Red Hawk Virtual Academy

Elementary Procedures

Elementary Virtual Academy will be a thumb drive based program. Teachers will download lessons, videos, and other information onto the thumb drive. These thumb drives will hold two week of lessons. There will be paper copies that will go with the lesson. The school will provide a Chromebook and the thumb drives. Internet will not be needed to complete the lesson, but the students will need to zoom (which requires internet) or facetime with a teacher. They may also need to email teachers from time to time. We are expanding our school internet to reach all of our school parking lots which will allow students opportunity to access the internet in the school parking lots. We are planning an open house night for virtual students on August 4th to allow parents to come and see the thumb drives in action and ask questions. Thumb drives and students work will be returned every two weeks and a new thumb drive and packets will be distributed at that time. If you need more information please let me know. If you are interested in your students attending through virtual academy, please let me know.

Middle School

Middle Virtual Academy will be an online program. Teachers will assign work and tests through our Canvas Learning Management System. They will also upload at least one video lesson a week for the students. The students will have zoom meetings with a teacher during the week. The school is providing a Chromebook for the students. The students will need internet access or will need access to transportation so they can access the school's Wi-Fi from the vehicle (we are expanding our WIFI to reach further and will release more details later). We are having an open house August 4 to provide more details and information.

High School

High School Virtual Academy will be an online program through Virtual Arkansas. The student will have classes through Virtual Arkansas. The school is providing a Chromebook for the students. The students will need internet access or will need access to transportation, so they can have access to the school's Wi-Fi from the vehicle (we are expanding our WIFI to reach further and will release more details later). We are having an open house August 4 to provide more details and information.
