Publishing Information

The California Department of Education (CDE), Instructional Quality Commission (IQC), and State Board of Education (SBE) commenced the process for revising the visual and performing arts standards in October 2016. Per Assembly Bill 2862 and Assembly Bill 37, Chapter 647, *Education Code* Section 60605.13 requires the Superintendent, in consultation with the IQC, to recommend to the state board revisions to the visual and performing arts content standards in the subjects of dance, music, theatre, and visual arts adopted by the state board pursuant to Section 60605.3, and to recommend new standards for the subject of media arts. On January 9, 2019, the SBE adopted the *California Arts Standards for Public Schools, Prekindergarten Through Grade Twelve (Arts Standards)*.

A Message from the State Superintendent of Public Instruction and the State Board of Education

Creativity and appreciation for the arts are important for all students to have a well-rounded education that exposes them to new ideas and perspectives. Arts education boosts school attendance, academic achievement, and college attendance rates; improves school climate; and promotes higher self-esteem and social-emotional development.

The *2019 California Arts Standards* update the four arts disciplines—dance, music, theatre, and visual arts—and include new standards for media arts as a discrete discipline. Media arts includes diverse categories such as digital imaging, animation, sound production, web design, virtual reality, and interactive design, along with new and emerging forms.

The *California Arts Standards* are based on the National Core Arts Standards created by the National Coalition for Core Arts Standards in 2015, which provide a foundation for the development of artistic competencies and cultivation of a lifelong appreciation and understanding of the arts. As students develop artistic literacy—the ultimate goal of arts learning for California’s students—they develop transferable skills that enhance their personal, academic, and professional endeavors.

Every child should have equitable access to high-quality, standards-based arts education to thrive and participate in modern society. The *California Arts Standards* reflect that fundamental belief. The standards are conceptual and support inclusive arts learning experiences to meet the needs of students with a wide range of abilities.

We encourage educators to utilize the arts standards to update curriculum, instruction, and assessment, which are the foundation of quality arts learning in schools, and local education agencies are urged to ensure access to arts learning for each and every student in California.

Introduction to the California Arts Standards *Dance, Media Arts, Music, Theatre, Visual Arts*

The California Arts Standards provide guidance toward achieving a common goal: for all California students to fully participate in a rich and well-rounded arts education. An arts education helps children and youth make sense of the world, communicate their unique ideas across boundaries, and discover who they are as individuals and as members of various groups. Students who experience a quality arts education, one that seeks to honor the aesthetic and enduring over the efficient, have an opportunity to engage in complex and nuanced thinking around meaningful work (Eisner 2002).

Because a sequential arts education, provided as core subject matter, is essential for every California student from the earliest years through high school graduation and beyond, the California *Education Code* requires courses of study in the arts to be offered to all California students.

California *Education Code* and Arts Education

Education Code Section 51210

(a) The adopted course of study for grades 1 to 6, inclusive, shall include instruction, beginning in grade 1 and continuing through grade 6, in the following areas of study ... (e) Visual and performing arts, including instruction in the subjects of dance, music, theatre, and visual arts, aimed at the development of aesthetic appreciation and the skills of creative expression.

Education Code Section 51220

The adopted course of study for grades 7 to 12, inclusive, shall offer courses in the following areas of study: ...

(g) Visual and performing arts, including dance, music, theatre, and visual arts, with emphasis upon development of aesthetic appreciation and the skills of creative expression.

“A bird doesn’t sing because it has an answer, it sings because it has a song.”

civil rights advocate, and
recipient of the Presidential
Medal of Freedom

Creating and experiencing art is central to the human experience—art allows people to feel and express the range of human emotions and connects people to one another and to their local and global communities. For many, an arts education is only the beginning of a lifelong appreciation of the arts and an enduring sensitivity to the way the arts enrich lives.

In addition to acknowledging arts education as crucial in and of itself, many researchers and educators extol the virtues of arts education as extending beyond creativity and artistic literacy to have a beneficial effect in other areas. Arts education boosts school attendance, academic achievement, and college enrollment rates; improves school climate; and promotes higher self-esteem, connectedness to school, and social-emotional development (Catterall 2009; Peppler et al. 2014; Park et al. 2015; Robinson 2013).

The benefits of an arts education extend well beyond school into every post-secondary endeavor: vocational, avocational, and personal. The arts also have a robust economic grounding in California. With over \$400 billion in economic output, the impacts of the creative economy are substantial (Otis College of Arts and Design 2018). Quality arts programs are built on arts standards, which guide the design of curriculum, instruction, and assessment. This guidance promotes student development of the creative capacities necessary for college, careers, and life in the twenty-first century. Quality, standards-based arts programs in California’s public schools are essential for ensuring that all students have opportunities to fulfill their potential, including as successful artists and creative leaders in the creative economy at the local, national, and international levels.

Purposes and Development of the Standards

The central purposes of the California Arts Standards are to foster students’ artistic competencies; cultivate their appreciation and understanding of the arts in ways that are enjoyable, fulfilling, and transferable to personal, academic, and professional endeavors; and support them to fully engage in lifelong arts learning. The standards are:

- Process-oriented, grade-appropriate indicators of what students need to know and be able to do
- Student-centered and rooted in backward design, the process of defining intended outcomes prior to designing educational experiences to ensure students attain those outcomes
- Outcomes-based, communicating high and achievable goals

The standards are based on the National Core Arts Standards (NCAS) (National Coalition of Core Arts Standards [NCCAS] 2014) and were tailored for California through a collaborative and public statewide process.¹ The California Arts Standards Advisory Committee, comprised of arts education teachers and experts from across the state, reviewed the NCAS using guidelines established by the California State Board of Education and came to consensus on recommended revisions or additions.² During this process, ensuring inclusivity, accessibility, and cultural relevance for the diverse learners of California was prioritized. Drafts of the standards were posted publicly, and input from individuals and representatives from arts education organizations and the general public was collected through the process of public comment and review and used to inform the crafting of the final standards.

While the new standards inform teaching and learning in the artistic disciplines of dance, music, theatre, and visual arts, they also reflect the significance of new standards for media arts. Media arts standards are intended to address the diverse forms and categories of media arts as a distinct, stand-alone discipline, including photography, digital imaging, video, animation, sound production, web design, graphic design, virtual design, interactive design, multimedia, virtual reality, and emerging forms. Media arts standards are also intended to be used in other disciplines.

The California Arts Standards are comprehensive for all students in prekindergarten through grade level twelve. The standards build from grade to grade and embody grade- and age-appropriate key concepts, processes, and traditions of study in each of the five artistic disciplines: dance, media arts, music, theatre, and visual arts. They provide important guidance for schools to design and organize teaching and learning; understand and evaluate student learning; and prepare, adopt, or adapt instructional resources. The standards identify the learning outcomes for all students, and guide teachers in providing a unified quality arts education so that these outcomes are achieved.

The standards also provide administrators and district decision-makers with critical information for developing and expanding standards-based arts programs. A commitment to a comprehensive education, equitable opportunities, and high expectations are embedded within the standards.

Philosophical Foundations and Lifelong Goals of the Standards

The standards are grounded in the NCAS vision of artistic literacy—the knowledge and understanding required to participate authentically in the arts—which is further articulated in the philosophical foundations and lifelong goals in Table 1. Fluency in the language(s) of the arts is the ability to create, perform/produce/present, respond, and connect through symbolic and metaphoric forms that are unique to the arts. An artistically literate person is able to transfer arts knowledge, skills, and capacities to other subjects, settings, and contexts (NCCAS 2014, 17).

TABLE 1: Philosophical Foundations and Lifelong Goals (NCCAS 2014, 10)

Components of Artistic Literacy	Philosophical Foundations	Lifelong Goals
The Arts as Communication	In today’s multimedia society, the arts are the media, and therefore provide powerful and essential means of communication. The arts provide unique symbol systems and metaphors that convey and inform life experience (i.e., the arts are ways of knowing).	Artistically literate citizens use a variety of artistic media, symbols, and metaphors to independently create and perform work that expresses and communicates their own ideas and are able to respond by analyzing and interpreting the artistic communications of others.
The Arts as Creative Personal Realization	Participation in each of the arts as creators, performers, and audience members (responders) enables individuals to discover and develop their own creative capacity, thereby providing a source of lifelong satisfaction.	Artistically literate citizens find at least one arts discipline in which they develop sufficient competence to continue active involvement in creating, performing, and responding to art as an adult.
The Arts as Culture, History, and Connectors	Throughout history the arts have provided essential means for individuals and communities to express their ideas, experiences, feelings, and deepest beliefs. Each discipline shares common goals but approaches them through distinct media and techniques. Understanding artwork provides insights into individuals’ own and others’ cultures and societies, while also providing opportunities to access, express, and integrate meaning across a variety of content areas.	Artistically literate citizens know and understand artwork from varied historical periods and cultures, and actively seek and appreciate diverse forms and genres of artwork of enduring quality/significance. They also seek to understand relationships among the arts, and cultivate habits of searching for and identifying patterns, relationships between the arts and other knowledge.

Components of Artistic Literacy	Philosophical Foundations	Lifelong Goals
The Arts as Means to Well-Being	Participation in the arts as creators, performers, and audience members (responders) enhances mental, physical, and emotional well-being.	Artistically literate citizens find joy, inspiration, peace, intellectual stimulation, meaning, and other life-enhancing qualities through participation in all of the arts.
The Arts as Community Engagement	The arts provide means for individuals to collaborate and connect with others in an enjoyable inclusive environment as they create, prepare, and share artwork that bring communities together.	Artistically literate citizens seek artistic experiences and support the arts in their local, state, national, and global communities.
The Arts as Profession	Professional artists weave the cultural and aesthetic fabric of communities and cultivate beauty, enjoyment, curiosity, awareness, activism, and personal, social, and cultural connection and reflection. This fabric strengthens communities as a whole, enhances the lives of individuals, and inspires the global community.	Artistically literate citizens appreciate the value of supporting the arts as a profession by engaging with the arts and by supporting the funding of the arts. Some artistically literate individuals will pursue a career in the arts, thereby enriching local, state, national, and global communities and economies.

Organization of the Standards

The California Arts Standards are organized by the **five artistic disciplines of dance, media arts, music, theatre, and visual arts**. For each of the five disciplines, there are four artistic processes, eleven anchor standards with aligned enduring understandings and essential questions, and individual PK–12 student performance standards that are articulated as measurable and attainable learning targets.

Elements of the California Arts Standards

Table 2 provides a unified view of the California Arts Standards for the five artistic disciplines. It shows the relationship among the elements of the standards. These elements, considered together, will assist local education agencies and individual schools in writing, adapting, or adopting curriculum and in addressing comprehensive assessment in arts education.

Implementation of the standards is driven by the philosophical foundations and lifelong goals that together demonstrate artistic literacy. They are made actionable through the artistic processes that are common across disciplines. Anchor and performance standards in each artistic discipline are driven by enduring understandings and essential questions. A description of each of these elements and how they connect to one another is detailed in the following section.

Artistic Processes and Anchor Standards

The standards are based on the **artistic processes** of **creating, performing/producing/presenting, responding, and connecting** (NCCAS 2014, 11–12). These artistic processes are the cognitive and physical actions by which arts learning and arts making are realized. Each of the arts disciplines incorporates the artistic processes that define and organize the link between the art and the learner.

Each artistic process branches into either two or three **anchor standards**. Anchor standards describe the general behaviors, artistic skills, and habits of mind that teachers expect students to demonstrate throughout their arts education. These anchor standards are parallel across arts disciplines and grade levels and serve as the tangible educational expression of artistic literacy. The performance standards, which describe student learning outcomes in each of the specific arts disciplines, align with anchor standards.

Collectively, the design reflects a cohesive system that allows for commonality across the disciplines and specificity within each discipline, therefore establishing the appropriate level of breadth and depth required for state standards.³ The relationship between the artistic processes and anchor standards is shown in the following table.

TABLE 3: California Arts Standards Artistic Processes and Anchor Standards (NCCAS 2014, 13)

Synthesize and relate knowledge and personal experiences to make art. 11. Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.

Process Components, Enduring Understandings, and Essential Questions

Process components are the actions (expressed through verbs such as imagine, plan and make, evaluate, refine, present) that artists carry out as they complete each artistic process. These process components accompany clusters of performance standards. Students’ ability to carry out these actions empowers them to engage in the artistic process independently (NCCAS 2014, 16).

Enduring understandings and essential questions focus on the big ideas and important understandings in arts education (Wiggins and McTighe 2005). Essential questions and enduring understandings work together to support an inquiry-based approach to arts education, an approach emphasized in college- and career-ready standards across all the content areas.

