

Transcribed College credit for PLTW courses

University Of New Haven Tagliatela College of Engineering

Secondary school students from any PLTW-certified school may apply for UNH college credit for each eligible PLTW course listed below:

IED for UNH ME101	(2 semester Credits)
DE for UNH EE155	(3 semester Credits)
POE for UNH EAS 107	(3 semester Credits)
EDD* for UNH EAS 109	(2 semester Credits)

Student must meet the college credit eligibility requirements (PLTW teachers at your school will have the requirements). The decision to apply for college credit can be made after the exam has been taken and scored.

The UNH grade will be based on the average of the combined scores of Part A and Part C tests. Therefore, the grade a student receives in the high school course may differ from the college credit grade. If a student subsequently attends UNH, the college credit grade would be counted towards his/her overall grade point average. If a student attends another university, the course credits may be transferred without the letter grade.

The cost of tuition will be \$200 per course. UNH engineering programs evaluate the acceptability of these credits similar to evaluating other transfer credits. Students must meet the college enrollment requirements for UNH majors.

A student who successfully takes a course in the current academic year must take the exam at the end of the course and register for college credit before December of year of completion.

For information on how to apply for college credit visit the UNH-PLTW web site at:
<http://www.newhaven.edu/59823/>

*To qualify for college credit for EDD, student must first earn college credit for IED and POE. Since there is no end of course exam for EDD, the course grade will be used in determining the college grade.
