

COVID-19 SAFETY PLAN

Safe Return to In-Person Instruction & Continuity of Services Plan

REV. 11.2.2022

WELCOME BACK TO SCHOOL!

We are excited to welcome all students back to school in TUSD on August 10, 2022, in a full-time and in-person learning environment. Our COVID-19 Safety Plan has been updated for the 2022-23 school year following current California of Department of Public Health (CDPH) guidance. This guidance continues to emphasize the importance of universal masking in schools (recommended, but not required), daily self-screening, classroom ventilation, hand hygiene, and testing to support full-time, in-person instruction and minimize missed days of school. The classroom is the best place for students to learn and with these layered, mitigation strategies in place, we believe our school campuses are safe for both students and staff.

TABLE OF CONTENTS

Authority & Resources	2
Mask Recommendations	3

Testing & COVID-19 Vaccine	6

AUTHORITY & RESOURCES

Turlock Unified School District's 2022-2023 COVID-19 Safety Plan (CSP) supersedes all previous versions. This document is in accordance with [California Department of Public Health \(CDPH\) COVID-19 Guidance for K-12 Schools](#) and [CAL/OSHA guidance](#), directives that apply to all public and private schools operating in California to support school communities as they implement plans for safe, successful, and full in-person instruction. This guidance is designed to enable all schools to offer and provide full in-person instruction to all students safely, consistent with the current scientific evidence about COVID-19. TUSD will update this plan as needed to follow health guidelines pursuant to state and local requirements.

MASK RECOMMENDATIONS

According to the California Department of Public Health (CDPH), masks are one of the most effective and simplest safety mitigation layers to prevent in-school transmission of COVID-19 infections and to support full-time, in-person instruction in schools.

Although masks are no longer required in schools, TUSD will have face coverings available for students upon request.

PHYSICAL DISTANCING

CDPH and CDC agree that in-person instruction can occur safely without physical distancing when other essential mitigation strategies are implemented; safety measures such as recommended universal masking in schools, classroom ventilation, and daily self-screening promote both safety and in-person learning by reducing the need for physical distancing both indoors and outdoors.

Students will not need to be physically distanced during recess, lunch periods, or structured play periods. CDPH recommends focusing on other mitigation strategies instead of implementing minimum physical distancing requirements for routine classroom instruction.

CLEANING & DISINFECTION

Cleaning Protocol

CDPH acknowledges that routine cleaning is usually sufficient to remove the potential virus that may be on surfaces. Disinfecting removes any remaining germs on surfaces, which further reduces any risk of spreading infection. TUSD will utilize both daily cleaning and disinfection as needed as part of our COVID-19 protocols.

HEALTHY HYGIENE PRACTICES

All TUSD schools and campuses teach and reinforce healthy hygiene practices including hand washing, avoiding touching one's face, and covering one's mouth when sneezing or coughing. Hand washing is promoted throughout the day, especially before and after eating.

TUSD and individual school sites ensure that campuses have adequate supplies readily available to support healthy hygiene behaviors including face coverings, soap, tissues, no-touch trash cans, and hand sanitizers with at least 60% ethyl alcohol.

MEALS ON CAMPUS

We will maximize space as much as possible while eating through staggered meal schedules. Outdoor eating will be arranged as much as feasible, weather-permitting.

Per the CDPH, given the very low risk of transmission from surfaces and shared objects, we no longer limit food service to single-use items and packaged meals.

VENTILATION

Classrooms and Buildings

Indoor environments such as classrooms, offices, and multi-use facilities will continue to be sufficiently ventilated for the health and safety of students and staff. All TUSD classrooms have MERV-13 rated filters installed and staff is encouraged to open doors/windows to increase ventilation.

Buses/Transportation

All TUSD buses and vans will open windows open to improve ventilation.

SELF-SCREENING FOR COVID-19 SYMPTOMS

Staying home when symptomatic is an essential safety measure to prevent the spread of infection in our schools. Students and staff should screen for symptoms prior to reporting to school/work. If exhibiting symptoms associated with COVID-19, students and staff should stay home, notify their school/supervisor, and are encouraged to seek medical care and get tested.

Symptoms of COVID-19:

- Fever of 100 degrees or higher or chills
- (Persistent) cough
- Shortness of breath or difficulty breathing
- Loss of taste or smell
- Headache
- Sore throat
- Muscle or body aches
- Fatigue
- Vomiting, nausea, diarrhea, or abdominal pain
- Runny nose, congestion, itchy or red eyes

Students or staff who are exhibiting symptoms consistent with COVID-19 should not return to school/work until they have met the following requirements:

1. **Doctor's Note:** Student/staff can return to school/work if they provide a note from doctor confirming another underlying medical condition OR a note from doctor confirming another non-COVID-19 diagnosis. May return to school/work 24 hours from visit with no fever (or use of fever-reducing medicine) and improved symptoms.
2. **COVID-19 Test:**
 - **Positive:** Must isolate for 10 days from symptom onset or positive test if asymptomatic. Option to test on day 5 and, with a negative antigen test, return on day 6. May return to school/work with no fever (or use of fever-reducing medicine) and no new symptoms.
 - **Negative:** May return to school/work 24 hours from test with no fever (or use of fever-reducing medicine) and improved symptoms.