Enduring understandings are statements summarizing important ideas and core processes that are central to a discipline and have lasting value beyond the classroom. They synthesize what students should come to understand as a result of studying a particular content area. Moreover, they articulate what students should value about the content area over the course of their lifetimes. Enduring understandings also enable students to make connections to other disciplines beyond the arts. A true grasp of an enduring understanding is demonstrated by the student’s ability to explain, interpret, analyze, apply, and evaluate its core elements. Examples of enduring understandings across the arts disciplines for one artistic process and one anchor standard are shown in Table 4.

Essential questions guide students’ inquiry into these enduring understandings. Reflecting differences in traditions and instructional practices between the arts, the specific enduring understandings and essential questions addressed by their standards also vary somewhat.⁴

TABLE 4: Enduring Understanding Across One Artistic Process and Anchor Standard

Creating—Anchor Standard 1: Generate and conceptualize artistic ideas and work.

Dance	Media Arts	Music	Theatre	Visual Arts
Choreographers use a variety of sources as inspiration and transform concepts and ideas into movement for artistic expression.	Media arts ideas, works, and processes are shaped by the imagination, creative processes, and by experiences, both within and outside of the arts.	The creative ideas, concepts, and feelings that influence musicians’ work emerge from a variety of sources.	Theatre artists rely on intuition, curiosity, and critical inquiry.	Creativity and innovative thinking are essential life skills that can be developed.

Enduring understandings and essential questions work together to communicate a fundamental understanding and path of inquiry of an anchor standard. Students' inquiry into grade-appropriate essential questions and grasp of enduring understandings will, however, necessarily deepen and broaden over the course of their arts education.

Performance Standards

Performance standards are the substantive portion of the California Arts Standards. They are discipline-specific (dance, media arts, music, theatre, visual arts), grade-by-grade articulations of student achievement in the arts PK–8 and at three proficiency levels in high school (Proficient, Accomplished, and Advanced, as described in Table 5). The performance standards translate the anchor standards, enduring understandings, and essential questions into measurable learning goals by describing more specifically what students should know and be able to do in each arts discipline by the end of a school year or course.

The three high school proficiency levels are flexible enough to accommodate varying degrees of achievement by students during high school, including those who explore a wide range of artistic pursuits and experiences, as well as those who build on their PK–8 foundation by pursuing deeper engagement in one arts discipline (NCCAS 2014, 13). Descriptions of the three high school proficiency levels and what students who achieve those levels are able to do are shown in Table 5.

TABLE 5: High School Performance Standards Proficiency Levels (NCCAS 2014, 26)

High School Proficient	High School Accomplished	High School Advanced
<p>A level of achievement attainable by most students who complete a high-school level course in the arts (or equivalent) beyond the foundation of quality PK–8 instruction.</p>	<p>A level of achievement attainable by most students who complete a rigorous sequence of high-school level courses (or equivalent) beyond the Proficient level.</p>	<p>A level and scope of achievement that significantly exceeds the Accomplished level. Achievement at this level is indisputably rigorous and substantially expands students’ knowledge, skills, and understandings beyond the expectations articulated for Accomplished achievement.</p>
<p>Students at the Proficient level are able to:</p> <ul style="list-style-type: none"> ▪ use foundational technical and expressive skills and understandings in an art form necessary to solve assigned problems or prepare assigned repertoire for presentation; ▪ make appropriate choices with some support; ▪ be prepared for active engagement in their community; ▪ understand the art form to be an important form of personal realization and well-being; and ▪ make connections between the art form, history, culture, and other learning. 	<p>Students at the Accomplished level are, with minimal assistance, able to:</p> <ul style="list-style-type: none"> ▪ identify or solve arts problems based on their interests or for a particular purpose; ▪ conduct research to inform artistic decisions; ▪ create and refine arts products, performances, or presentations that demonstrate technical proficiency, personal communication, and expression; ▪ use the art form for personal realization and well-being; and ▪ participate in arts activities beyond the school environment. 	<p>Students at the Advanced level are able to:</p> <ul style="list-style-type: none"> ▪ identify challenging arts problems independently based on their interests or for specific purposes and bring creativity and insight to finding artistic solutions; ▪ use at least one art form as an effective avenue for personal communication, demonstrating a higher level of technical and expressive proficiency characteristic of honors or college-level work; ▪ exploit their personal strengths and apply strategies to overcome personal challenges as arts learners; and ▪ take a leadership role in arts activity within and beyond the school environment.

Special Considerations for the Music Standards

Unlike the other four artistic disciplines, which provide performance standards for grades PK–12, music provides standards for grades PK–8 plus four distinct “strands” of standards, reflecting the increasing variety of music courses offered in schools:

- Ensembles
- Harmonizing Instruments
- Composition and Theory
- Technology

Two of these strands, Composition and Theory and Technology, have three proficiency levels (Proficient, Accomplished, Advanced) and are designed for use in high schools.

The other two strands, Ensembles and Harmonizing Instruments, encompass five proficiency levels and are used by elementary, middle, and high schools. In acknowledgment of the practical reality of music students’ involvement in Ensemble and Harmonizing Instrument classes before they enter high school, performance standards are provided for two preparatory levels in these strands, **Novice** and **Intermediate**. These are attached for convenience to grade levels, but are potentially useful for earlier grade-level experiences:

1. **Novice:** This proficiency level is nominally assigned to the fifth-grade level. Students at the Novice level have started specialization in an art form of their choice. They are beginning to develop the basic artistic understanding and technique necessary to advance their skill level. Their expressive skills may be identified and exploratory work begins. They may participate in presentation and performance opportunities as they are able. Their curiosity in the art form begins their journey toward personal realization and well-being.
2. **Intermediate:** This proficiency level is nominally assigned to the eighth-grade level. Students at the Intermediate level are continuing study in a chosen specialized art form. Their development continues in artistic understanding and technical and expressive skills enabling the student to begin to independently and collaboratively create, perform, and respond at their given skill level. Their presentation and performance opportunities in ensembles at school and in the community increase and students actively participate in rehearsals. Through continued study of their art form they continue their journey toward personal realization and well-being.

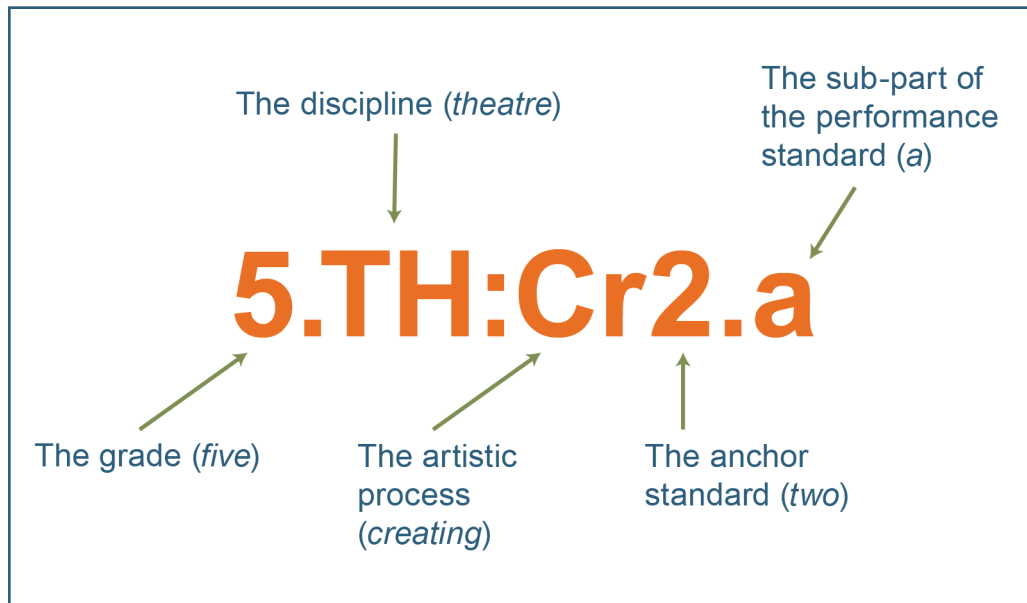

Five Artistic Disciplines

Each of the artistic disciplines—dance, media arts, music, theatre, and visual arts—is a core subject in its own right. Subject-centered arts instruction focuses on developing discipline-specific skills in each arts discipline. In addition, interdisciplinary approaches connecting the arts disciplines are facilitated by the way these connections are already built into the standards for the five artistic disciplines. Study and practice in two or more of the artistic disciplines is mutually reinforcing and demonstrates the underlying unity of the arts. Interdisciplinary approaches connecting the arts and other content areas enhance learning for students and support integrated and deeper learning. A comprehensive arts education program has three components:

1. Subject-centered arts instruction in dance, media arts, music, theatre, and visual arts
2. Interdisciplinary approaches connecting the arts disciplines
3. Interdisciplinary approaches connecting the arts and other content areas

To enact a robust and comprehensive approach to arts education, an understanding of each artistic discipline is essential. Brief introductions preceding each set of standards provide an overview that grounds the reading of the standards for each artistic discipline.

FIGURE 1: Coding of the California Arts Standards

Coding of the Standards

An agreed-upon system for coding allows educators to reference the performance standards more efficiently when planning lessons and units of study. The coding system of the performance standards is illustrated in Figure 1 and described below. The full code is located at the top of each column of the performance standards.

The order of coding for the standards is provided below with the codes indicated in parentheses:

- (1) The **grade level** appears first and is divided into these categories: Pre-K (PK); Kindergarten (K); grade levels 1–8 (1, 2, 3, 4, 5, 6, 7, 8); and the three proficiency levels for high school, which are Proficient (Prof), Accomplished (Acc), and Advanced (Adv).

- (2) The **artistic disciplines** appear second: Dance (DA), Media Arts (MA), Music (MU), Theatre (TH) and Visual Arts (VA)
- (3) The **artistic processes** appear third: Creating (Cr); Performing/ Producing/Presenting (Pr); Responding (Re); and Connecting (Cn). Each of the arts disciplines incorporates these processes in some manner. These processes, the cognitive and physical actions by which arts learning and making are realized, define and organize the link between the art and the learner.
- (4) The **anchor standards** appear fourth. The 11 anchor standards, which describe the general knowledge and skills that teachers expect students to demonstrate throughout their arts education, are parallel across arts disciplines and grade levels. They serve as the tangible educational expression of artistic literacy. When an anchor standard has more than one set of enduring understandings, essential questions, and process components, numbers directly after the anchor standard indicate which set is provided (e.g., 1, 2, 3).
- (5) The **sub-part of the performance standard** appears last. These sub-parts describe different aspects of the same standard.

Additional Codes for Music Standards

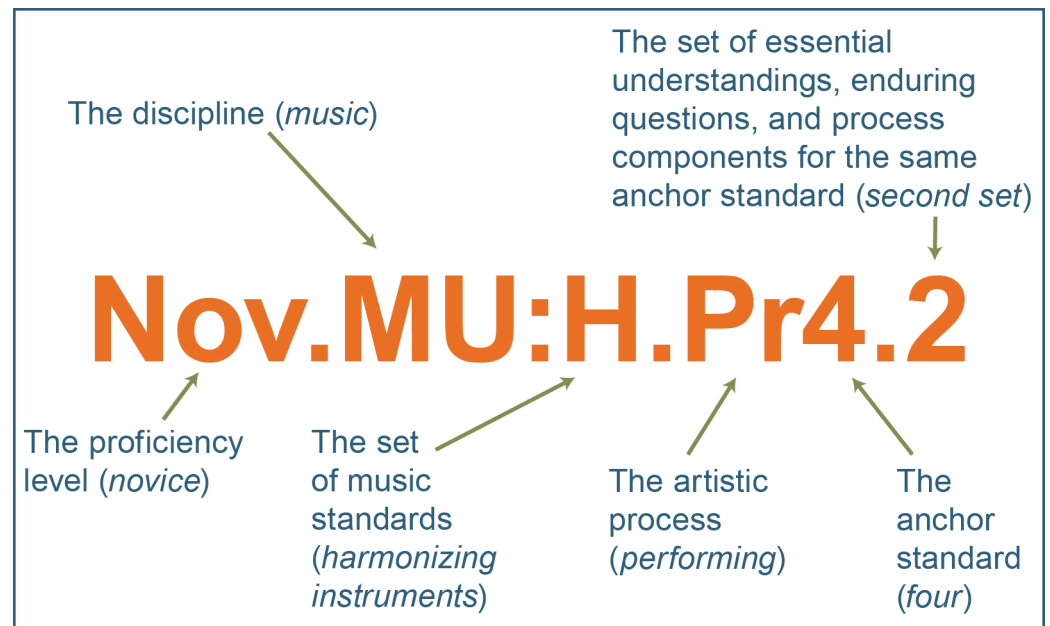

An example of the coding system for Music—Harmonizing Instruments is provided here.

