GROWTH MINDSET

The purpose of the MEtoBE report is to help students continue to grow academically and social-emotionally. Because one measure does not tell the whole story, Madera Unified has packaged multiple data points into one booklet to help students, teachers, and parents better understand a student's academic standing.

What is the MEtoBE Report?

OVERVIEW

The overview section features a brief visual summary of the report's contents so that the reader can analyze a student's performance at a glance. There are three key elements in this section: the Multiple Measures Map, the Overall Readiness Meter, and the College Tracker.

ACADEMICS

academics section The includes state and local assessment results, grades, and reading and language assessment results.

The MEtoBE report is an individualized booklet containing multiple data points that make up a student's grade level readiness score. The report contains four sections.

ENGAGEMENT

engagement section includes student information on attendance and discipline. For students to perform well in class and on exams, they must be present to learn and

EXPECTATIONS

expectations section includes three helpful tools for parents. The sample ELA and Math test questions provided by Smarter Balanced Consortium, questions provided by the California Department of Education to empower parents to ask questions during parentteacher conferences, and list of resources Madera Unified offers to help students and parents.

"Madera Unified will set the standard for hard work, creativity and resiliency with a fearless drive to continuously improve."

OVERVIEW

Grade Level Readiness was developed at MUSD from a desire to create a continuous improvement system that articulates a clear set of expectations that exists at a local, state and federal level. Board Policy allows for the Board to establish appropriate processes and measures to monitor results and evaluate progress toward the district's vision and goals. One of the Board's goals is to create clarity and consistency. With Grade Level Readiness we are able to empower students, parents and educators with individualized information to ensure every child is making progress toward graduating with the greatest number of post-secondary choices from the widest array of options.

of the total points earned.

STATEEL

Postsecondary Tracker

Your child's current academic standing puts him or her in a position to submit a competitive application to highly selective universities such as UC Merced, UCLA, and UC Berkeley, to name a few. Hard work and dedication are necessary to obtain the most extensive array of college and career opportunities.

OVERVIEW SECTION

The first section of the report is the overview page. It features a brief visual summary of the report's contents so that the reader can analyze a student's performance at a glance. There are three key elements in this section: the Multiple Measures Map, the Overall Readiness Meter, and the Postsecondary Tracker.

State Assessment

The Smarter Balanced Assessment (SBA) measures student achievement in English Language Arts and in Math.

How to Read the Charts

A white line across each column represents the student's score for both the previous testing year as well as the most recent year (highlighted in orange). For example, a white line cutting across the upper, dark green section of a column indicates that a student has "exceeded" the standard expectations for their grade level. A white line cutting across the light gray section of a column shows that a student "nearly met" the standard. The values within the parentheses below each column display the distance from standard. The distance from standard is a calculation that measures how far above or below a student is from meeting the minimum score needed to achieve "met" standard. Other academic assessments in the MEtoBE report such as the NWEA and reading assessment utilize this distance from standard calculation. The tables to the right of the colored columns provide readers with a closer look into performance on the different domains within the test.

ACADEMICS SECTION

This section includes state and local assessment results, grades, and reading and language assessment results.

> Local Assessment

The NWEA MAP Growth measures student achievement in reading and in Math. A RIT score reflects a student's content knowledge, skills and abilities.

The final chart in the academic section holds the results for the language assessment. This language assessment is called the English Language Proficiency Assessment for California (ELPAC) and is administered annually to English learners.

ACADEMICS

Language Assessment

ABOUT THIS MEASURE

The English Language Proficiency Assessments for California (ELPAC) is the test that is used to measure how well students in kindergarten through twelfth grade understand English when it is not their primary language. The ELPAC is taking the place of the California English Language Development Test (CELDT). Information from the ELPAC helps your child's teacher provide support in the right areas.

Oral Language Score

Overall	Well Developed	Well Developed
istening	3 out of 3	3 out of 3
Speaking	3 out of 3	3 out of 3
	2017-18	2018-19

Written Language Score

Overall	Moderately Developed	Moderately Developed
Reading	2 out of 3	3 out of 3
Writing	2 out of 3	2 out of 3
	2017-18	2018-19

This section provides a brief overview of your child's progress toward becoming reclassified as Fluent English Proficient. The district evaluates multiple areas of English language development during the determination of whether a student is eligible for reclassification. Please review your child's progress below.

ENGLISH LEARNER ONLY PAGE

The final chart in the academic section holds the results for the language assessment. This language assessment is called the English Language Proficiency Assessment for California (ELPAC) and is administered annually to English learners. Similar to the Smarter Balanced results, a white line across each column represents the student's level for both the previous testing year as well as the most recent year (highlighted in orange). A white line cutting across the upper, dark green section of a column indicates that a student is scoring in the "well developed" range of the test. A white line cutting across the light gray section of a column shows that a student is scoring in the "somewhat developed" range of the test. The tables beneath the colored columns provide readers with a deep-dive into the specific performance of each skill area within the test.

This section includes student information on attendance and discipline. For students to perform well in class and on exams, they must be present to learn and free from distractions.

Attendance

Regular school attendance is one of the r powerful ways parents can help prepare child for success. A high number of abser can put a student at risk academically. Fo these reasons, we have included attenda as a measure of educational success. The attendance rate is calculated by taking th number of days present and dividing it by the number of days the student was enro

Discipline

Discipline makes up the other half of the engagement section. Because repeated disciplinary issues can cause significant distractions from learning, we consider performance in this area as a valuable measure for educational success. The disciplinary score is calculated by taking number of referral free days enrolled and dividing it by the total number of days the student was enrolled.

This section includes three helpful resources for parents.

Sample Test Questions

The sample ELA and Math questions are provided by the Smarter Balanced Consortium and students will likely encounter similar types of questions when they take the test towards the end of the year. Parents may be surprised by the types of questions their child is expected to answer on the California state test.

Questions to Ask During Parent Conference

The questions have been provided by the California Department of Education to empower parents to ask questions pertaining to their child's education. When parents and teachers work together as a team, children do better in school. The parent-teacher conference is an ideal time to get the partnership started. Parent conferences should be a two-way conversation.

List of District Supports and Resources

Madera Unified offers the following resources as well as several Parent Resource Center locations to help students and parents.

EXPECTATIONS SECTION

Madera Unified School District

Madera Unified created the MEtoBE report with the district's three goals in mind. These three goals are:

- 1) to create clarity and consistency in everything we do
- 2) changing people's perceptions and mindsets

With these bedrock goals, we believe we can "set the standard for hard work, creativity, and resiliency with a fearless drive to continuously improve."

3) continuously striving for excellence in everything that we do.
