Source of data: Voices for Virginia's Children. Virginia "Kids Count" Data Center.

Children Receiving Special Education Services

PALS Scores

- ▶ PALS (Phonological Awareness Literacy Screening) is a diagnostic assessment tool to measure fundamental literacy skills acquisition in children under 5.
- ▶ Note that at both the local level and the state level there has been steady progress in decreasing the number of children who score below kindergarten readiness levels.

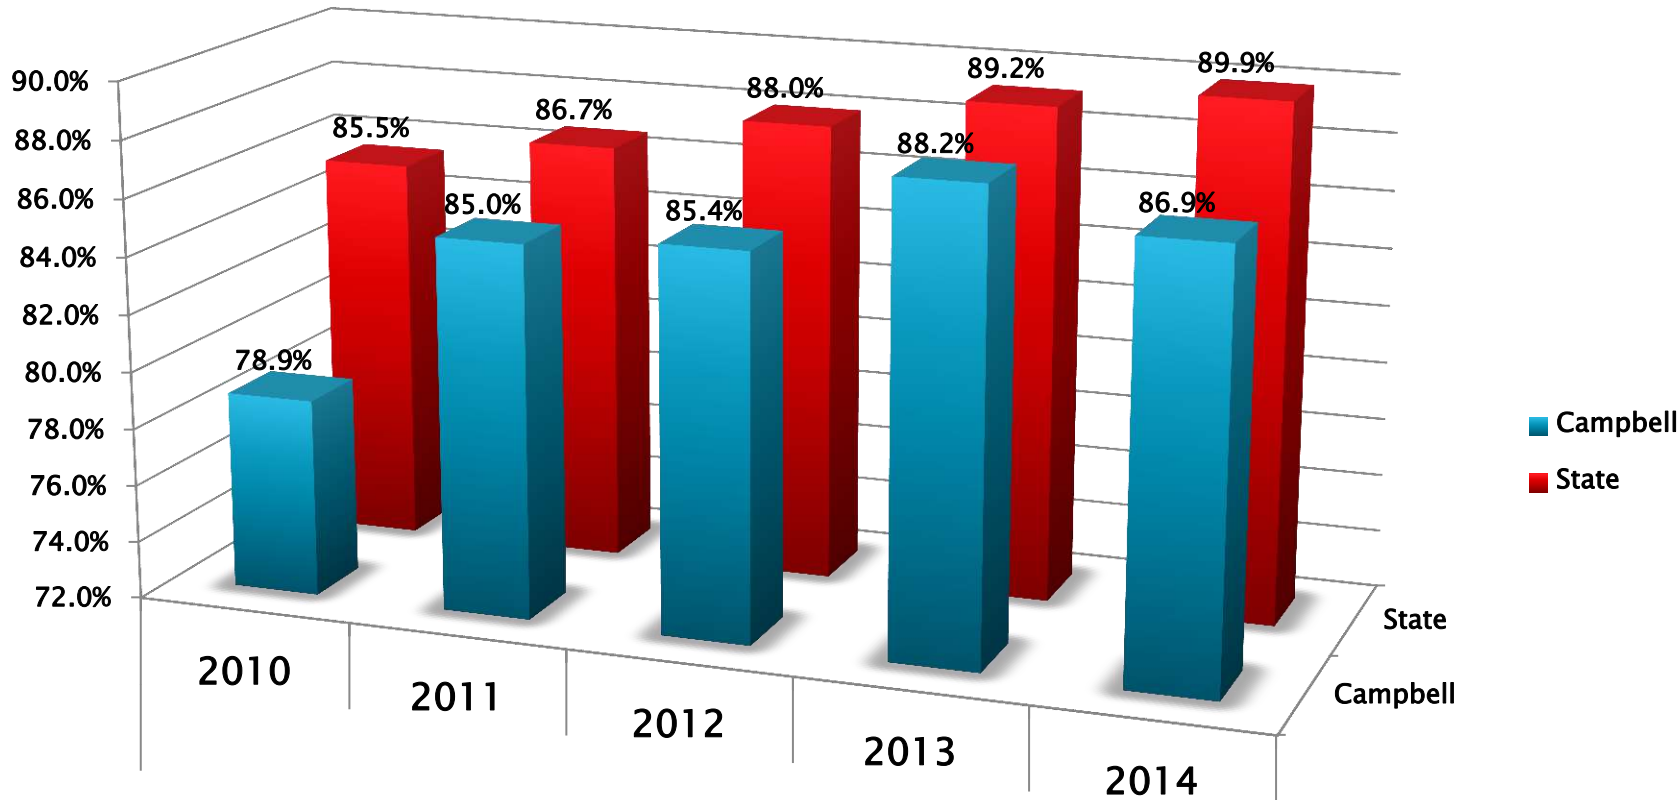

Source of data: Voices for Virginia's Children. Virginia "Kids Count" Data Center.

On Time Graduation

Beginning with the students who entered the ninth grade in 2004–05, Virginia began tracking individual students over the four years of a traditional high school career to determine the percentage who graduate on time. Previously, graduation rates have been calculated under several different methods. While Campbell County's on time graduation rate lags behind the state's average, progress has been achieved in increasing the graduation rate.

