning YAY!

New Ways to Reason SUCCESS!

START

Mistakes & Stuck Points

Persevere & SEEK MORE

This isn't making sense YET... What if I try...

I figured it out! Now I wonder...

MATH REASONING is the Authority

Based on these properties... that idea makes sense.

MATH REASONING

The length must be 7 because of the meaning of congruent.

Private Reasoning Time

Before I hear from you, I need to think.

Hmm... What are my ideas?

EXPLAIN

My Reasoning...

$3 + 2 = 7$

$3 + 2 = 5$

Listen to Understand

REVOICE Here is what I heard.

INTERPRET Is this what you mean...?

Genuine Questions

What is your idea?

What do you think?

Teaching Routines

Generates student engagement in mathematically productive thinking and discourse by purposefully:

Structuring worthwhile student talk	Conferring to understand students' thinking and reasoning
Working with selected and sequenced student math ideas	Eliciting reasoning about visual representations and connections to other math representations
Working with public records of students' mathematical thinking	Working with students' math struggles, errors, and disequilibrium

The Studio Cycle

- Leadership coaching
- TDG coach and studio teacher plan lesson

- Preview lesson
- Observe lesson
- Debrief lesson

- Math Curriculum Specialist and Coaches visit other studio participants
- Plan lesson
- Observe lesson
- Debrief lesson

Carnegie Learning

- **Objective**: Support students who have struggled in mathematics through a course that uses blended learning.
- ***Blended Learning*** approach to teaching mathematics
 - Combines traditional instruction and technology
 - Personalized for each student
- Carnegie's approach to instruction:
 - Teacher facilitated problem solving
 - Mathia software
- Coaching support from Carnegie consultant
- Courses Offered:
 - PHS West: Algebra 1
 - PHS Senior: Geometry

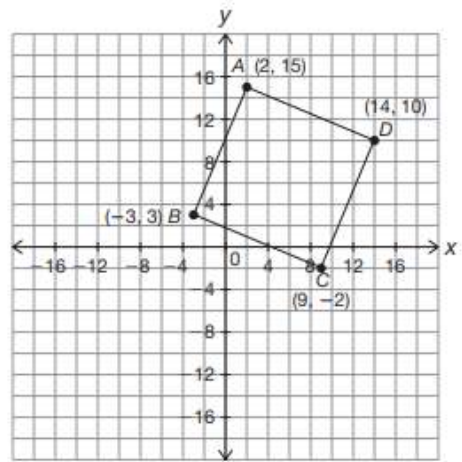

Problem-Solving Approach

PROBLEM 1 Pomp and Circumstance

Marissa is throwing a party for her graduation and wants to invite all of her friends and their families. Consider the space defined by quadrilateral $ABCD$. Each of the four corners of the space is labeled with coordinates, measured in feet, and defines the dimensions of the room that Marissa's little brother says the party should be held.

1. Marissa's mom says that the room is obviously a square or a rectangle, so if you can figure out the length of one or two of the sides, then you can easily determine the area. Marissa tells her mother that you can't just assume that a shape is a square or a rectangle because it looks like one. Who is correct and why?

Algebra with Coding

- Objectives:
 - Address the growing demand in the workplace for coding
 - Develop the connection between mathematics and coding
 - Ensure equity
 - Use coding to enhance Algebra instruction
 - Increase student engagement in mathematics
- Unique partnership with TechSmart
- Teacher Support:
 - “Coding Bootcamp”
 - Coaching Days
 - Phone, online, and chat support
- Year 1: Teaching coding along side Algebra
- Year 2: Coding fully integrated within Algebra

Fastest Growing Occupations

Fastest growing occupations: 20 occupations with the highest percent change of employment between 2018-28.

Click on an occupation name to see the full occupational profile.

OCCUPATION	GROWTH RATE, 2018-28	2018 MEDIAN PAY
Solar photovoltaic installers	63%	\$42,680 per year
Wind turbine service technicians	57%	\$54,370 per year
Home health aides	37%	\$24,200 per year
Personal care aides	36%	\$24,020 per year
Occupational therapy assistants	33%	\$60,220 per year
Information security analysts	32%	\$98,350 per year
Physician assistants	31%	\$108,610 per year
Statisticians	31%	\$87,780 per year
Nurse practitioners	28%	\$107,030 per year
Speech-language pathologists	27%	\$77,510 per year
Physical therapist assistants	27%	\$58,040 per year
Genetic counselors	27%	\$80,370 per year
Mathematicians	26%	\$101,900 per year
Operations research analysts	26%	\$83,390 per year
Software developers, applications	26%	\$103,620 per year
Forest fire inspectors and prevention specialists	24%	\$39,600 per year
Health specialties teachers, postsecondary	23%	\$97,370 per year
Phlebotomists	23%	\$34,480 per year
Physical therapist aides	23%	\$26,240 per year
Medical assistants	23%	\$33,610 per year

Algebra 1 –Coding Integration

2.4 Code Building: Balance of Power

2.4 Solving with Variables on Both Sides

Description
This ancient tomb guards a mystical secret, and to find it you'll have to solve an equation with variables on both sides. Keep the scales balanced to avoid setting off the trap!

Code Building
Before coding this program, students should have completed the Math App of the same name.

Learning Target
Students will be able to solve equations with variables on both sides (in one variable).

Common Core Standards

- A-REI.A.1: Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution.
- A-CED.A.1: Create equations and inequalities in one variable including ones with absolute value, and use them to solve

Teacher's Guide

2.4 Solving with Variables on Both Sides

OBJECTIVES TOPICS ALERTS

Learning Targets

- I understand what coding is and how we can use it.
- I can get input and output in a Python program.
- I can confidently seek out my errors.
- I can combine values to calculate new ones

Learning Objectives

Comprehension

- Describe how a computer executes code
- Identify input and output in a program
- Identify variables and their values
- Understand that an expression produces a value

Application

- Use basic text-based input and output commands
- Store values in variables

PARAMOUNT UNIFIED SCHOOL DISTRICT

PREPARING STUDENTS FOR COLLEGE AND CAREERS

$$2x + 5 + 1x = 2 + 2x + 7$$

$$3x + 5 = 2x + 9$$

$$1x + 5 = 9$$

$$x = 4$$
