$$y = A \sin x$$

$$y = A \cos x$$

A → Amplitude

Find the amplitude of the function and use the language of transformations to describe how the graph of the function is related to the graph of $y = \sin x$

A) $y = 3 \sin x$

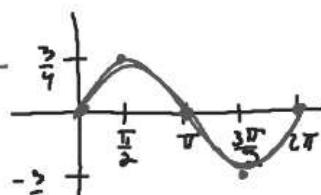

Vertical Stretch
by factor of 3

Amplitude = 3

B) $y = \frac{3}{4} \sin x$

Amp = $\frac{3}{4}$

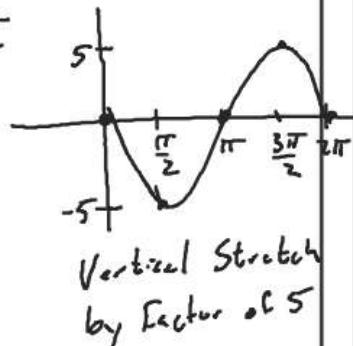

Vertical Compression
by a factor of $\frac{3}{4}$

C) $y = 5 \sin x$

Amp = 5

Reflect over
 x -axis

Vertical Stretch
by factor of 5

Period - How long
it takes
to repeat

Find the period of the function and use the language of transformations to describe how the graph of the function is related to the graph of $y = \cos x$

$\cos \frac{B}{2} x$

A) $y = \cos(2x)$

$B = 2$

$\text{Per} = \frac{2\pi}{B} = \frac{2\pi}{2} = \pi$

B) $y = \cos \frac{x}{2}$

$B = \frac{1}{2}$

$\text{Per} = \frac{2\pi}{B} = \frac{2\pi}{\frac{1}{2}} = 2\pi \cdot 2 = 4\pi$

C) $y = \cos \left(\frac{-3x}{4} \right)$

$= \cos \frac{3x}{4}$

$B = \frac{3}{4}$

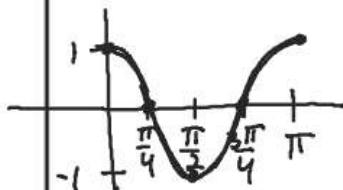

$\text{Per} = \frac{2\pi}{B} = \frac{2\pi}{\frac{3}{4}}$

$$\frac{2\pi}{\frac{3}{4}} = \frac{8\pi}{3}$$

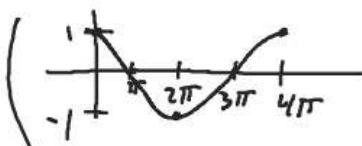

$$y = A \sin Bx$$

$$y = A \cos Bx$$

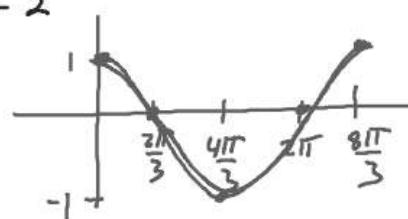

$$\text{Per} = \frac{2\pi}{B}$$

Graph 1 period of the function without using your calculator.

A) $y = 3 \sin \frac{x}{2}$

Amp = 3

$$Per = \frac{2\pi}{B} = \frac{2\pi}{\frac{1}{2}} = 4\pi$$

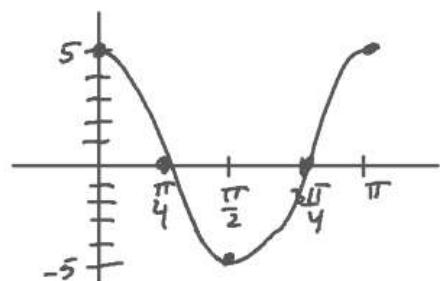

$y = 5 \cos 2x$

Amp = 5

$$B = 2$$

$$Per = \frac{2\pi}{B} = \frac{2\pi}{2} = \pi$$

Identify the maximum and minimum values and the zeros of the function in the interval $[-2\pi, 2\pi]$. Use your understanding of transformations, not your calculator.

A) $y = 4 \sin x$

B) $y = -2 \cos \frac{x}{3}$
