

THE SOUND OF MUSIC

Research indicates that children who are exposed to music at a young age learn math and science concepts more easily. Music, the thinking goes, also helps develop listening skills, teaches concentration, and has a calming effect on babies (not to mention parents). Plus, music gets toes tapping, hands clapping and bodies moving...a perfect way for grown-ups and children to relax, wiggle and giggle together! The following CDs and digital downloads are recommended for babies, toddlers, preschool aged children and their grown-ups!

Babypants, Casper
