

## Lesson Plans: Math

Over the next few weeks we will be **reviewing** math concepts that have been previously taught this year. Students can choose from the following options for the next two weeks (March 30-April 10).

**Option 1:** If you were at school on Friday, March 10, then you should have both of your “Go Math” books at home with you. Over the next two weeks, (March 30-April 10) you can work at your own pace on Chapter 1: Place Value and Operations with Whole Numbers (pages 1-44) and Chapter 2: Multiply by 1-Digit Numbers (pages 45-102). There are many more examples in this books than Option 2 and 3, so you DON'T have to have every page complete. Do what you can, skip the easy stuff, and practice the skills that are a little more difficult for you. Please do not work past these two chapters.

**Option 2:** If you picked up the iReady packets from Marina Vista, you can work at your own pace reviewing the concepts they printed for you. (Note: I do NOT have a copy of this packet, but it should last two weeks.)

**Option 3:** If you do not have math books/packets, you will create an account on Khan Academy using the following link and directions.

<https://www.khanacademy.org/join/GHJUT5NM>

### Follow these steps:

- Click “Create a new account”
- Enter your birthday
- Click “Sign up by choosing a username
- Choose your username and password

Once you're logged in, click on “Courses” on the left hand side.

Then checkmark “Math” 4<sup>th</sup> Grade and Arithmetic, and “Arts and humanities” Grammar

Click the green button, “Continue with 3 courses”

Each day you log into Khan Academy, you will click on “Courses” under the “MY STUFF” tab on the left side of the screen. You will mostly be working on the “4<sup>th</sup> grade” math section. On Friday you will work on the “Arithmetic” section.

If possible, I recommend printing this entire document and checking off items as you complete them.