Unlike the other arts disciplines, there are five sets of performance standards for music. A one-letter code is added after the artistic discipline code for all but one set of the performance standards (PK–8) as follows: Harmonizing Instruments (H), Ensembles (E); Composition and Theory (C), Technology (T).

There are also two additional levels for the Harmonizing Instruments performance standards, with the codes indicated in the parentheses:

- Novice (Nov), nominally assigned to the fifth-grade level
- Intermediate (Int), nominally assigned to the eighth-grade level

How to Read the Standards

The performance standards are designed to be approached in holistic ways to design robust lessons within units of study. They are presented as grade-level progressions by individual standard so that teachers can see not only their own grade level, but also the standards for previous and upcoming grade levels. They can be read in a variety of ways, two of which are suggested here: grade-to-grade and within-grade.

- **Grade-to-grade reading.** The standards can be read across grade levels as a progression. Since students have different levels of experience with a given discipline, the standards are organized across grade levels so that teachers can both attend to grade-level standards and also meet the individual needs of students who may be performing at levels above or below grade level.
- **Within-grade reading.** The standards may also be read to understand the learning outcomes for a subset of standards in a specific grade level or all of the standards for a particular grade level. This reading allows teachers to see what all of the outcomes for their grade level are so they can integrate standards as appropriate for lesson and unit learning goals.

Standards-Based, Accessible, and Equitable Arts Education

The California Arts Standards are designed to support all California students to develop and achieve the lifelong goals of artistic literacy and to promote access and equity in the arts. However, this can only happen in a context in which arts education is prioritized and standards-based and equitable practices are the norm. Individual schools and districts will need to strategically implement the standards within current allocations of time and resources even as they strive toward a fully inclusive and equitable arts education for all students.

Prioritizing a Standards-Based Arts Education

The arts are structural building blocks that support, inspire, and empower students to grow continuously. Focusing on the systems that ensure all students have opportunities to learn in the arts is essential for ensuring equal access to the arts. For students to experience the potential benefits of standards-based quality arts learning, opportunity-to-learn conditions that create a rigorous and supportive learning environment must be established. These opportunities include systemic and structural resources, such as access to certified arts educators, expanded course offerings in the five arts disciplines, and adequate time, spaces, and materials for arts learning.

Opportunities also include the daily encounters students have in school, when teachers approach the arts standards in a holistic way, in consideration of their students as whole artists, capable of achieving high expectations, and

deserving of everything a quality arts education has to offer. Teachers and students must participate fully and jointly in activities in which they can exercise the creative practices of imagining, investigating, constructing, and reflecting as unique beings committed to giving meaning to their experiences. The California Arts Standards offer multiple entry points for these types of learning experiences, and additional guidance can be found in the NCAS “Opportunity-to-Learn Standards” documents (available at <https://www.nationalartsstandards.org/content/resources>), as well as the California Arts Education Framework.

Inclusive and Equitable Arts Education

California maintains a strong commitment to ensuring safe, welcoming, enriching, intellectually stimulating, and asset-oriented educational experiences for each student in all disciplines, including the arts. The California Arts Standards reflect the diversity of California’s children and youth, including students who are culturally, ethnically, and linguistically diverse; identify as LGBTQ+; have different talents, skills, and interests; have a variety of abilities and disabilities; and come from a range of personal backgrounds, socio-economic circumstances, and types of homes and communities.⁵ This diversity provides opportunities for teachers to enrich the arts education experience for all students. Students’ ethnic, cultural, linguistic, and other assets are to be acknowledged, validated, and valued in the arts classroom as rich foundations for arts learning. Students in California schools should encounter, discuss, and create art representing a vast array of cultures, languages, and identities as a means to better understand a wide range of experiences and perspectives and to develop global competence. The next section offers a vision of culturally and linguistically sustaining arts education—one that aims to see all California students thrive in their artistic education.

Inclusive, Affirming, and Culturally Sustaining Arts Education

An inclusive, affirming, and culturally sustaining arts education is based on a group's assets, rather than on perceptions of deficiencies, prioritizing the following tangible actions:

- Promote the arts to teach and learn about self-knowledge, respect, self-respect, and empathy, as well as multicultural ways of knowing.
- Include instruction on diversity grounded in the arts and use cultural knowledge to support young people's critical thinking and creative innovation, particularly those students who do not find the curriculum engaging.
- Promote student voice as a primary focus of quality arts education. Adopt culturally and linguistically responsive arts education and arts-integrated curricula that focus on positive identity development and ownership of learning as instructional goals. Support the cultural assets students bring to the classroom.
- Build collaboration among classroom teachers, arts specialists, teaching artists (practicing professional artists with the complementary teaching skills), families, and community members. By incorporating local cultural expertise and leadership, the schools become an integral part of the community, which generates more resources for students in and out of school.
- Strengthen communication between home and school cultures and increase family involvement by creating a welcoming school environment. Empower families, regardless of primary language, socioeconomic status, race, ethnicity, or educational background.

Source: A Blueprint for Creative Schools (CREATE CA 2015, 8–9).

Diversity in the arts classroom is an asset, and the more diverse the classroom, the more complex the teacher's role becomes in providing quality learning experiences that are sensitive to the needs of individual students, that leverage their particular strengths, and that ensure equitable opportunity to participate in a quality arts education. Many students experience particular challenges that can affect their arts education. Some students are living in poverty, experiencing homelessness, or changing schools or missing school often. Some students are learning English as an additional language while simultaneously learning rigorous academic content.⁶ Others face the mental and physical health trauma of racism, homophobia,

or religious discrimination. Still others experience the daily challenges that come with mild, moderate, or severe disabilities or mental health issues. These populations are not mutually exclusive; many students' identities intersect with multiple identity groups. Therefore, it is important that arts education teachers inform themselves about aspects of their students' backgrounds and keep in mind that their identities may overlap, intersect, and interact. In such multifaceted settings, the notion of shared responsibility is critical. Teachers, administrators, specialists, expanded learning leaders, parents, guardians, caretakers, families, and the broader community need the support of one another to best serve all students and ensure that no student is deprived of a quality arts education due to individual circumstances.

Universal Design for Learning

To succeed at enacting an inclusive, affirming, and culturally sustaining arts program, educators must deliberately design accessible learning experiences. Universal Design for Learning (UDL) is a research-based framework for improving student learning experiences and outcomes through careful instructional planning focused on the varied needs of all students, including students with disabilities, advanced and gifted learners, and English learners. The principles of UDL emphasize providing multiple means of representation, action and expression, and engagement and options for various cognitive, communicative, physical, meta-cognitive, and other means of participating in learning and assessment tasks. Through the UDL framework, and “teaching to the edges” of the arts classroom’s student population, the needs of all learners are identified and planned for at the point of first teaching. This evidence-based planning supports students’ full inclusion in arts learning, prevents the need for follow-up instruction, and reduces the need for alternative instruction. Table 6 provides an outline of UDL Principles and Guidelines that arts education teachers can use to inform their curriculum, instruction, and assessment planning.⁷

The Arts and Educating for Global Competency

According to the Asia Society and the Council of Chief State School Officers, and later officially adopted by the US Department of Education, global competence is “the capacity and disposition to understand and act on issues of global significance—under this definition, the four pillars of global competence include investigating the

world, weighing perspectives, communicating ideas, and taking action (Monthey et al. 2016, xiii; Mansilla and Jackson 2011; United States Department of Education 2012, 5). The pillars of global competence closely align with the four fundamental creative practices of imagination, investigation, construction, and reflection that are a foundation for arts education in all of the disciplines, and foster finding innovative, unexpected approaches, and solutions (NCCAS 2014, 19). In developing artistic literacy through a standards-based arts program, students also develop global competence, an outcome that embodies twenty-first century skills. These skills and other byproducts of arts education including social and emotional skills, and a healthy sense of self and others, are highly valued in today's creative and team-based workforce and necessary for engagement in the twenty-first century world (College Board 2012; Hanna 2011; Israel 2009).

Beyond the Standards

Standards are measurable outcomes of aspirational teaching and learning experiences. To address the standards effectively and provide world-class arts education to all students, teachers and administrators are encouraged to access additional resources, including the following:

- The glossary sections of the California Arts Standards provide definitions that explain the context or point of view regarding the terms used within the standards.
- The California Arts Education Framework provides guidance for how to implement the standards for teachers and administrators.
- Instructional materials and curricular models provide tools and resources for implementing a standards-based arts education.

All California students deserve a world-class arts education provided by well-prepared, caring, and creative teachers working in supportive contexts. The California Arts Standards are a critical component of this vision. Teachers, school and district leaders, families, community members, policymakers, and students themselves are encouraged to embrace the promise these standards hold for California and for a creative and fulfilling future for all. Today, the world needs artists and creative leaders more than ever—those individuals who possess the powers of inquiry and exploration, communication and collaboration, creativity and innovation, and openness and reflection. These standards play a pivotal role in ensuring that all students have an equitable opportunity to enrich the world with their creative capacities.

Endnotes

- 1 The NCAS were developed by national experts, including those from California who also participated in the California adaptation of the national standards. To learn more about the national effort and NCAS development process, see the National Core Arts Standards: A Conceptual Framework for Arts Education, at <http://www.nationalartsstandards.org/sites/default/files/Conceptual%20Framework%202007-21-16.pdf> on which this introduction to the California Arts Standards is based.
- 2 These guidelines were derived from public testimony from three statewide focus groups.
- 3 Because anchor standards are broad and not discipline- or grade-level/grade-band specific, performance standards should be used for detailed instructional design.
- 4 Note that because enduring understanding statements are specific to each artistic discipline, the language in the statements is not always parallel across the disciplines.
- 5 The California Arts Standards uses LGBTQ+ as an inclusive acronym, as described in the draft 2018 California Health Education Framework: “The usage of LGBTQ+ throughout this document is intended to represent an inclusive and ever-changing spectrum and understanding of identities. Historically, the acronym included lesbian, gay, and bisexual, but has continued to expand to include queer, questioning, intersex, asexual, allies, and alternative identities (LGBTQQIAA), as well as expanding concepts that may fall under this umbrella term in the future.”
- 6 For classrooms that include students identified as English learners, the California English Language Development (ELD) Standards (2012) should be used in tandem with the California Arts Standards.
- 7 UDL principles and guidelines, as well as practical suggestions for classroom teaching and learning, can be found at the National Center for UDL (<http://www.udlcenter.org/>) and in the California Arts Education Framework (<https://www.cde.ca.gov/ci/vp/cf/>).

California Arts Standards for Dance

The dance standards are designed to enable students to achieve dance literacy. To be literate in the artistic discipline of dance, students need to develop specific knowledge, skills, and values that allow for fluency and deep understanding. This means discovering the expressive elements of dance; knowing the dance-based theory, terminology, and symbolic language that is used to comprehend dance; having a clear sense of embodying dance; and being able to reflect, critique, and connect personal experience to dance and the dance community.

What Is Literacy in Dance?

The California Arts Standards are rooted in a creative approach to teaching and learning. The dance standards describe expectations for learning in dance regardless of style, genre, or culture. The dance standards require both the teacher and student to focus on big ideas and key concepts inherent to all dance forms. As the teaching and learning of dance continues, these ideas and concepts will continue to evolve with increasing rigor in instruction and will deepen understanding. The dance standards are the impetus for dance educators to inspire their students to explore and discover their personal connection to the deep human tradition of dance and prepare them for a lifelong immersion in the socio-cultural and political meanings and experiences of dance as well as the embodied learning and enjoyment that performing, studying, and viewing dance can bring.