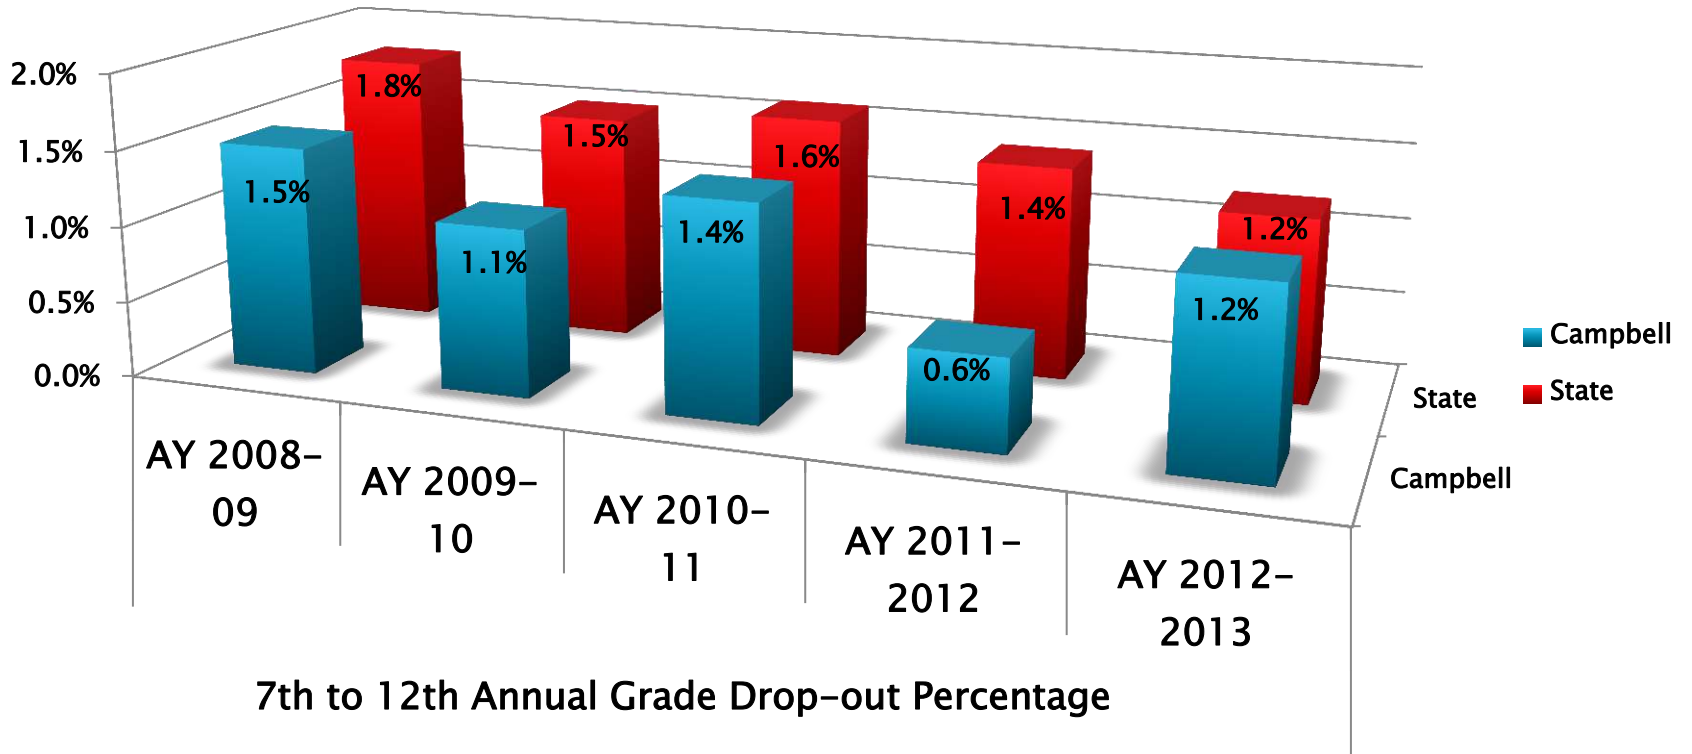

Source of data: Voices for Virginia's Children. Virginia "Kids Count" Data Center.

On Time Graduation Rates

School Drop-outs

- ▶ The next chart represents the percentage of youth dropping out of school in grades 7 through 12.
- ▶ The dropout rate for Campbell County has traditionally been below the state average.

