

Science Olympiad Social Distancing Plan 2020-2021

At this time, we are not sure if there will be a Science Olympiad event. It could **possibly** be a virtual event. More information will come at a later date. I will set up a web-based platform students can use to review and practice information on their own. Websites, articles, videos, etc. will be provided to give more explanation for the topics of the events. Sometimes the events change from year to year. I will give helpful information for the events in last year's competition.