“Dance is for everybody. I believe that the dance came from the people and that it should always be delivered back to the people.”

a. Identify and demonstrate directions for moving the body in general space (e.g., forward, backwards, sideways, up, down, and turning) and finding and returning to a place in space .	a. Make still and moving body shapes that show lines (e.g., straight, bent, and curved), change levels, and vary in size (large/small). Join with others to make a formation and work with others to change its dimension. Find and return to a place in space .	a. Demonstrate locomotor and nonlocomotor movements that change body shapes, levels, and facings. Move in straight, curved, and zig-zagged pathways individually and with others. Find and return to place in space .	a. Demonstrate clear directionality and intent when performing locomotor and nonlocomotor movements that change body shapes, facings, and pathways in space . Identify symmetrical and asymmetrical body shapes and examine relationships between body parts.	a. Judge spaces as distance traveled and use space three-dimensionally. Demonstrate shapes with positive and negative space . Perform movement sequences in and through space with intentionality and focus.	a. Make static and dynamic shapes with positive and negative space . Perform three-dimensional movement sequences alone and with others, establishing relationships with intentionality and focus.	a. Integrate static and dynamic shapes as well as floor and air pathways into dance sequences. Establish relationships with other dancers with intentionality and focus. Convert inward focus to outward focus.

b. Identify speed of movement as fast or slow. Move to varied rhythmic sounds at different tempi .	b. Demonstrate tempo contrasts with movements that match the tempo of the stimuli .	b. Relate quick, moderate and slow movements to duration in time. Recognize steady beat and move to varying tempi of steady beat.	b. Identify the length of time a movement or phrase takes (e.g., whether it is long or short). Identify and move on the downbeat in duple and triple meter. Correlate metric phrasing with movement phrasing.	b. Fulfill specified duration of time with improvised locomotor and nonlocomotor movements. Differentiate between “in time” and “out of time” to music. Perform movements that are the same or of a different time orientation to accompaniment. Use metric and kinesthetic phrasing.	b. Respond in movement to even and uneven rhythm in both metric and kinesthetic phrasings. Recognize and respond to tempo changes as they occur in dance and music.	b. Dance to a variety of rhythms generated from internal and external sources. Perform movement phrases that show the ability to respond to changes in time.
c. Move with opposing dynamics .	c. Identify and apply different dynamics to movements.	c. Demonstrate movement characteristics along with descriptive vocabulary (e.g., use adverbs and adjectives that apply to movement).	c. Select and apply appropriate characteristics to movements (e.g., selecting specific adverbs and adjectives and apply them to movements). Demonstrate kinesthetic awareness while dancing the movement characteristics .	c. Change use of energy and dynamics by modifying movements and applying specific characteristics to heighten the effect of their intent.	c. Analyze and refine phrases by incorporating a greater range of energy and dynamic changes to heighten the effect of their intent.	c. Contrast bound and free flowing movements . Dance Glossary

The dance terms defined in this section include only those terms that are blue text in the standards. The meaning of the terms is specific to their use in the standards and the artistic discipline. The definitions included here are not meant to be an exhaustive list or used as curriculum.

The following defined terms are commonly accepted definitions, most of which are provided by the National Coalition for Core Arts at <https://www.nationalartsstandards.org/content/glossary>.

aesthetic: A set of principles concerned with the nature and appreciation of beauty.

alignment: The process of positioning the skeletal and muscular system to support effective functionality.

alternative performance venue: A performance site other than a standard Western-style theater (for example, classroom, site-specific venue, or natural environment).

anatomical principles: The way the human body's skeletal, muscular, and vascular systems work separately and in coordination.

artistic criteria: Aspects of craft and skill used to fulfill artistic intent.

artistic expression: The manifestations of artistic intent through dance, drama, music, poetry, fiction, painting, sculpture, or other artistic media. In dance, this involves the dance and the dancers within a context.

artistic intent: The purpose, main idea, and expressive or communicative goals(s) of a dance composition, study, work, or performance.

artistic statement: An artist's verbal or written introduction of their work from their own perspective to convey the deeper meaning or purpose.

body patterning: Neuromuscular patterns (for example, core-distal, head-tail, homologous [upper-lower], homo-lateral [same-side], cross-lateral [crossing the body midline]).

body-use: The ways in which movement patterns and body parts are used in movement and dance practice; descriptive method of identifying patterns.

bound flow movement: An "effort element" from Laban Movement Analysis in which energy flow is constricted.

Capstone Project: A culminating performance-based assessment that determines what twelfth graders should know and be able to do in various educational disciplines; usually based on research and the development of a major product or project that is an extension of the research.

choreographic devices: Manipulation of dance movement, sequences, or phrases (e.g., repetition, inversion, accumulation, cannon, etc.).

codified movement: Common motion or motions set in a particular style that often have specific names and expectations associated with it.

context cues: Information obtained from the dance that helps one understand or comprehend meaning and intent from a movement, group of movements, or a dance as a whole; requires seeing relationships between movements and making inferences about the meaning or intent often gleaned from visual, auditory, or sensory stimuli.

contrapuntal: An adjective that describes the noun counterpoint; music that has at least two melodic lines (voices) played simultaneously against each other; in dance, at least two movement patterns, sequences, or phrases danced simultaneously using different body parts or performed by different dancers.

cultural movement practice: Physical movements of a dance that are associated with a particular country, community, or people.

dance literacy: The total experience of dance learning that includes the doing and knowing about dance: dance skills and techniques, dance making, knowledge and understanding of dance vocabulary, dance history, dance from different cultures, dance genres, repertory, performers and choreographers, dance companies, and dance notation and preservation.

dance movement principles: Fundamentals related to the craft and skill with which dance movement is performed (for example, the use of dynamic alignment, breath support, core support, rotation, initiation and sequencing, weight shift, etc.).

dance phrase: A brief sequence of related movements that have a sense of continuity and artistic or rhythmic completion.

dance structures: The organization of choreography and movement to fulfill the artistic intent of a dance or dance study (for example, AB, ABA or theme and variation); often referred to as choreographic form.

dance study: A short dance that is comprised of several dance phrases based on an artistic idea.

dance techniques: The tools and skills needed to produce a particular style of movement.

dance terminology: Vocabulary used to describe dance and dance experiences.

- **simple dance terminology** (Tier 1/PreK-2): basic pedestrian language (for example, locomotor words such as walk, run, march, slither; and nonlocomotor words such as bend, twist, turn, etc.).
- **basic dance terminology** (Tier 2/grades 3-5): vocabulary used to describe dance movement techniques, structures, works, and

experiences that are widely shared in the field of dance (for example, stage terminology, compositional vocabulary, language-defining dance structures and devices, anatomical references, etc.).

- **genre-specific dance terminology** (Tier 3/grades 6 and up): words used to describe movement within specific dance forms such as ballet, contemporary, culturally-specific dance, hip-hop, jazz, modern, tap, and others.

dance work: A complete dance that has a beginning, middle (development), and end.

dynamics: The qualities or characteristics of movement which lend expression and style; also called “efforts,” or “energy” (for example, lyrical, sustained, quick, light, or strong).

elements of dance: The key components of movement; movement of the body using space, time, and energy; often referred to as the elements of movement.

embody: To physicalize a movement, concept, or idea through the body.

energy: The dynamic quality, force, attack, weight, and flow of movement.

evaluative criteria: The definition of values and characteristics with which dance can be assessed; factors to be considered to attain an aesthetically satisfying dance composition or performance.

explore: Investigate multiple movement possibilities to learn more about an idea.

free flowing movement: An “effort element” from Laban Movement Analysis in which energy is continuous.

functional alignment: The organization of the skeleton and musculature in a relationship to gravity that supports safe and efficient movement while dancing.

general space: Spatial orientation that is not focused towards one area of a studio or stage.

genre: A category of dance characterized by similarities in form, style, purpose, or subject matter (for example, African, ballet, ballroom, hip hop, modern, Polynesian, etc.).

kinesthetic awareness: Pertaining to sensations and understanding of bodily movement.

locomotor: Movement that travels from one location to another or in a pathway through space (for example, in PreK, walk, run, tip-toe, slither, roll, crawl, jump, march, or gallop; in Kindergarten, the addition of prance, hop, skip, slide, or leap).

mind–body principles: Concepts explored and/or employed to support body–mind connections (for example, breath, awareness of the environment, grounding, movement initiation, use of imagery, intention, inner–outer, stability–mobility).

movement characteristics: The qualities, elements, or dynamics that describe or define a movement.

movement phrase: A brief sequence of related movements that have a sense of continuity and artistic or rhythmic completion.

movement problem: A specific focus that requires one find a solution and complete a task; gives direction and exploration in composition.

movement vocabulary: Codified or personal movement characteristics that define a movement style.

negative space: The area (space) around and between the dancer(s) or dance images(s) in a dance.

nonlocomotor: Movement that remains in place; movement that does not travel from one location to another or in a pathway through space for example, in PreK, bend, twist, turn, open, or close; in Kindergarten, swing, sway, spin, reach, or pull).

performance etiquette: Performance values and expected behaviors when rehearsing or performing (for instance, no talking while the dance is in progress, no chewing gum, neat and appropriate appearance, and dancers do not call out to audience members who are friends).

performance practices: Commonly accepted behaviors and practices when rehearsing and performing on stage (for example, production order is technical rehearsal, dress rehearsal, then performance; dancers warm up on stage and must leave when the stage manager tells them; or when “places” are called, dancers must be ready to enter the performing space).

personal space: The area of space directly surrounding one’s body extending as far as a person can reach; also called the kinesphere.

polyrhythmic: In music, several rhythms layered on top of one another and played simultaneously; in dance, embodying several rhythms simultaneously in different body parts.

production elements: Aspects of performance that produce theatrical effects (for example, costumes, makeup, sound, lighting, media, props, and scenery).

production terminology: Words commonly used to refer to the stage, performance setting, or theatrical aspects of dance presentation.

project: A confident presentation of one’s body and energy to communicate movement and meaning vividly to an audience.

rhythm: The patterning or structuring of time through movement or sound.

sound environment: Sound accompaniment for dancing other than music (for example, street noise, ocean surf, bird calls, or spoken word).

space: Components of dance involving direction, pathways, facings, levels, shapes, and design; the location where a dance takes place; or the element of dance referring to the cubic area of a room, on a stage, or in other environments.

spatial design: Pre-determined use of directions, levels, pathways, formations, and body shapes.

stimuli: A thing or event that inspires action, feeling, or thought.

style: Dance that has specific movement characteristics, qualities, or principles that give it distinctive identity (for example, Graham technique is a style of Modern Dance; rhythm tap is a style of Percussive Dance; Macedonian folk dance is a style of International Folk dance; and Congolese dance is a style of African Dance).

technical dance skills: The degree of physical proficiency a dancer achieves within a dance style or technique (for example, coordination, form, strength, speed, and range).

tempi: Different paces or speeds of music, or underlying beats or pulses, used in a dance work or composition (singular: tempo).

tempo: The pace or speed of a pulse or beat underlying music or movement (plural: tempi or tempos).

theme: A dance idea that is stated choreographically.

California Arts Standards for Media Arts

The media arts standards are designed to enable students to achieve media arts literacy. Media arts standards assume the diverse forms and categories of media arts as a distinct, stand-alone arts discipline, whose basic categories include the following areas: photography, imaging, sound, animation, video, web design, graphic design, virtual design, interactive design, as well as their combinations and emerging forms, such as multimedia and virtual design.

What Is Literacy in Media Arts?

The standards for media arts do not address the use of specific media, rather they provide benchmarks that educators can adapt to specific media. Technology is embedded, integrated, or used as a tool in the media arts, but the emphasis is on process, so that the standards will remain relevant even as technology evolves.

Literacy in media arts is broad, diverse, and addresses creative, conceptual, and technical competencies that exist globally. Media arts are the emerging basis for communications, design, and social interaction in our increasingly digitally centered world, and California's creative economy. Therefore, students should gain experience in production and design that has real-world relevance and applications that can include the following:

- **Multimedia Communication:** The ability to communicate and express in a variety of media forms or combined media, using various tools and processes, for specific purposes, intentions, and audiences.
- **Interdisciplinary Integration:** Media arts projects can incorporate multiple content areas and artistic disciplines, such as a video broadcast of student-produced documentaries, dramatic stories, and informational bulletins for the school campus.
- **Design Thinking:** A problem-based approach of producing iterations, prototypes, and models, which are repeatedly tested and revised and lead to a successful result.
- **Media and Digital Literacies:** Media arts students practice critical autonomy in discerning the quality and veracity of media. They are empowered in producing their own messages and products and in conscientious, civic-minded engagement in virtual environments.

“Media art can make the viewer an active participant. It can upend the roles of artist and spectator.”

—*Rudolf Frieling, Curator of Media Arts, San Francisco Museum of Modern Art*

Media arts classrooms come in many forms. They can be very active and dynamic, as well as quiet and focused. They will often use technology including a variety of emerging technologies, but in many classrooms, such as video production, animation, and game design, students will also be collaboratively engaged in brainstorming, writing, storyboarding or prototyping, and organizing their projects.

