

## 2016 Course Descriptions

### Visual Arts

Participants will have the opportunity to develop and refine their ceramic hand-building skills while tapping into their imaginations. Projects will include ceramic place settings, shoes and figurines, to name a few. Work will be displayed at a Share Day Exhibit.

### 3D Computer Animation

Participants will learn basic skills in 3D computer animation. We will be using the free downloadable software Blender to create a movable three-dimensional form. Students will be able to build upon the skills learned in this class if they download the software.

### 3D Printing

Participants will learn basic skills in 3D computer modeling. We will be using various software applications to create forms that will be printed on a 3D printer. Work will be displayed at a Share Day Exhibit.

### Film Appreciation

Students will explore film genres, write movie reviews and create dramatic movie posters. The class will view and critique a variety of films. Students will be making connections to text, other film, or real world events.

### Theater Performance Aspect

The WAMS summer program will be presenting a modified version of a musical. All students interested in performing will be given the opportunity to audition for acting, singing and dancing roles in the musical during the first day of the program, and all students that audition will be placed in the show. The play will be performed on the final day of the program. The musical will be directed by Mr. Scott Schulte with Mrs. Vagnini serving as the vocal instructor and Miss Quiles serving as the choreographer.

### Theater Production Aspect

All students interested in Technical and Production aspects of the program will be trained for tech and production and assigned to roles to assure that the show is fully supported. Students will be in charge of every aspect of production. You may find yourself designing the lighting and installing the design, or running the light board during the show. You could be mixing the mic during production, or costuming the actors under the direction of Ms. LeBlanc. Anything technical you may want to do, you will get the training and have the opportunity to do. The play will be performed on the final day of the program. The musical will be directed by Mr. Scott Schulte with Mrs. Vagnini serving as the vocal instructor and Miss Quiles serving as choreographer. Mr. Amenta will be teaching the video production aspect using state of the art video equipment and software including green screen technology. Mrs. Lopez will be assisting with behind the scenes

## WAMS REGISTRATION ENCORE!

Summer Arts Program  
June 20<sup>th</sup> - July 1<sup>st</sup>

Name: \_\_\_\_\_

Grade (Fall 2016): \_\_\_\_\_
