Mission Patch

Directions:

In this assignment you will be designing a mission patch that represents who you are and a goal or goals that you have for yourself. This is about you and things that are important to you. It does not have to be about space! The completed product will be used as your science binder cover.

1. List some things about yourself below:

- your goals (for this year, school, or life).

- qualities or talents (things that give you feelings of self – worth)

- interests or hobbies (how you like to spend your free time)

- achievements or accomplishments

- family, ancestry or culture

- other (things that are important to you like friends, beliefs, pets, etc.)

2. Pick four or more things listed above to illustrate as part of your mission patch.

3. Draw these in the circle on the other side of this page. You may add color if you wish.

I will be using the rubric below to grade this assignment. The first column is what I will be looking for. The next three columns represent the number of points possible for each part, which will be determined on how well each part is completed.

Rubric

Required	4 points	2 points	0 points
Illustrated Symbols	Completed drawing with at least four symbols	Some of the drawing done	None
Effort and Neatness	Effort and neatness apparent	Some effort made	None
