

Science. Exploring our planet Earth through review of 4 spheres.

Monday: Read and draw one picture for each of Earth's four spheres explained below. If you can, watch the video of "4 spheres of earth," at https://www.youtube.com/watch?v=m4TnPv_b6WU.

The Earth's **geosphere** is made of solid non-living components like rock, soil, sand, etc.

Picture:

The Earth's **hydrosphere** is made of all water, ice, moisture, snow, rain, etc.

Picture:

The Earth's **atmosphere** is made of all the air and gasses that surround the planet in layers.

Picture:

The Earth's **biosphere** is made of all living things found on the planet: animals, plants, bacteria, etc.

Picture:

Tuesday: Give examples of the geosphere and where you have seen them. Write sentences.

(Clue: Think of the ground where you can walk.)

The Earth's geosphere is composed of

Wednesday: Give examples of the hydrosphere and where you find them. Write sentences.

(Clue: Think of all the different forms and bodies of water.)

I think the Earth's hydrosphere includes

Thursday: Give examples of the atmosphere and where you find it. Write sentences.

(Clue: Think about all you can breath.)

I think the Earth's atmosphere is made of

Friday: Give examples of the biosphere and where you find them. Write sentences.

(Clue: What are all the different types of living things you know.)

There are a lot of examples of the Earth's biosphere which include