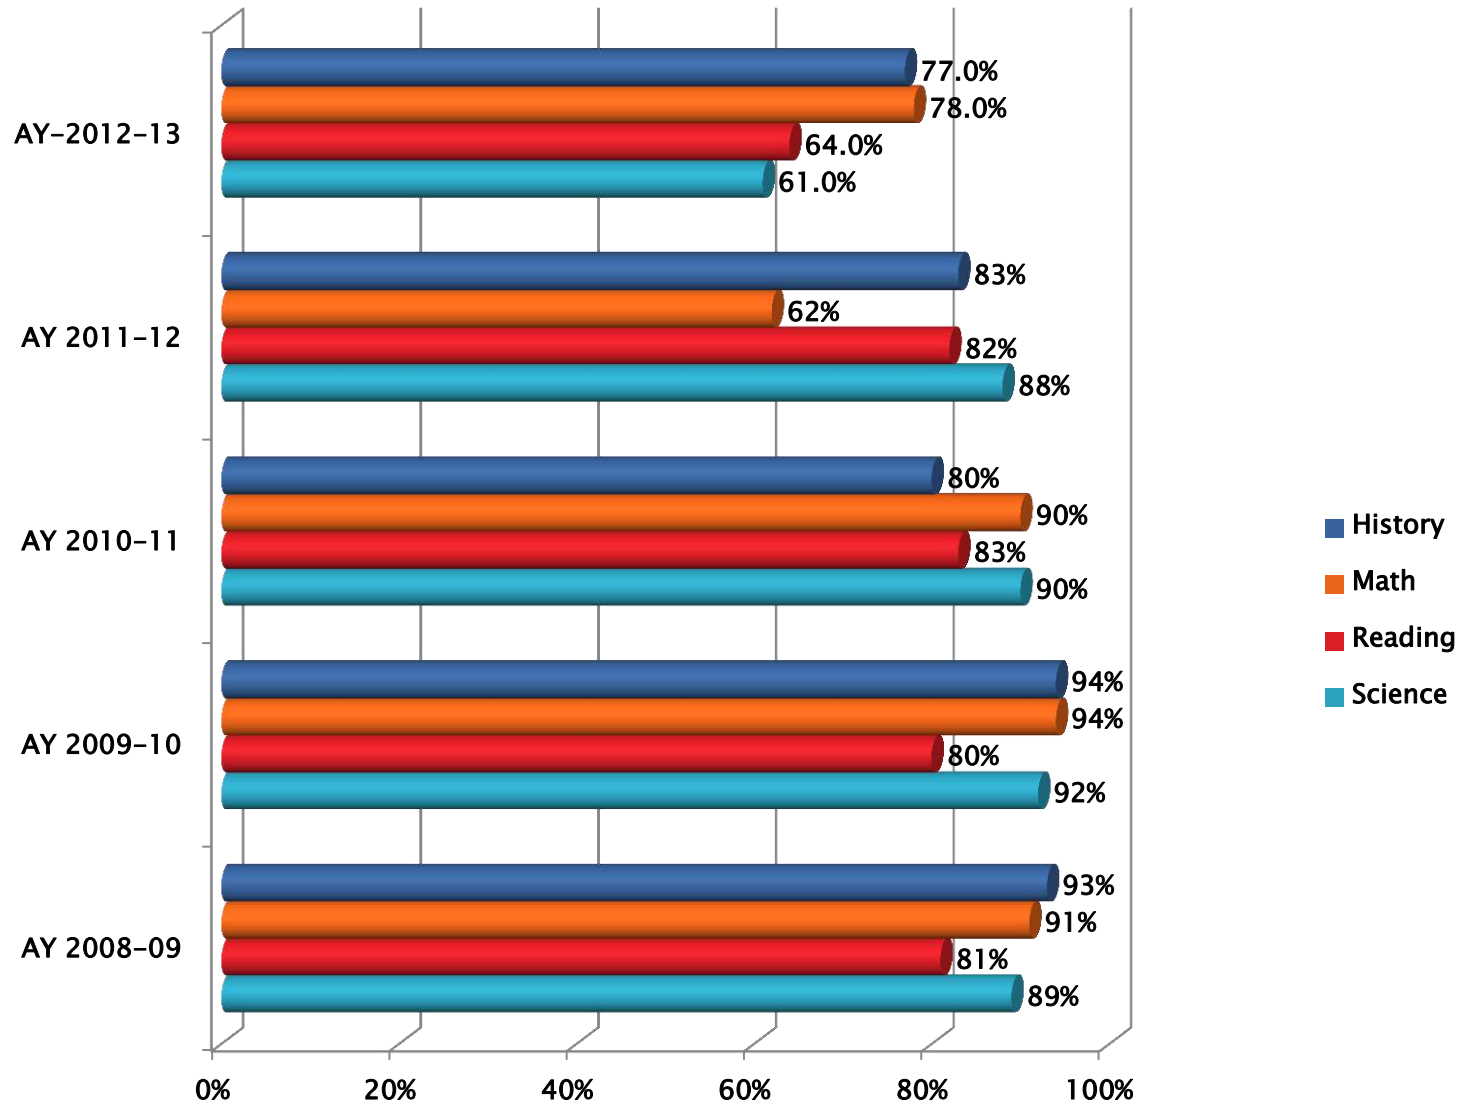

3rd Grade SOLs

The next chart gives a five year history of SOL scores (Standards of Learning Scores) for 3rd graders in Campbell County.

Note that the passing rate appears to be significantly lower in 2012/2013. This may be attributable to changes in the testing instruments that have been reflected statewide.