The enactment of standards can vary as well, depending on the specific form and the way projects are organized. The standards are presented in a linear, sequential format, but teachers should understand that they can access them in any order specific to their instructional approach. For example, lessons and units can easily begin by considering a given context (connecting), move next to analyzing examples of media arts (responding), then proceed to generating and refining (creating) a media artwork for presentation (producing). Also, the standards represent portions of the holistic creative process, and may be addressed in rapid-fire succession as one is creating work. Therefore, a brainstorming session that begins with creating the standard may also incorporate responding and even connecting standards. One well-structured project can address many, if not all, standards in a holistic, simultaneous manner.

Media Arts Glossary

The media arts terms defined in this section include only those terms that are blue text in the standards. The meaning of the terms is specific to their use in the standards and the artistic discipline. The definitions included here are not meant to be an exhaustive list or used as curriculum.

The following defined terms are commonly accepted definitions, most of which are provided by the National Coalition for Core Arts at <https://www.nationalartsstandards.org/content/glossary>.

aesthetic principles: Fundamental sensory qualities or organizational rules within the diversity of media arts production and appreciation.

attention: Principle of directing perception through sensory and conceptual impact.

balance: Principle of the equitable and/or dynamic distribution of items in a media arts composition or structure for aesthetic meaning, as in a visual frame, or within game architecture.

civic values: Valuing the rights and well-being of individuals, collectives and community through tolerance, appreciation, open-mindedness; having a sense of duty at local to global levels, and awareness of power and predisposal to take action to change things for the better.

components: The discrete portions and aspects of media artworks, including: elements, principles, processes, parts, assemblies, etc. (such as: light, sound, space, time, shot, clip, scene, sequence, movie, narrative, lighting, cinematography, interactivity, etc.).

composition: Principle of arrangement and balancing of components of a work for meaning and message.

concept modeling: Creating a digital or physical representation or sketch of an idea, usually for testing; prototyping.

constraints: Limitations on what is possible, both real and perceived.

context: The situation surrounding the creation or experience of media artworks that influences the work, artist, or audience. This can include how, where, and when media experiences take place, as well as additional internal and external factors (personal, societal, cultural, historical, physical, virtual, economic, systemic, etc.).

contrast: Principle of using the difference between items, such as elements, qualities, and components, to mutually complement them.

convention: An established, common, or predictable rule, method, or practice within media arts production, such as the notion of a ‘hero’ in storytelling.

copyright: The exclusive right to make copies, license, and otherwise exploit a produced work.

design thinking: A cognitive methodology that promotes innovative problem solving through the prototyping and testing process commonly used in design.

digital identity: How one is presented, perceived, and recorded online, including personal and collective information and sites, e-communications, commercial tracking, etc.

divergent thinking: Unique, original, uncommon, idiosyncratic ideas; thinking “outside of the box.”

emphasis: Principle of giving greater compositional strength to a particular element or component in a media artwork.

ethics: Moral guidelines and philosophical principles for determining appropriate behavior within media arts environments.

exaggeration: Principle of pushing a media arts element or component into an extreme for provocation, attention, contrast, as seen in character, voice, mood, message, etc.

experiential design: Area of media arts wherein interactive, immersive spaces and activities are created for the user; associated with entertainment design.

fairness: Complying with appropriate, ethical, and equitable rules and guidelines.

fair use: Permits limited use of copyrighted material without acquiring permission from the rights holders, including commentary, search engines, criticism, etc.

force: Principle of energy or amplitude within an element, such as the speed and impact of a character's motion.

generative methods: Various inventive techniques for creating new ideas and models, such as brainstorming, play, open exploration, prototyping, experimentation, inverting assumptions, rule-bending, etc.

hybridization: Principle of combining two existing media forms to create new and original forms, such as merging theatre and multimedia.

interactivity: A diverse range of articulating capabilities between media arts components, such as user, audience, sensory elements, etc., that allow for inputs and outputs of responsive connectivity via sensors, triggers, interfaces, etc., and may be used to obtain data, commands, or information and may relay immediate feedback, or other communications; contains unique sets of aesthetic principles.

juxtaposition: Placing greatly contrasting items together for effect.

legal: The legislated parameters and protocols of media arts systems, including user agreements, publicity releases, copyright, etc.

manage audience experience: The act of designing and forming user sensory episodes through multi-sensory captivation, such as using sequences of moving image and sound to maintain and carry the viewer's attention, or constructing thematic spaces in virtual or experiential design.

markets: The various commercial and informational channels and forums for media artworks, such as television, radio, internet, fine arts, nonprofit, communications, etc.

meaning: The formulation of significance and purposefulness in media artworks.

media environments: Spaces, contexts, and situations where media artworks are produced and experienced, such as in theaters, production studios, and online.

media literacy: A series of communication competencies, including the ability to access, analyze, evaluate, and communicate information in a variety of forms, including print and nonprint messages (National Association for Media Literacy Education n.d.).

media messages: The various artistic, emotional, expressive, prosaic, commercial, utilitarian, and informational communications of media artworks.

movement: Principle of motion of diverse items within media artworks.

multimodal perception: The coordinated and synchronized integration of multiple sensory systems (vision, touch, auditory, etc.) in media artworks.

multimedia theatre: The combination of live theatre elements and digital media (sound, projections, video, etc.) into a unified production for a live audience.

narrative structure: The framework for a story, usually consisting of an arc of beginning, conflict, and resolution.

personal aesthetic: An individually formed, idiosyncratic style or manner of expressing oneself; an artist's "voice."

perspective: Principle pertaining to the method of three-dimensional rendering, point-of-view, and angle of composition.

point of view: The position from which something or someone is observed; the position of the narrator in relation to the story, as indicated by the narrator's outlook from which the events are depicted and by the attitude toward the characters.

positioning: The principle of placement or arrangement.

presentation: A diverse range of activities of exhibiting media artworks, which can include sharing, distributing, installing, publishing, broadcasting, posting, showing, performing, etc.

production processes: The diverse processes, procedures, or steps used to carry out the construction of a media artwork, such as prototyping, playtesting, and architecture construction in game design.

prototyping: Creating a testable version, sketch, or model of a media artwork, such as a game, character, website, application, etc.

resisting closure: Delaying completion of an idea, process, or production, or persistently extending the process of refinement, towards greater creative solutions or technical perfection.

responsive use of failure: Incorporating errors towards persistent improvement of an idea, technique, process, or product.

rules: The laws or guidelines for appropriate behavior; protocols.

safety: Maintaining proper behavior for the welfare of self and others in handling equipment and interacting with media arts environments and groups.

soft skills: Diverse organizational and management skills useful to employment, such as collaboration, planning, adaptability, communication, etc.

stylistic convention: A common, familiar, or even "formulaic" presentation form, style, technique, or construct, such as the use of tension-building techniques in a suspense film, for example.

systemic communications: Socially or technologically organized and higher-order media arts communications such as networked multimedia, television formats and broadcasts, "viral" videos, social multimedia (e.g., "vine" videos), remixes, transmedia, etc.

systems: The complex and diverse technological structures and contexts for media arts production, funding, distribution, viewing, and archiving.

technological: The mechanical aspects and contexts of media arts production, including hardware, software, networks, code, etc.

tone: Principle of "color" "texture" or "feel" of a media arts element or component, as for sound, lighting, mood, sequence, etc.

transdisciplinary production: Accessing multiple disciplines during the conception and production processes of media creation, and using new connections or ideas that emerge to inform the work.

transmedia production: Communicating a narrative and/or theme over multiple media platforms, while adapting the style and structure of each story component to the unique qualities of the platforms.

virtual channels: Network-based presentation platforms such as YouTube, Vimeo, DeviantArt, etc.

virtual worlds: Online, digital, or synthetic environments (e.g., Minecraft, Second Life).

vocational: The workforce aspects and contexts of media arts.

California Arts Standards for Music

The music standards are designed to enable students to achieve music literacy. Unlike the other arts disciplines, there are five sets of performance standards for music:

- PK–8
- Harmonizing Instruments
- Ensembles
- Composition and Theory
- Technology

What Is Literacy in Music?

Developing music literacy means discovering the expressive elements of music, understanding the basic concepts of music, knowing the terminology that is used to comprehend music, developing the skills necessary to produce music, and being able to reflect, critique, and connect personal experience to music.

The standards describe expectations for learning in music regardless of style or genre. The standards impart the breadth and depth of the music experience through art-making processes. The standards can and should be the impetus for music educators to inspire their students to explore the many facets of music and prepare them for a lifelong relationship with music.

“The fact that children can make beautiful music is less significant than the fact that music can make beautiful children.”

—**Cheryl Lavender**, *composer and music educator*

As in the other artistic disciplines, the four artistic processes are addressed linearly in the written music standards but are envisioned to occur simultaneously in the actual practice of music. From the first day, the music student gives voice to an instrument and makes music come alive, often from a written score, by singing, listening, playing, moving, reading, and/or composing music individually or together with peers (creating). The music lesson works toward a synthesis—when everything they have been working on is brought together (performing). The students analyze and evaluate what they have done (responding), and finally attach meaning not only to a musical concept, but to the experience as it relates to other contexts (connecting). As a result, aspects of multiple standards can be combined within a learning activity: students can learn a skill, apply it to a piece of music, make musical decisions, try and think critically about their ideas, and relate them to other experiences, contexts, and meanings.

Performing—Anchor Standard 5: Develop and Refine Artistic Techniques and Work for Presentation

PROCESS COMPONENT

Rehearse, Evaluate, and Refine

ENDURING UNDERSTANDING

To express their musical ideas, musicians analyze, evaluate, and refine their performance over time through openness to new ideas, persistence, and the application of appropriate criteria.

ESSENTIAL QUESTION

How do musicians improve the quality of their performance?

Prof.MU:C.Pr5	Acc.MU:C.Pr5	Adv.MU:C.Pr5
a. Create rehearsal plans for works, identifying repetition and variation within the form .	a. Identify, compare, and implement strategies for improving the technical and expressive aspects of multiple contrasting works.

Performing—Anchor Standard 6: Convey Meaning Through the Presentation of Artistic Work

PROCESS COMPONENT

Present

ENDURING UNDERSTANDING

Musicians judge performance based on criteria that vary across time, place, and cultures. The context and how a work is presented influence audience response.

ESSENTIAL QUESTIONS

- When is a performance judged ready to present?
- How do context and the manner in which musical work is presented influence audience response?

Prof.MU:C.Pr6	Acc.MU:C.Pr6	Adv.MU:C.Pr6
a. Share live or recorded performances of works (both personal and others’) and explain how the elements of music are used to convey intent .	a. Creating—Anchor Standard 2: Organize and Develop Artistic Ideas and Work

PROCESS COMPONENT

Plan and Make

ENDURING UNDERSTANDING

Musicians' creative choices are influenced by their expertise, context, and expressive intent.

ESSENTIAL QUESTION

How do musicians make creative decisions?

Prof.MU:T.Cr2	Acc.MU:T.Cr2	Adv.MU:T.Cr2
Select melodic, rhythmic, and harmonic ideas to develop into a larger work using digital tools and digital resources.	Select melodic, rhythmic, and harmonic ideas to develop into a larger work that exhibits unity and variety using digital and analog tools.	Select, develop, and organize multiple melodic, rhythmic, and harmonic ideas to develop into a larger work that exhibits unity, variety, complexity, and coherence using digital and analog tools, resources, and systems.

Creating—Anchor Standard 3: Refine and Complete Artistic Work

PROCESS COMPONENT

Evaluate and Refine

3.1 ENDURING UNDERSTANDING

Musicians evaluate, and refine their work through openness to new ideas, persistence, and the application of appropriate criteria.

ESSENTIAL QUESTION

How do musicians improve the quality of their creative work?

Prof.MU:T.Cr3.1	Acc.MU:T.Cr3.1	Adv.MU:T.Cr3.1
Drawing on feedback from teachers and peers, develop and implement strategies to improve and refine the technical and expressive aspects of draft compositions and improvisations . Develop and implement varied strategies and apply appropriate criteria to improve and refine the technical and expressive aspects of draft compositions and improvisations .

PROCESS COMPONENT

Present

3.2 ENDURING UNDERSTANDING

Musicians' presentation of creative work is the culmination of a process of creation and communication.

ESSENTIAL QUESTION

When is creative work ready to share?

Prof.MU:T.Cr3.2	Acc.MU:T.Cr3.2	Adv.MU:T.Cr3.2
Share compositions or improvisations that demonstrate musical and technological craftsmanship , using teacher-provided digital tools and resources in developing and organizing musical ideas .	Share compositions and improvisations that demonstrate musical and technological craftsmanship , using teacher-provided or personally selected digital and analog tools and resources in developing and organizing musical ideas .	Share a portfolio of musical creations representing varied styles and genres that demonstrates musical and technological craftsmanship , using personally selected digital and analog tools , resources , and systems in developing and organizing musical ideas .

