Instruction BP 6011(a)

### **ACADEMIC STANDARDS**

The Governing Board shall adopt high standards for student achievement which challenge all students to reach their full potential and specify what students are expected to know and to be able to do at each grade level and in each area of study. These standards shall reflect the knowledge and skills needed for students to be adequately prepared for postsecondary education, employment, and responsible citizenship. There shall be proper articulation of standards between grade levels and the alignment of the standards with the district's vision and goals, graduation requirements, college entrance requirements, and other desired district outcomes. The standards shall be easily understandable and measurable and communicated to parents/guardians.

Content standards for English language arts, English language development, mathematics, science, health education, history-social science, physical education, visual and performing arts, world languages, career technical education, and preschool education shall be aligned with statewide model content standards adopted by the State Board of Education or the State Superintendent of Public Instruction as applicable.

District curriculum, instruction, student assessments, and evaluations of the instructional program shall be aligned with statewide content standards. In accordance with Education Code 44662, standards of expected student achievement also shall be referred to in evaluating teacher performance.

Teachers and school administrators shall receive ongoing professional development to inform them of changes in the standards and to build their capacity to implement effective standards-based instructional methodologies.

Staff shall continually assess students' progress toward meeting the standards, report each student's progress to the student and his/her parents/guardians, and offer remedial assistance in accordance with Board policy and administrative regulation.

The Superintendent or designee shall ensure that content standards are regularly reviewed and updated as necessary. At a minimum, content standards shall be reviewed whenever applicable statewide standards are revised and in response to changing student needs.
