Dedicated to protecting and improving the health and environment of the people of Colorado

Dear Colorado healthcare provider:

Colorado School Entry Immunization Law (25-4-901 et seq, C.R.S) and Colorado Board of Health rule (6 CCR 1009-2) require students who attend a public, private or parochial K - 12 school, licensed child care, preschool or Head Start program to be vaccinated against many of the diseases vaccines can prevent. Students must be vaccinated against:

- diphtheria, tetanus and pertussis (DTaP, DT, DTP, Tdap),
- polio (IPV),
- measles, mumps, rubella (MMR),
- hepatitis B (HepB),
- haemophilus influenzae type b (Hib),
- pneumococcal (PCV13), and
- varicella (chickenpox).

The number, timing and spacing of the required vaccine doses is set by the Centers for Disease Control and Prevention's (CDC) Advisory Committee on Immunization Practices (ACIP). To be considered valid, a dose of vaccine must meet both the **minimum age and minimum intervals** as defined by ACIP. You can view the current ACIP vaccine schedule for persons 0 - 18 yrs of age at [www.cdc.gov/vaccines/schedules/downloads/child/0-18yrs-child-combined-schedule.pdf](http://www.cdc.gov/vaccines/schedules/downloads/child/0-18yrs-child-combined-schedule.pdf). Vaccines are recommended for rotavirus, hepatitis A, influenza, meningococcal disease and human papillomavirus, but are not required.

Colorado schools are required to review immunization records for school entry and can only accept valid doses of vaccine. Your patients may receive notification of noncompliance if a dose of vaccine does not meet the minimum age or minimum interval requirements per the ACIP schedule. There are three ways a school/student can meet the compliance requirements established by Colorado law:

- A student is considered fully immunized if he or she has received all doses of school-required vaccines according to the current ACIP schedule. Note: students are required to receive their final doses of DTaP, IPV, MMR and Varicella by kindergarten entry and their Tdap by 6th grade entry, even if the student is 10 years of age.
- A student is in the process of getting up-to-date on required vaccines and has a written plan from a parent/guardian on file with the school.
- The student (emancipated or 18 years of age or older) or student's parent/guardian has submitted a signed official *Immunization Non-Medical Exemption Form (Religious or Personal Belief)* or the healthcare provider (medical doctor, doctor of osteopathic medicine, advanced practice nurse or delegated physician's assistance) has signed an official *Immunization Medical Exemption Form* because of a condition that precludes a patient from receiving vaccine(s).

If students do not meet at least one of the compliance criteria, they are not permitted to attend school. If you have questions about the student's school immunization requirement, please communicate with the student's school nurse or school representative.