Performing—Anchor Standard 4: Select, Analyze, and Interpret Artistic Work for Presentation

PROCESS COMPONENT

Select

4.1 ENDURING UNDERSTANDING

Performers' interest in and knowledge of musical works, understanding of their own technical skill, and the context for a performance influence the selection of repertoire.

ESSENTIAL QUESTION

How do performers select repertoire?

Prof.MU:T.Pr4.1	Acc.MU:T.Pr4.1	Adv.MU:T.Pr4.1
Develop and explain the criteria used for selecting a varied repertoire of music based on interest, music reading skills, and an understanding of the performer's technical and technological skill.	Develop and apply criteria to select a varied repertoire to study and perform based on interest, an understanding of theoretical and structural characteristics of the music, and the performer's technical skill using digital tools and resources .	Develop and apply criteria to select varied programs to study and perform based on interest, an understanding of the theoretical and structural characteristics, as well as expressive challenges in the music, and the performer's technical skill using digital tools, resources, and systems .

PROCESS COMPONENT

Analyze

4.2 ENDURING UNDERSTANDING

Analyzing creators' context and how they manipulate elements of music provides insight into their intent and informs performance.

ESSENTIAL QUESTION

How does understanding the structure and context of musical works inform performance?

Prof.MU:T.Pr4.2	Acc.MU:T.Pr4.2	Adv.MU:T.Pr4.2
Describe how context , structural aspects of the music, and digital media/ tools inform prepared and improvised performances .	Explain and demonstrate how context , theoretical and structural aspects of the music, and digital media/ tools inform and influence prepared and improvised performances .	Examine, evaluate, and critique how context , theoretical and structural aspects of the music, and digital media/ tools inform and influence prepared and improvised performances .

PROCESS COMPONENT

Interpret

4.3 ENDURING UNDERSTANDING

Performers make interpretive decisions based on their understanding of context and expressive intent.

ESSENTIAL QUESTION

How do performers interpret musical works?

Prof.MU:T.Pr4.3	Acc.MU:T.Pr4.3	Adv.MU:T.Pr4.3
Demonstrate how understanding the context , expressive challenges, and use of digital tools in a varied repertoire of music influence prepared or improvised performances .	Demonstrate how understanding the style , genre , context , and use of digital tools and resources in a varied repertoire of music influences prepared or improvised performances and performers' ability to connect with audiences. Music Glossary

The music terms defined in this section include only those terms that are blue text in the standards. The definitions explain the context or point of view, from the perspective of the artistic discipline, regarding the use of terms within the standards. The definitions included here are not meant to be an exhaustive list or used as curriculum.

The following defined terms are commonly accepted definitions provided by the National Coalition for Core Arts: <https://www.nationalartsstandards.org/content/glossary>.

AB: Musical form consisting of two sections, A and B, which contrast with each other (binary form).

ABA: Musical form consisting of three sections, A, B, and A; two are the same, and the middle one is different (ternary form).

analog tools: Category of musical instruments and tools that are non-digital (i.e., do not transfer sound in or convert sound into binary code), such as acoustic instruments, microphones, monitors, and speakers.

analysis: (See [analyze](#))

analyze: Examine in detail the structure and context of the music.

arrangement: Setting or adaptation of an existing musical composition.

articulation: Characteristic way in which musical tones are connected, separated, or accented; types of articulation include legato (smooth, connected tones) and staccato (short, detached tones).

audience etiquette: Social behavior observed by those attending musical performances and which can vary depending upon the type of music performed.

beat: Underlying steady pulse present in most music.

chord progression: Series of chords sounding in succession; certain progressions are typical in particular styles/genres of music.

collaboratively: Working together on a common (musical) task or goal.

collaboratively developed criteria: Qualities or traits for assessing achievement level that have been through a process of collective decision making.

complex formal structure: Musical form in which rhythmic, melodic, harmonic, and/or other musical materials undergo significant expansion and development, and may be more distantly related across sections while remaining coherent in some way, such as sonata or other novel design with three or more sections.

composer: One who creates music compositions.

composition: Original piece of music that can be repeated, typically developed over time, and preserved either in notation or in a sound recording.

compositional devices: Tools used by a composer or arranger to create or organize a composition or arrangement, such as tonality, sequence, repetition, instrumentation, orchestration, harmonic/melodic structure, style, and form.

compositional procedures: Techniques that a composer initiates and continues in pieces to develop musical ideas, such as fragmentation, imitation, sequencing, variation, aggregate completion, registral saturation, contour inversion of gestures, and rhythmic phrasing.

compositional techniques: Approaches a composer uses to manipulate and refine the elements to convey meaning and intent in a composition, such as tension-release, augmentation-diminution, sound-silence, motion-stasis, in addition to compositional devices.

connection: Relationship among artistic ideas, personal meaning, and/or external context.

context: Environment that surrounds music, influences understanding, provides meaning, and connects to an event or occurrence.

- **context, cultural:** Values, beliefs, and traditions of a group of people that influence musical meaning and inform culturally authentic musical practice.
- **context, historical:** Conditions of the time and place in which music was created or performed that provide meaning and influence the musical experience.
- **context, personal:** Unique experiences and relationships that surround a single person and are influenced by personal life, family, habits, interest, and preferences.
- **context, societal:** Surrounding something or someone’s creation or intended audience that reflects and influences how people use and interpret the musical experience.

craftsmanship: Degree of skill and ability exhibited by a creator or performer to manipulate the elements of music in a composition or performance.

creator: One who originates a music composition, arrangement, or improvisation.

criteria: Guidelines used to judge the quality of a student’s performance (See [rubric](#)).

culturally authentic performance: Presentation that reflects practices and interpretation representative of the style and traditions of a culture.

culture: Values and beliefs of a particular group of people, from a specific place or time, expressed through characteristics such as tradition, social structure, religion, art, and food.

cyclical structure: Musical form characterized by the return or “cycling around” of significantly recognizable themes, motives, and/or patterns across movements.

demonstrate: Show musical understanding through observable behavior such as moving, chanting, singing, or playing instruments.

digital resources: Anything published in a format capable of being read by a computer, a web-enabled device, a digital tablet, or smartphone.

digital systems: Platforms that allow interaction and the conversion between and through the audio and digital domains.

digital tools: Category of musical instruments and tools that manipulate sound using binary code, such as electronic keyboards, digital audio interfaces, MIDI, and computer software.

dynamics: Level or range of loudness of a sound or sounds.

elements of music: Basic characteristics of sound (pitch, rhythm, harmony, dynamics, timbre, texture, form, and style/articulation) that are manipulated to create music.

ensemble: Group of individuals organized to perform artistic work: traditional, large groups such as bands, orchestras, and choirs; chamber, smaller groups, such as duets, trios, and quartets; emerging, such as guitar, iPad, mariachi, steel drum or pan, and Taiko drumming.

established criteria: Traits or dimensions for making quality judgments in music of a particular style, genre, cultural context, or historical period that have gained general acceptance and application over time.

expanded form: Basic form (such as AB, ABA, rondo, or theme and variation) expanded by the addition of an introduction, transition, and/or coda.

explore: Discover, investigate, and create musical ideas through singing, chanting, playing instruments, or moving to music.

expression: Feeling conveyed through music.

expressive aspects: Characteristics that convey feeling in the presentation of musical ideas.

expressive intent: The emotions, thoughts, and ideas that a performer or composer seeks to convey by manipulating the elements of music.

expressive qualities: Qualities such as dynamics, tempo, articulation which—when combined with other elements of music—give a composition its musical identity.

form: Element of music describing the overall organization of a piece of music, such as AB, ABA, rondo, theme and variations, and strophic form.

formal design: Large-scale framework for a piece of music in which the constituent parts cohere into a meaningful whole; encompasses both structural and tonal aspects of the piece.

function: Use for which music is created, performed, or experienced, such as dance, social, recreation, music therapy, video games, and advertising.

fundamentals of music theory: Basic elements of music, their subsets, and how they interact: rhythm and meter; pitch and clefs; intervals; scales, keys and key signatures; triads, and seventh chords.

genre: Category of music characterized by a distinctive style, form, and/or content, such as jazz, march, and country.

guidance: Assistance provided temporarily to enable a student to perform a musical task that would be difficult to perform unaided, best implemented in a manner that helps develop that student’s capacity to eventually perform the task independently.

harmonic sequences: Series of two or more chords commonly used to support melody(ies).

harmonization: Process of applying stylistically appropriate harmony, such as chords, countermelodies, and ostinato, to melodic material.

harmonizing instruments: Musical instruments, such as guitars, ukuleles, and keyboards, capable of producing harmonies as well as melodies, often used to provide chordal accompaniments for melodies and songs.

harmony: Chordal structure of a music composition in which the simultaneous sounding of pitches produces chords and their successive use produces chord progressions.

historical periods: Period of years during which music that was created and/or performed shared common characteristics; historians of Western art music typically refer to the following: Medieval (ca. 500–ca. 1420), Renaissance (ca. 1420–ca. 1600), Baroque (ca. 1600–ca. 1750), Classic (ca. 1750–ca. 1820), Romantic (ca. 1820–ca. 1900), and Contemporary (ca. 1900–to present).

iconic notation: Representation of sound and its treatment using lines, drawings, and pictures.

improvisation: Music created and performed spontaneously or “in-the-moment,” often within a framework determined by the musical style.

independently: Working with virtually no assistance, initiating appropriate requests for consultation, performing in a self-directed ensemble offering ideas/solutions that make such consulting collaborative rather than teacher-directed.

intent: Meaning or feeling of the music planned and conveyed by a creator or performer.

interpretation: Intent and meaning that a performer realizes in studying and performing a piece of music.

melodic contour: Shape of a melody created by the way its pitches repeat and move up and down in steps and skips.

melodic pattern: Grouping, generally brief, of tones or pitches.

melody: Linear succession of sounds (pitches) and silences moving through time; the horizontal structure of music.

meter: Grouping of beats and divisions of beats in music, often in sets of twos (duple meter) or threes (triple meter).

mood: Overall feeling that a section or piece of music conveys.

motive (motif): Brief rhythmic/melodic figure or pattern that recurs throughout a composition as a unifying element.

movement: Act of moving in non-locomotor (such as clapping and finger snapping) and locomotor (such as walking and running) patterns to represent and interpret musical sounds.

music concepts: Understandings or generalized ideas about music that are formed after learners make connections and determine relationships among ideas.

music theory: Study of how music is composed and performed; analysis of the elements of music and the framework for understanding musical works.

musical idea: Idea expressed in music, which can range in length from the smallest meaningful level (motive or short pattern) through a phrase, a section, or an entire piece.

musical work: Piece of music preserved as a notated copy or sound recording or passed through oral tradition.

notation: Visual representation of musical sounds.

perform: Process of realizing artistic ideas and work through interpretation and presentation.

performance decorum: Aspects of contextually appropriate propriety and proper behavior, conduct, and appearance for a musical performance, such as stage presence, etiquette, and appropriate attire.

personally developed criteria: Qualities or traits for assessing achievement level developed by students individually.

phrase: Musical segment with a clear beginning and ending, comparable to a simple sentence or clause in written text.

phrasing: Performance of a musical phrase that uses expressive qualities such as dynamics, tempo, articulation, and timbre to convey a thought, mood, or feeling.

piece: General, non-technical term referring to a composition or musical work.

pitch: Identification of a tone or note with respect to highness or lowness (i.e., frequency).

present: Share artistic work (e.g., a composition) with others.

program: Presentation of a sequence of musical works that can be performed by individual musicians or groups in a concert, recital, or other setting.

purpose: Reason for which music is created, such as ceremonial, recreational/social, commercial, or generalized artistic expression.

refine: Make changes in musical works or performances to more effectively realize intent through technical quality or expression.

repertoire: Body or set of musical works that can be performed.

respond: Understand and evaluate how the arts convey meaning.

rhythm: Duration or length of sounds and silences that occur in music; organization of sounds and silences in time.

rhythmic passage: Short section or series of notes within a larger work that constitutes a single coherent rhythmic idea.

rhythmic pattern: Grouping, generally brief, of long and short sounds and silences.

rondo: Musical form consisting of three or more contrasting sections in which one section recurs, such as ABACA.

rubric: Established, ordered set of criteria for judging student performance; includes descriptors of student work at various levels of achievement.

score: Written notation of an entire music composition.