3rd Grade SOL's

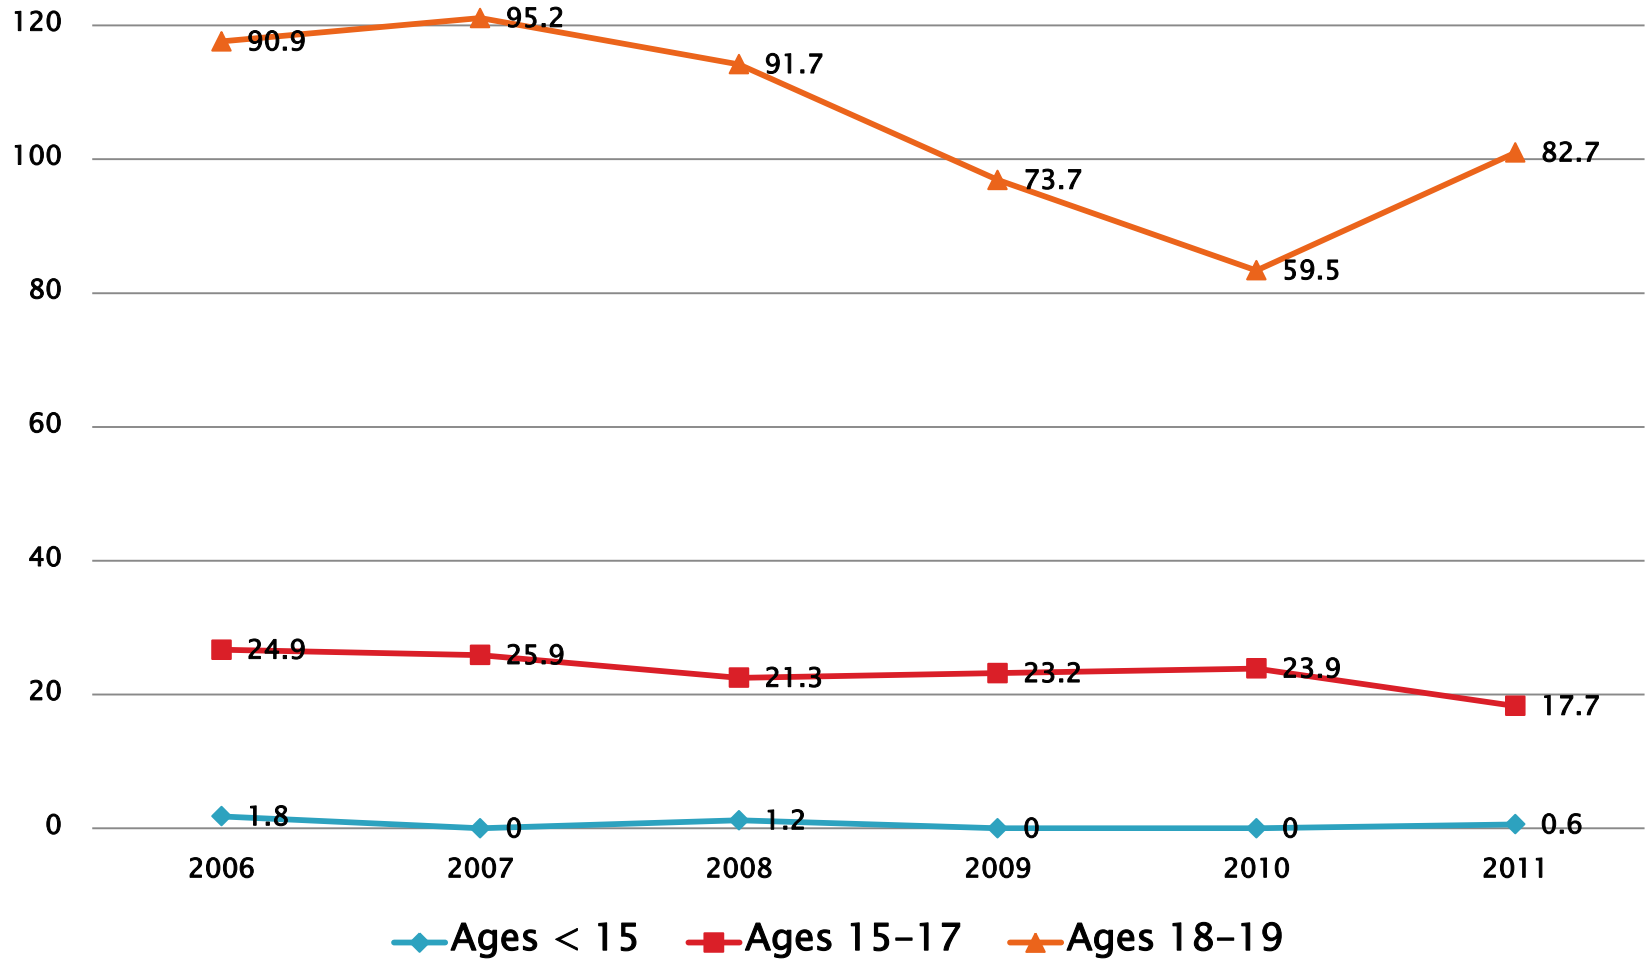

Teen Pregnancy

Based on the following chart, please note that the teen pregnancy rate for 18 and 19 year olds which has been decreasing is now beginning to increase. Rates for 15 to 17 and under 15 have remained stable.

