If we really want to prepare our students for successful careers, we need to know all we can about the rapidly changing job market.

What is Labor Market Information?

- The body of information that deals with the functioning of labor markets and the determination of the demand for and supply of labor.
- It includes, but is not limited to, such key factors as changes in the level and/or composition of economic activity, the population, employment and unemployment, income and earnings, wage rates, and fringe benefits.

What is Labor Market Information?

- Economic or labor force information (the number of people employed and unemployed)
- Occupational information (descriptions of occupations)
- Demographic information (characteristics of the general population related to employment and workers)

Degree Level Matters

People with more education make more money than those with less

Now, the Real Test

College Grads Turn to Tests, Life Coaches For Help in Deciding What Comes Next

By Rachel Dry

Washington Post Staff Writer

Tuesday, May 22, 2007; HE01

College graduation day. Finals safely behind you. Time to take the first steps of the rest of your life. But first, how about one more test or counseling session, to tell you where to direct those steps?

Instead of rushing off to grad school or into the workforce, students graduating from college this spring are increasingly turning to personality tests and life coaches, say some career counselors, to match them with jobs that promise not just earning potential but a compatible lifestyle and a shot at happiness.

"You used to see a kid who had a father and mother who were both lawyers, so the kid thought they're supposed to go on and be a lawyer," says Jeffrey Hayes, co-president of CPP, publisher of two widely used personality and interest assessments -- the Myers-Briggs Type Indicator and the Strong Interest Inventory. "But today, people come in and say, 'I don't want to be like my mom and dad. I want to do something that I really enjoy. I don't just want to work for a paycheck. I want to know more about myself.' "

Two years ago, in response to requests from college career counseling offices, the company began offering

On the Job Training Required

(2010 USA Median Average Salaries - 2020 High Demand)

\$70,910	Appren.	Elevator Installers and Repairers

- \$79,390 Biochemists and Biophysicists

Why LMI?

- **Students** - Learn which careers will have openings when they are ready to join the workforce.
- **Parents** - Help their children decide which career to pursue.
- **Teachers** - Know which careers are in high demand so they can relate their teachings to careers. (Relevance)
- **Businesses** - Give business people the data they need to discuss careers with our students. (Relationships)

**So where did all this
data come from?**

About This Site

Projections of occupational employment growth are developed for all States and the nation as a whole. One of the most important uses of the projections is to help individuals make informed career decisions. Information on this site allows projected employment growth for an occupation to be compared among States. It also allows projected employment growth among occupations to be compared within one State.

Interest Profiler

The Interest Profiler (career interest assessment) helps you find out what your interests are and how they relate to the world of work. It does this by asking you to answer questions that represent important interest areas. Your Interest Profiler scores will help you identify your strongest work-related interests. Knowing your work interests can help you decide what kinds of occupations and careers you want to explore.

You should use your Interest Profiler results to explore the world of work and identify occupations that can satisfy your particular interests. You will be able to look at the interests of workers in occupations and compare them to your own interests. Talk to your career development coordinator/facilitator/counselor for more help on how to use your Interest Profiler results.

The Interest Profiler questions describe work activities that some people do at their jobs. Read each question carefully and decide whether or not you would like to do the activity.

Try not to think about:

- whether you have enough education or training to perform the activity, or
- how much money you would make performing the activity.

Simply think about whether you would "like" or "dislike" performing the work activity.

Points to remember:

- **This is not a test!** There are no right or wrong answers to the questions. The goal is for you to learn more about your personal work-related interests.
- **There is no time limit** for completing the questions. Take your time.

(Optional, to identify your printout if printed on a group printer.)

Interest Profiler at www.CareerOutlook.US

John Smith, your career interests are as follows:

Realistic: 26
Investigative: 10
Artistic: 3
Social: 2
Enterprising: 17
Conventional: 29

One, two or three of these interest categories should be significantly higher than the others. Look for careers that match these interests.

Print this page, or write down your interest codes to save for later. You will not be able to save this information here.

Select your top career interest to see careers where people match your career interests.

Realistic: People with *Realistic* interests like work activities that include practical, hands-on problems and solutions. They enjoy dealing with plants, animals, and real-world materials, like wood, tools, and machinery. They enjoy outside work. Often people with *Realistic* interests do not like occupations that mainly involve doing paperwork or working closely with others.

Enterprising: People with *Enterprising* interests like work activities that have to do with starting up and carrying out projects, especially business ventures. They like persuading and leading people and making decisions. They like taking risks for profit. These people prefer action rather than thought.

Investigative: People with *Investigative* interests like work activities that have to do with ideas and thinking more than with physical activity. They like to search for facts and figure out problems mentally rather than to persuade or lead people.

Artistic: People with *Artistic* interests like work activities that deal with the artistic side of things, such as forms, designs, and patterns. They like self-expression in their work. They prefer settings where work can be done without following a clear set of rules.

Social: People with *Social* interests like work activities that assist others and promote learning and personal development. They prefer to communicate more than to work with objects, machines, or data. They like to teach, to give advice, to help, or otherwise be of service to people.

Conventional: People with *Conventional* interests like work activities that follow set procedures and routines. They prefer working with data and detail more than with ideas. They prefer work in which there are precise standards rather than work in which you have to judge things by yourself.

Career Outlook in the US

Knowing where the job openings are in the near future is the key to deciding on a postsecondary education that will prepare you for a rewarding career!

Welcome to [Career Outlook dot U S.](http://www.careeroutlook.us/)

This website allows you to obtain and sort various career data, also known as *Labor Market Information*.

For each state you can select to see a list of careers within one of the 16 career clusters or see a list of the careers in one of the six career interest categories. You can even select one from each menu to cross-reference career clusters and career interests. You can see ALL of the careers by immediately selecting the Search button.

Once you have your list of careers, you can change the sort order by selecting one of the column headings.

More information about each career can be found by selecting the name of the career.

Select a State

Select a Career Cluster

Select a Career Interest

[Take a Career Interest Assessment](#)

Select one or more of the above and then select the button.

The Career Planning Process

Start with a plan. A Career Plan gets you started on your way to a productive and rewarding career. After assessing your interests and skills, then explore the careers found here at [Career Outlook dot U S.](http://www.careeroutlook.us/)

[Take a RIASEC career interest assessment.](#) Then explore careers that match your interests.

Upsetting the Data

- Recession
- Natural Disasters
- Immigration
- Automation
- Job relocation
- Elections

The Career Planning Process

1. **Assessments! Skill and interest inventories.**
2. **Do your homework! Research all careers.**
3. Get out there! Job shadowing, internship, etc.
4. Talk to adults! Find out what they do.
5. Pick a career! An entry-level position.
6. Start a plan! Schooling, certification, background checks, or other requirements.
7. Choose elective classes based on career plan.
8. What's next? What does it take to get to the next level?

Help students discover their passion, then help them get on a pathway where they can turn that passion into a career.
