

Grade 7

Civics and Economics

Standards for Civics and Economics examine the roles citizens play in the political, governmental, and economic systems in the United States. Students will examine the foundational documents and principles with which the constitutions of Virginia and the United States were established, identify the rights, duties, and responsibilities of citizens, and describe the structure and operation of government at the local, state, and national levels. Through the economics standards, students will compare the United States economy to other types of economies and consider the government's role in the United States economy. Students will investigate the process by which decisions are made in the American market economy and explain the government's role in the United States economy. The standards identify personal character traits, such as patriotism, respect for the law, willingness to perform public service, and a sense of civic duty, that facilitate thoughtful and effective active participation in the civic life of an increasingly diverse democratic society.

Civic and economic education also must emphasize the intellectual and practical skills required for responsible citizenship. Students will learn to consider their own talents, aptitudes, personalities, and market demand as they explore future decisions. Students will practice these skills both inside and outside the classroom as they extend their understanding of the essential knowledge defined by the standards for Civics and Economics.

Skills

- CE.1 The student will demonstrate skills for historical thinking, geographical analysis, economic decision making, and responsible citizenship by
- a) analyzing and interpreting evidence from primary and secondary sources, including charts, graphs, and political cartoons;
 - b) analyzing how political and economic trends influence public policy, using demographic information and other data sources;
 - c) analyzing information to create diagrams, tables, charts, graphs, and spreadsheets;
 - d) determining the accuracy and validity of information by separating fact and opinion and recognizing bias;
 - e) constructing informed, evidence-based arguments from multiple sources;
 - f) determining multiple cause-and-effect relationships that impact political and economic events;
 - g) taking informed action to address school, community, local, state, national, and global issues;
 - h) using a decision-making model to analyze and explain the costs and benefits of a specific choice;
 - i) applying civic virtue and democratic principles to make collaborative decisions; and
 - j) defending conclusions orally and in writing to a wide range of audiences, using evidence from sources.

CE.12 The student will apply social science skills to understand the United States economy (4 weeks)

Characteristics of the United States economy.

The United States economy has characteristics of a free market economy; but because it has some aspects of command and traditional economies it is characterized as a mixed economy.

Government intervenes in a market economy when the perceived benefits of a government policy outweigh the anticipated costs.

Terms to know: price, demand, supply, and equilibrium price.
Basic types of business ownership.

Entrepreneur.

Entrepreneurs increase competition by bringing new goods and services to market or delivering products in innovative ways. They often foster technological progress and economic growth.

Economic flow (circular flow).

Private financial institutions.

Global economy (definition).

Reasons that states and nations trade.

Impact of technological innovations.

- a) describing the characteristics of the United States economy, including limited government, private property, profit, markets, consumer sovereignty, and competition;(1c,h,f)
- b) describing how in a market economy supply and demand determine prices;
- c) describing the types of business organizations and the role of entrepreneurship;
- d) explaining the circular flow that shows how consumers (households), businesses (producers), and markets interact;
- e) explaining how financial institutions channel funds from savers to borrowers
- f) analyzing the relationship of Virginia and the United States to the global economy, with emphasis on the impact of technological innovations.