section: One of a number of distinct segments that together comprise a composition; a section consists of several phrases.

select: Choose music for performing, rehearsing, or responding based on interest, knowledge, ability, and context.

sensitivity: Skill of a creator, performer, or listener in responding to and conveying the nuances of sound or expression.

setting: Specified or implied instrumentation, voicing, or orchestration of a musical work.

setting of the text: Musical treatment of text as presented in the music.

share: Present artistic work (e.g., a composition) to others.

sonic events: Individual sounds (or sound masses) and silences whose succession forms patterns and contrasting units that are perceived as musical.

sonic experience: Perception and understanding of the sounds and silences of a musical work and their interrelationship.

standard notation: System for visually representing musical sound that is in widespread use; such systems include traditional music staff notation, tablature notation (primarily for fretted stringed instruments), and lead-sheet notation.

storyline: Extra-musical narrative that inspires or explains the structure of a piece of music.

structural: (See [structure](#)).

structure: Totality of a musical work.

style: Label for a type of music possessing distinguishing characteristics and often performance practices associated with its historical period, cultural context, and/or genre.

stylistic expression: Interpretation of expressive qualities in a manner that is authentic and appropriate to the genre, historical period, and cultural context of origin.

teacher-provided criteria: Qualities or traits for assessing achievement level that are provided to students by the teacher.

technical accuracy, technical skill: Ability to perform with appropriate timbre, intonation, and diction as well as to play or sing the correct pitches and rhythms at a tempo appropriate to the musical work.

technical challenges: Requirements of a particular piece of music that stretch or exceed a performer's current level of proficiency in technical areas such as timbre, intonation, diction, range, or speed of execution.

tempo: Rate or speed of the beat in a musical work or performance.

tension and release: Musical device (musical stress, instability, or intensity, followed by musical relaxation, stability, or resolution) used to create a flow of feeling.

ternary form: (See [ABA](#)).

tonality: Tonic or key tone around which a piece of music is centered, such as major or minor.

unity: Presence of structural coherence within a work, generally achieved through the repetition of various elements of music (See [variety](#)).

variety: Presence of structural contrast within a work for the purpose of creating and sustaining interest, generally achieved through utilizing variations in the treatment of the elements of music (See [unity](#)).

venue: Physical setting in which a musical event takes place.

California Arts Standards for Theatre

The theatre standards are designed to enable students to achieve literacy in theatre. These grade-by-grade standards articulate the most fundamental elements of theatre, delineating a path by which every student can and will achieve proficiency or beyond in this ancient and honorable craft.

What Is Literacy in Theatre?

Developing literacy in theatre means discovering the expressive elements of theatre, knowing the terminology that is used to comprehend theatre, having a clear sense of what theatre embodies, and being able to reflect, critique, and connect personal experience to theatre.

The theatre standards are written with both drama processes and theatre production in mind. While many secondary theatre programs focus on performance and design in staged productions as evidence of a student's understanding and achievement in the art, ongoing student engagement in theatre without an end product is a valid expression of theatre understanding. These standards address those drama processes as well as traditional theatre. **Drama** processes encompass envisioned worlds and unscripted activities designed to engage students in a wide range of real and imagined issues; **theatre** includes the broader and more traditional conventions of the craft developed over the centuries—scripted plays, acting, public performance, and technical theatre elements.

To address both process and product in theatre, the third grade through high school standards of Proficient, Advanced, and Accomplished often include the term “drama/theatre” to clarify the distinct yet companion parts of theatre education. The pre-K through second grade standards, acknowledging the early childhood need for supervision and unfettered play, use the phrases “dramatic play” or a “guided drama experience.”

“I regard the theatre as the greatest of all art forms, the most immediate way in which a human being can share with another the sense of what it is to be a human being.”

—**Thornton Wilder (1897–1975)**,
Pulitzer Prize winning American playwright and novelist

The four artistic processes addressed separately in the theatre standards (creating, performing, responding, and connecting) are envisioned to occur simultaneously in the actual practice of theatre. The theatre student makes a character, scene, or story—real or imagined—come alive (creating), shares it with others (performing), analyzes and evaluates the product (responding), and connects the experience to all other contexts of meaning or knowledge (connecting). As a result, aspects of multiple standards can be combined within a learning activity: students can learn a skill, apply it to a scene, make creative decisions while in rehearsal, think critically about their ideas, and relate their ideas to other experiences, contexts, and meanings.

Theatre Glossary

The theatre terms defined in this section include only those terms that are blue text in the standards. The meaning of the terms is specific to their use in the standards and the artistic discipline. The definitions included here are not meant to be an exhaustive list or used as curriculum.

The following defined terms are commonly accepted definitions, most of which are provided by the National Coalition for Core Arts at <https://www.nationalartsstandards.org/content/glossary>.

acting techniques: Specific skills, pedagogies, theories, or methods of investigation used by an actor to prepare for a theatre performance.

character traits: Observable embodied actions that illustrate a character's personality, physicality, values, beliefs, and history.

conflict: The problem, confrontation, or struggle in a scene or play; conflict may include a character against him or herself, a character in opposition to another character, a character against nature, a character against society, or a character against the supernatural.

creative processes: The application of performance, production, and technical theatre elements (see the definition) to a theatrical production.

cultural context: The characteristics of everyday existence shared by people in a place or time, including: behaviors, ideas and beliefs, race, religion, social group, geography, identity, sexual orientation, ability, socio-economic status, and language.

devised drama: Creation of an original performance piece by an ensemble.

dramatic play: Play where children assign and accept roles, then act them out.

genre: Relating to a specific kind or type of drama and theatre such as a tragedy, drama, melodrama, comedy, or farce.

gesture: An expressive and planned movement of the body or limbs.

given circumstances: The total set of environmental and situational conditions which influence the actions that a character undertakes.

guided drama experience: A leader guides participants during a process drama, story drama, or creative drama experience (see the definitions) through side-coaching, narration, and prompting; the action of the drama does not stop in order for the leader to support the students; facilitator may guide participants in or out of role.

improvise: The spontaneous, intuitive, and immediate response of movement and speech; a distinction can be made between spontaneous improvisation, which is immediate and unrehearsed, and prepared improvisation, which is shaped and rehearsed.

motivation: Reasons why a character behaves or reacts in a particular way in a scene or play.

non-representational materials: Objects which can be transformed into specific props through the imagination.

objective: A goal or particular need or want that a character has within a scene or play.

plot: A narrative as revealed through the action and/or dialogue; traditionally, a plot has the elements of exposition, inciting incident, conflict, rising action, climax, and resolution or falling action.

script analysis: The study of a script to understand the underlying structure and themes of the play's story, and the motives and objectives of its characters.

scripted drama: A piece of writing for the theatre that includes a description of the setting, a list of the characters, the dialogue, and the action of the characters.

staging: The arrangement of actors and scenery on a stage for a theatrical production, sometimes known as *mise-en-scène*.

story elements: Characters, setting, dialogue, and plot that create a story.

style: The use of a specific set of characteristics or distinctive techniques such as realism, expressionism, epic theatre, documentary theatre, or classical drama; style may also refer to the unique artistic choices of a particular playwright, director, or actor.

tactic: The means by which a character seeks to achieve their objective; the selection of tactics is based on the obstacle presented. In acting and directing, a tactic refers to a specific action verb.

technical theatre elements: The elements of spectacle used to create a unified and meaningful design for a theatrical production, such as sets, sound, costumes/make-up, lighting, music, props, and multimedia, as well as elements specific to the production, e.g., puppets, masks, special effects, or other story-telling devices/concepts.

theatrical conventions: Practices and/or devices that the audience and actors accept in the world of the play even when it is not realistic, such as a narrator, flashback, or an aside.

theme: The aspect of the human condition under investigation in the drama; it can be drawn from unifying topics or questions across content areas.

California Arts Standards for Visual Arts

The visual arts standards are designed to enable students to achieve visual arts literacy and develop technical artistic skills. Visual arts include the traditional fine arts such as drawing, painting, ceramics, metals, printmaking, fiber arts, photography, sculpture, works in wood, and mixed media; architectural, environmental, and industrial arts, such as urban interior, product, and landscape design; and folk art, which was historically defined by “originating from, or traditional to the common people of a country” (Collins English Dictionary 2019). Today both formally and nonformally trained artists work in folk art media celebrating rich cultural traditions.

What Is Literacy in Visual Arts?

In the visual arts, developing literacy occurs as a result of engaging in an authentic creative process through the use of traditional and nontraditional materials and applying the formal elements of art and principles of design; knowing an arts language to describe art; and discovering the expressive qualities of art to be able to reflect, critique, and connect personal experience to art.

The visual arts standards describe expectations for learning in the visual arts regardless of style or genre. The standards impart the breadth and depth of the visual art experience through the art-making process. The standards serve as an impetus for arts educators and administrators to inspire, support, and develop their students in the many facets of visual arts so they are prepared for a lifelong appreciation, understanding, engagement and, if pursued, additional study towards a career in visual arts.

“Every child is
an artist. The
problem is how to
remain an artist
once we grow up.”

—**Pablo Picasso (1881–1973)**,
*Spanish painter, sculptor,
printmaker, ceramicist, stage
designer, and playwright*

Like the other disciplines, the four artistic processes of visual arts (creating, presenting, responding, and connecting) are addressed linearly in written standards, but are envisioned to occur simultaneously for students in the actual practice of visual art. The concepts embedded in the standards reflect the scope of learning—the knowledge, skills, and understandings—taught through study of the visual arts. An artist imagines, executes, reflects, and refines work before finally completing a piece of work (creating), shares or displays the work (presenting), reflects on the completed work (responding), and connects the experience to other contexts of meaning or knowledge (connecting). Students engaging in the artistic process learn by solving problems, exhibiting their work, and thinking critically about it; then, they continue the process by relating other ideas, contexts, and meanings to their own as they refine their future work to a more sophisticated level.

- What is an art museum?
- How does the presenting and sharing of objects, artifacts, and artworks influence and shape ideas, beliefs, and experiences?
- How do objects, artifacts, and artworks that are collected, preserved, or presented, cultivate appreciation and understanding?

PK.VA:Pr6	K.VA:Pr6	1.VA:Pr6	2.VA:Pr6	3.VA:Pr6	4.VA:Pr6	5.VA:Pr6
Identify where art is displayed, both inside and outside of school.	Explain what an art museum is and distinguish how an art museum is different from other buildings.	Identify the roles and responsibilities of people who work in and visit museums and other art venues .	Analyze how art exhibited inside and outside of schools (such as in museums, galleries, virtual spaces, and other venues) contributes to communities.	Investigate and explain how and where different cultures record and illustrate stories and history of life through art .	Compare and contrast purposes of art museums, art galleries, and other venues , as well as the types of personal experiences they provide.	Cite evidence about how an exhibition in a museum or other venue presents ideas and provides information about a specific concept or topic.

6.VA:Pr6	7.VA:Pr6	8.VA:Pr6	Prof.VA:Pr6	Acc.VA:Pr6	Adv.VA:Pr6
Assess, explain, and provide evidence of how museums or other venues reflect history and values of a community and/or culture.	Compare and contrast viewing and experiencing collections and exhibitions in different venues (physical and/or virtual).	Analyze why and how an exhibition or collection may influence ideas, beliefs, and experiences.	Analyze and describe the impact that an exhibition or collection has on personal awareness of social, cultural, or political beliefs and understandings.	Make, explain, and justify connections between artists or artwork and social, cultural, and political history.	Curate a collection of objects, artifacts, or artwork to impact the viewer's understanding of social, cultural, and/or political experiences.

7.1 ENDURING UNDERSTANDING

Individual aesthetic and empathetic awareness developed through engagement with art can lead to understanding and appreciation of self, others, the natural world, and constructed environments.

ESSENTIAL QUESTIONS

- How do life experiences influence the way you relate to art?
- How does learning about art impact how we perceive the world?
- What can we learn from our responses to art?

PK.VA:Re7.1	K.VA:Re7.1	1.VA:Re7.1	2.VA:Re7.1	3.VA:Re7.1	4.VA:Re7.1	5.VA:Re7.1
Recognize art in one's environment.	Identify uses of art within one's personal environment.	Select and describe works of art that illustrate daily life experiences of one's self and others.	Perceive and describe aesthetic characteristics of one's natural world and constructed environments .	Speculate about processes an artist uses to create a work of art .	Compare responses to a work of art before and after working in similar media .	Compare one's own interpretation of a work of art with the interpretation of others.

7.2 ENDURING UNDERSTANDING

Visual imagery influences understanding of and responses to the world.