No Test: Quarantine at home for 5 days from symptom onset. May return to school/work with no fever (or use of fever-reducing medicine) for 24 hours and improved symptoms. Wearing a mask is recommended through day 10.

3.

Illness/COVID-19

Reporting

All school websites have a "Keep Our Schools Safe" link for parents to complete if their student is symptomatic, a close contact outside school, or positive for COVID-19.

CONTACT TRACING, CASE REPORTING & COMMUNICATION

Contact Tracing and Case Reporting: TUSD will continue to track and document COVID-19 cases throughout the District and is required to report outbreaks to Stanislaus County Health Services Agency (SCHSA) utilizing the SPOT System. Site Principals/Supervisors will be leads on contact tracing investigations. The Director of Communication will serve as the District's liaison when assisting the local health department with contact tracing and investigation.

Communication: TUSD will follow the CDPH Group Contact Tracing protocol and the location and last day on campus of positive cases will be posted to the School Exposures page (<http://www.turlock.k12.ca.us/schoolexpsures>). Testing within 3-5 days is recommended for anyone who may have been exposed.

Specific school communities will be notified by TUSD if a COVID-19 outbreak should occur. An outbreak involves at least three probable or confirmed epidemiologically linked COVID-19 cases within a 14-day period in individuals from different households.

ISOLATION FOR POSITIVE CASES

Isolation: Separate those infected with a contagious disease from people who are not infected. The California Department of Public Health (CDPH) [Isolation Guidance](#) recommends persons with COVID-19 who have symptoms and were instructed to stay home may discontinue self-isolation under the following conditions:

- At least 10 days have passed since symptom onset; AND
- At least 24 hours have passed since resolution of fever without the use of fever-reducing medications; AND
- Other symptoms have improved
- Option to test on day 5 for a return to school on day 6 if receive a negative antigen result

For persons with COVID-19 who are asymptomatic, meaning they have NOT had any symptoms, CDPH recommends that these persons be instructed to stay home. Under this recommendation, they may discontinue self-isolation under the following conditions:

- At least 10 days have passed since the date of the first positive COVID-19 diagnostic test. Option to test on day 5 for a return to school on day 6 if receive a negative antigen result. If they develop symptoms, then the strategies for discontinuing self-isolation for symptomatic persons should be used.

Note: If an exposed student/staff member tested positive for COVID-19 before their new, recent exposure, and it has been less than 3 months since they started having symptoms from that previous infection (or since their first positive COVID-19 test if asymptomatic), they do not need to quarantine, as long as they have not had any new symptoms since their recent exposure to someone with COVID-19.

QUARANTINE

Quarantine: Restricts the movement of persons who were exposed to a contagious disease in case they become infected.

Quarantine is no longer required for someone who is exposed to COVID-19. However, masking indoors is required for 10 days from exposure and testing is recommended 3-5 days from exposure.

SCHOOL EXPOSURE

Group Contact Tracing:

1. Notify students who spend more than a cumulative total of 15 minutes (within a 24-hour time period) in a shared indoor space (e.g. classroom) with a positive individual during their infectious period (2 days prior to symptom onset or if no symptoms, two days prior to test date). School exposures posted daily at <http://www.turlock.k12.ca.us/schoolexpsures>.
2. Exposed students, regardless of COVID-19 vaccine status or prior infection, should get tested within 3-5 days of exposure.
3. Exposed students who participate in testing may continue to take part in all aspects of K-12 schooling, including sports and extra-curricular activities, unless they develop symptoms or test positive for COVID-19.

HOME EXPOSURE

Students, regardless of vaccination status, may continue to attend school as long as they remain asymptomatic. They must wear a mask indoors. Testing is recommended.

COVID-19 Testing Plan

In an effort to help keep students in school, TUSD has contracted with Heal 360 to provide testing for COVID-19. Learn more at <http://www.turlock.k12.ca.us/covidtesting> Free OTC rapid antigen tests are also available at all school sites.

Staff Testing

All TUSD staff have access to free COVID-19 testing with Heal 360 as well as free OTC rapid antigen tests.

COVID-19 Vaccine

The California Department of Public Health (CDPH) strongly recommends COVID-19 vaccination for all eligible people in California, including teachers, staff, students, and adults sharing homes with these members of our K-12 communities. TUSD, in collaboration with the Stanislaus County Health Services Agency (SCHSA) has hosted several mobile COVID-19 vaccine clinics. Students and staff who are fully vaccinated are not required to quarantine if exposed unless they become symptomatic. Testing is recommended 3-5 days from last exposure to a positive case.

ALTERNATIVE LEARNING OPTIONS

For families interested in an alternative learning options, eCademy Charter at Crane School provides a variety of K-12 programs. Please contact Principal Tim Norton at (209) 669-3410.