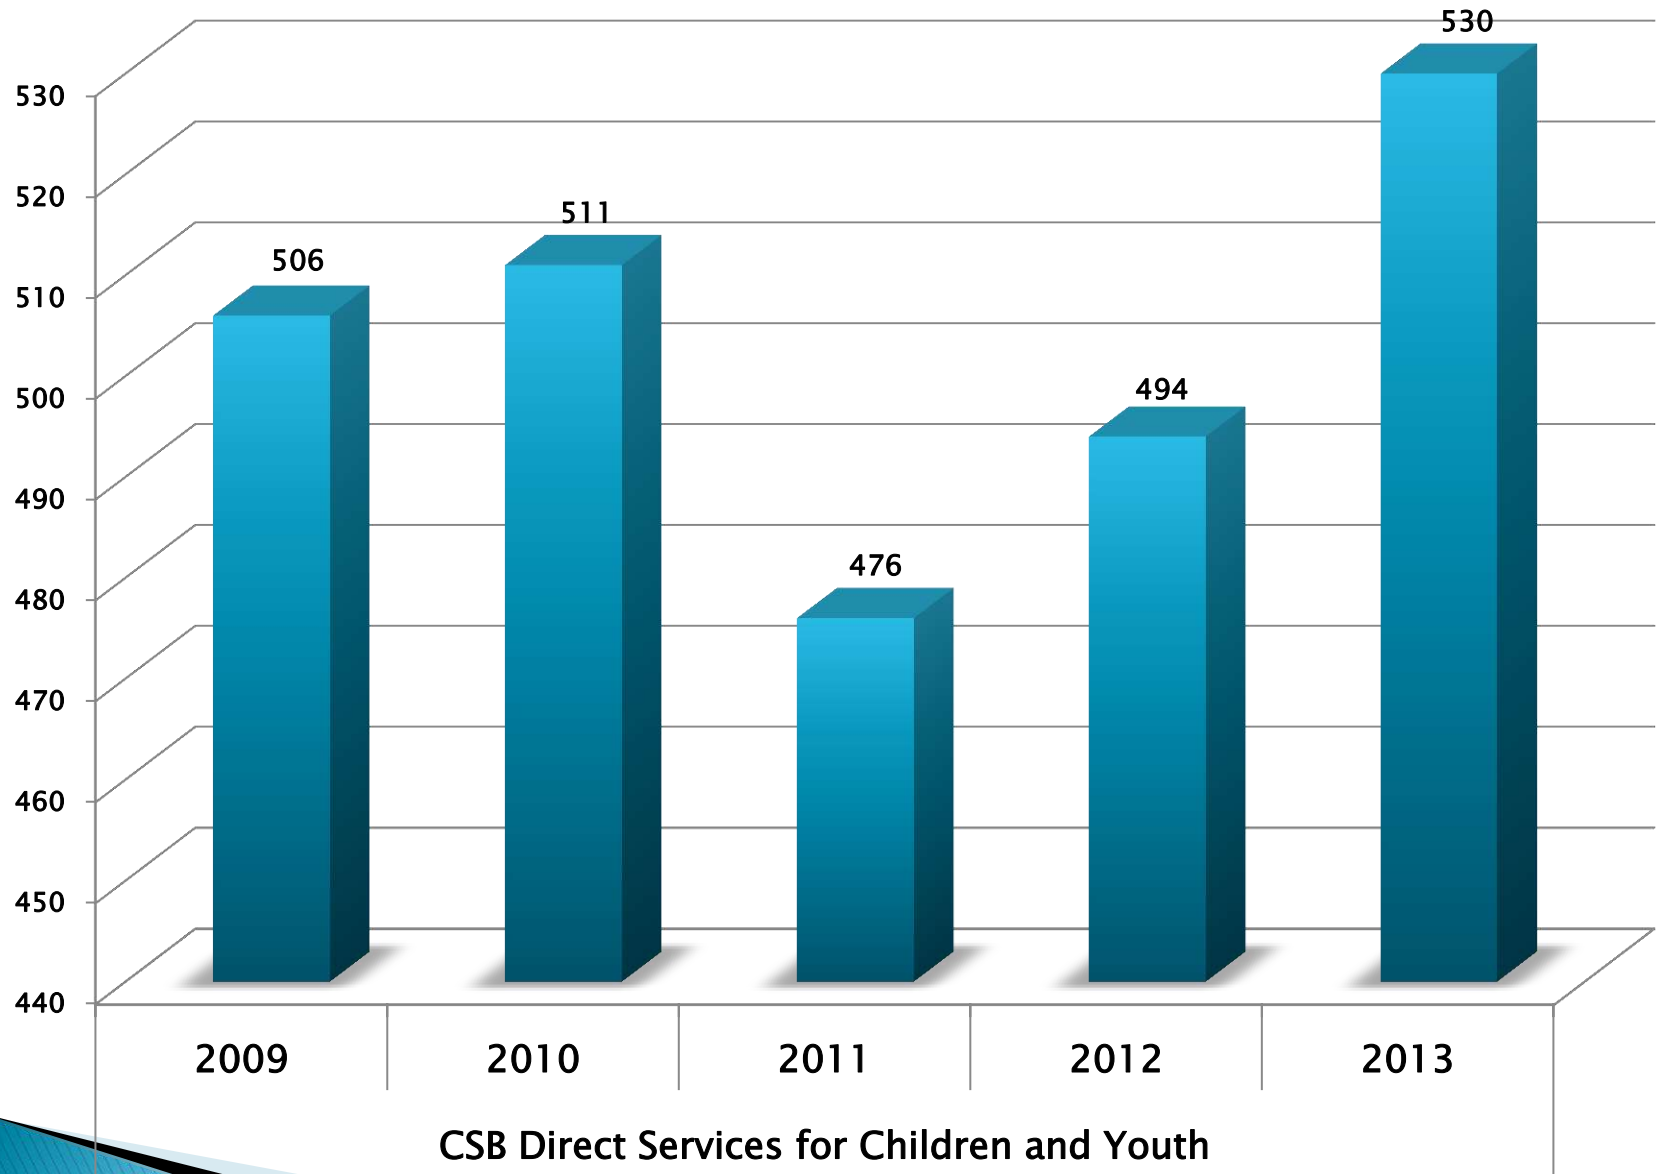

Source of data: Voices for Virginia's Children. Virginia "Kids Count" Data Center.

Teen Pregnancy Rate per 1000