ESSENTIAL QUESTIONS

- What is an image?
- Where and how do we encounter images in our world?
- How do images influence our views of the world?

PK.VA:Re7.2	K.VA:Re7.2	1.VA:Re7.2	2.VA:Re7.2	3.VA:Re7.2	4.VA:Re7.2	5.VA:Re7.2
Distinguish between images and real objects.	Describe what an image represents.	Compare images that represent the same subject.	Categorize images based on expressive properties .	Determine messages communicated by an image .	Analyze components in visual imagery that convey messages.	Identify and analyze cultural associations suggested by visual imagery .

6.VA:Re7.2	7.VA:Re7.2	8.VA:Re7.2	Prof.VA:Re7.2	Acc.VA:Re7.2	Adv.VA:Re7.2
Analyze ways that visual components and cultural associations suggested by images influence ideas, emotions, and actions.	Analyze multiple ways that images influence specific audiences.	Compare and contrast contexts and media in which viewers encounter images that influence ideas, emotions, and actions.	Analyze how one's understanding of the world is affected by experiencing visual imagery .	Evaluate the effectiveness of an image or images to influence ideas, feelings, and behaviors of specific audiences.	Determine the commonalities within a group of artists or visual images attributed to a particular type of art , timeframe, or culture.

Responding—Anchor Standard 8: Interpret Intent and Meaning in Artistic Work

PROCESS COMPONENT

Interpret

ENDURING UNDERSTANDING

People gain insights into meanings of artworks by engaging in the process of art criticism.

ESSENTIAL QUESTIONS

- What is the value of engaging in the process of art criticism?
- How can the viewer “read” a work of art as text?
- How does knowing and using visual arts vocabularies help us understand and interpret works of art?

PK.VA:Re8	K.VA:Re8	1.VA:Re8	2.VA:Re8	3.VA:Re8	4.VA:Re8	5.VA:Re8
Interpret art by identifying and describing subject matter.	Interpret art by identifying subject matter and describing relevant details.	Interpret art by categorizing subject matter and identifying the mood and characteristics of form .	Interpret art by identifying the mood suggested by a work of art and describing relevant subject matter and characteristics of form .	Interpret art by analyzing use of media to create subject matter, characteristics of form , and mood.	Interpret art by referring to contextual information and analyzing relevant subject matter, characteristics of form , and use of media . Responding—Anchor Standard 9: Apply Criteria to Evaluate Artistic Work

PROCESS COMPONENT

Evaluate

ENDURING UNDERSTANDING

People evaluate art based on various criteria.

ESSENTIAL QUESTIONS

- How does one determine criteria to evaluate a work of art?
- How and why might criteria vary?
- How is a personal preference different from an evaluation?

PK.VA:Re9	K.VA:Re9	1.VA:Re9	2.VA:Re9	3.VA:Re9	4.VA:Re9	5.VA:Re9
Select a preferred artwork and share.	Explain reasons for selecting a preferred artwork .	Classify artwork based on different reasons for preferences using learned art vocabulary.	Use learned art vocabulary to express preferences about artwork .	Evaluate an artwork based on given criteria .	Apply one set of criteria to evaluate more than one work of art .	Recognize differences in criteria used to evaluate works of art depending on styles, genres, and media as well as historical and cultural contexts .

Relate Artistic Ideas and Works with Societal, Cultural, and Historical Context to Deepen Understanding

PROCESS COMPONENT

Relate

ENDURING UNDERSTANDING

People develop ideas and understandings of society, culture, and history through their interactions with and analysis of art.

ESSENTIAL QUESTIONS

- How does art help us understand the lives of people of different times, places, and cultures?
- How is art used to impact the views of a society?
- How does art preserve aspects of life?

PK.VA:Cn11	K.VA:Cn11	1.VA:Cn11	2.VA:Cn11	3.VA:Cn11	4.VA:Cn11	5.VA:Cn11
Recognize that people make art .	Identify a purpose of an artwork .	Understand that people from different places and times have made art for a variety of reasons.	Compare and contrast cultural uses of artwork from different times and places.	Recognize that responses to art change depending on knowledge of the time and place in which it was made.	Through observation, infer information about time, place, and culture in which a work of art was created.	Identify how art is used to inform or change beliefs, values, or behaviors of an individual or society.

6.VA:Cn11	7.VA:Cn11	8.VA:Cn11	Prof.VA:Cn11	Acc.VA:Cn11	Adv.VA:Cn11
Analyze how art reflects changing times, traditions, resources, and cultural uses.	Analyze how response to art is influenced by understanding the time and place in which it was created, the available resources, and cultural uses.	Distinguish different ways art is used to represent, establish, reinforce, and reflect group identity.	Describe how knowledge of culture, traditions, and history may influence personal responses to art .	Compare uses of art in a variety of societal, cultural, and historical contexts and make connections to uses of art in contemporary, local, and global contexts .	Assess the impact of an artist or a group of artists on the beliefs, values, and behaviors of a society.

Visual Arts Glossary

The visual arts terms defined in this section include only those terms that are blue text in the standards. The meaning of the terms is specific to their use in the standards and the artistic discipline. The definitions included here are not meant to be an exhaustive list or used as curriculum.

The following defined terms are commonly accepted definitions, most of which are provided by the National Coalition for Core Arts at <https://www.nationalartsstandards.org/content/glossary>.

appropriation: Intentional borrowing, copying, and alteration of preexisting images and objects.

art: In everyday discussions and in the history of aesthetics, multiple (and sometimes contradictory) definitions of art have been proposed. In a classic article, “The Role of Theory in Aesthetics,” Morris Weitz (1956) recommended differentiating between classificatory (classifying) and honorific (honoring) definitions of art.

In the California Arts Standards, the word art is used in the classificatory sense to mean “an artifact or action that has been put forward by an artist or other person as something to be experienced, interpreted, and appreciated.”

An important component of a quality visual arts education is for students to engage in discussions about honorific definitions of art—identifying the wide range of significant features in art-making approaches, analyzing why artists follow or break with traditions and discussing their own understandings of the characteristics of “good art.”

artist statement: Information about context, explanations of process, descriptions of learning, related stories, reflections, or other details in a written or spoken format shared by the artist to extend and deepen understanding of his or her artwork; an artist statement can be didactic, descriptive, or reflective in nature.

artistic investigations: In making art, forms of inquiry and exploration; through artistic investigation artists go beyond illustrating pre-existing ideas or following directions, and students generate fresh insights—new ways of seeing and knowing.

art-making approaches: Diverse strategies and procedures by which artists initiate and pursue making a work.

artwork: Artifact or action that has been put forward by an artist or other person as something to be experienced, interpreted, and appreciated.

brainstorm: Technique for the initial production of ideas or ways of solving a problem by an individual or group in which ideas are spontaneously contributed without critical comment or judgment.

characteristic(s): Attribute, feature, property, or essential quality.

characteristics of form (and structure): Terms drawn from traditional, modern, and contemporary sources that identify the range of attributes that can be used to describe works of art and design to aid students in experiencing and perceiving the qualities of artworks, enabling them to create their own work and to appreciate and interpret the work of others.

collaboratively: Joining with others in attentive participation in an activity of imagining, exploring, and/or making.

concepts: Ideas, thoughts, schemata; art arising out of conceptual experimentation that emphasizes making meaning through ideas rather than through materiality or form.

constructed environment: Human-made or modified spaces and places; art and design-related disciplines such as architecture, urban planning, interior design, game design, virtual environment, and landscape design shape the places in which people live, work, and play.

contemporary artistic practice: Processes, techniques, media, procedures, behaviors, actions, and conceptual approaches by which an artist or designer makes work using methods that, though they may be based on traditional practices, reflect changing contextual, conceptual, aesthetic, material, and technical possibilities; examples include artwork made with appropriated images or materials, social practice artworks that involve the audience, performance art, new media works, installations, and artistic interventions in public spaces.

contemporary criteria: Principles by which a work of art or design is understood and evaluated in contemporary contexts which, for example, include judging not necessarily on originality, but rather on how the work is re-contextualized to create new meanings.

context: Interrelated conditions surrounding the creation and experiencing of an artwork, including the artist, viewer/audiences, time, culture, presentation, and location of the artwork's creation and reception.

copyright: Form of protection grounded in the US Constitution and granted by law for original works of authorship fixed in a tangible medium of expression, covering both published and unpublished works.

Creative Commons: Copyright license templates that provide a simple, standardized way to give the public permission to share and use creative work on conditions of the maker's choice (<http://creativecommons.org/>).

criteria: In art and design, principles that direct attention to significant aspects of a work and provide guidelines for evaluating its success.

critique: Individual or collective reflective process by which artists or designers experience, analyze, and evaluate a work of art or design.

cultural contexts: Ideas, beliefs, values, norms, customs, traits, practices, and characteristics shared by individuals within a group that form the circumstances surrounding the creation, presentation, preservation, and response to art.

cultural traditions: Pattern of practices and beliefs within a societal group.

curate: Collect, sort, and organize objects, artworks, and artifacts; preserve and maintain historical records and catalogue exhibits.

curator: Person responsible for acquiring, caring for, and exhibiting objects, artworks, and artifacts.

design: Application of creativity to planning the optimal solution to a given problem and communication of that plan to others.

digital format: Anything in electronic form including photos, images, video, audio files, or artwork created or presented through electronic means; a gallery of artwork viewed electronically through any device.

established criteria: Identified principles that direct attention to significant aspects of various types of artwork in order to provide guidelines for evaluating the work; these may be commonly accepted principles that have been developed by artists, curators, historians, critics, educators, and others or principles developed by an individual or group to pertain to a specific work of art or design.

exhibition narrative: Written description of an exhibition intended to educate viewers about its purpose.

expressive properties: Moods, feelings, or ideas evoked or suggested through the attributes, features, or qualities of an image or work of art.

fair use: Limitation in copyright law which sets out factors to be considered in determining whether or not a particular use of one's work is "fair," such as the purpose and character of the use, the amount of the work used, and whether the use will affect the market for the work.

formal and conceptual vocabularies: Terms, methods, concepts, or strategies used to experience, describe, analyze, plan, and make works of art and design drawn from traditional, modern, contemporary, and continually emerging sources in diverse cultures.

found object: The use of man-made or natural objects not normally considered traditional art materials. Found objects are transformed by changing meaning from their original context. The objects can be used singly or in combination (e.g., assemblage or installation).

genre: Category of art or design identified by similarities in form, subject matter, content, or technique.

image: Visual representation of a person, animal, thing, idea, or concept.

imaginative play: Experimentation by children in defining identities and points of view by developing skills in conceiving, planning, making art, and communicating.

installation art: Art designed to exist in a site-specific location whether inside or outside, public or private. Contemporary art installation materials can range from everyday objects and natural materials to new and alternative media. Often the viewer walks into the installation space and is surrounded by the art.

material culture: Human-constructed or human-mediated objects, forms, or expressions, that extend to other senses and study beyond the traditional art historical focus on the exemplary to the study of common objects, ordinary spaces, and everyday rituals.

materials: Substances out of which art is made or composed, ranging from the traditional to "nonart" material and virtual, cybernetic, and simulated materials.

media: Mode(s) of artistic expression or communication; material or other resources used for creating art.

open source: Computer software for which the copyright holder freely provides the right to use, study, change, and distribute the software to anyone for any purpose (<https://opensource.org/>).

personal criteria: Principles for evaluating art and design based on individual preferences.

portfolio: Actual or virtual collection of artworks and documentation demonstrating art and design knowledge and skills organized to reflect an individual's creative growth and artistic literacy.

preservation: Activity of protecting, saving, and caring for objects, artifacts, and artworks through a variety of means.

preserve: Protect, save, and care for (curate) objects, artifacts, and artworks.

relevant criteria: Principles that apply to making, revising, understanding, and evaluating a particular work of art or design that are generated by identifying the significant characteristics of a work.

style: Recognizable characteristics of art or design that are found consistently in historical periods, cultural traditions, schools of art, or works of an individual artist.

technologies: Tools, techniques, crafts, systems, and methods to shape, adapt, and preserve artworks, artifacts, objects, and natural and human-made environments.

venue: Place or setting for an art exhibition, either a physical space or a virtual environment.

visual components: Properties of an image that can be perceived.

visual imagery: Group of images; images in general.

visual organizational strategies: Graphic design strategies such as hierarchy, consistency, grids, spacing, scale, weight, proximity, alignment, and typography choice used to create focus and clarity in a work.

visual plan: Drawing, picture, diagram, or model of the layout of an art exhibit where individual works of art and artifacts are presented along with interpretive materials within a given space or venue.
