

Outdoor Education Research Project

Objectives: As you will be attending the Outdoor Education Field Trip to Estes Park, Colorado and Rocky Mountain National Park in a few weeks, you need to be aware of the area. Therefore, you will be working cooperatively with a partner in order to complete this project.

- You will be able to work cooperatively with a partner in order to research _____ in order to teach your class about what you learned.
- After researching your area of Estes Park and Rocky Mountain National Park, you will write a one page paper that depicts your knowledge of what you learned. Make sure that you give credit to your sources by creating a works cited.
- The last part of your project will be to create a presentation to show your fellow classmates what you learned. This is where you teach them.
- In order to make sure that you did a good job of teaching your classmates, you need to create a quiz or survey. This needs to include at least three questions to make sure that they learned something worth learning. You may choose to use a survey app, quiz app, or the old fashioned pencil/paper form. You are in charge of grading the quizzes and presenting the information to Mrs. Windsheimer within a day after your presentation.

You will be graded on the following:

- Group Work: _____/15
- Research Paper: _____/35
- Presentation: _____/35
- Quiz Percentages: _____/15

Total: _____/100
