

Smiths Station High School Credit Recovery For Freshman

Smiths Station High School only offers credit recovery for 9th grade core courses **AFTER SCHOOL**.

- If a course is failed at SSFC and is **not** made up during summer school, the student must come to after school credit recovery to complete and pass the course before they will be able to graduate.

Two Exceptions to After School Recovery Option:

1. We do offer one class of Algebra I for students who have failed that course. That class meets every day first semester, and then the required Geometry class for 10th graders is offered every day 2nd semester, allowing them to earn two math credits in one year.

However, space in the class is limited – only 25 students will be able to take the course. If there are more than 25 students that fail Algebra I and do not take the course in summer school, the students with the lowest yearly averages from Algebra I at SSFC will be given priority when registering. Any additional students over the 25 will need to take the Algebra course in credit recovery after school. Students who failed either Algebra IA OR Algebra IB would have to make that course up in either summer school or after school credit recovery, as the 1A and 1B courses are not offered on campus at SSHS. Any students that fail both Algebra IA and IB would be eligible to do the Algebra I course on campus or after-school credit recovery.

2. We offer on-campus courses for Career Prep A and Career Prep B. Students can also complete these courses in after-school credit recovery if they wish, but again, they must be completed and passed prior to graduation.
