

List of Material Donations for Science Classes:

Dear Parents of Science Students—

This year we are asking parents if they can donate any of the following items to our science program as funds get tighter each year.

The following is a list of classroom materials that we frequently use for simulations, labs, teacher demonstrations, and hands-on-activities. The previous listed curricula are usually the activities that allow our students to better comprehend the difficult of obscure science lessons that we expect them to know. If you can donate any of the following items, we would be very appreciative.

- Construction Paper
- Colored Xerox Paper
- Plain Flat Toothpicks (lots!!!)
- Multi-color mini marshmallows
- Peanut butter and Jelly (lots) = Chromosomal mutations Lab
- Boxes of tissues (kids are always asking for them).
- Paper towels
- Latex, nitrile, latex-free (surgical) gloves (for dissections)
- Plastic or paper bowls
- Paper Plates
- Colored pencils
- Food Coloring
- Washable Markers
- Zip-Lock Baggies (various sizes)
- Aluminum Foil
- Play-Doh
- White Board Markers
- vinegar and baking soda
- Lab Glasses
- Simple Green Cleaning Solution
- Round balloons (lots!) for SA:Volume [Cell lab].

Most Graciously,

The MVHS Science Staff
