#### Detailed Summary - Update as of October 31, 2016

Students attending afterschool programs have been on the rise for our elementary schools since its inception. Our numbers show increases in the amount of names on the waiting lists, some schools are higher than others. We have expanded staff at a few of our afterschool programs to alleviate the amount of names on the wait lists. Challenges are based on access to additional staff from our provider California Teaching Fellows Foundation (CTFF).

New activities and programs being offered for our students during elementary afterschool include Girl Scouts, robotics (Legos) and chromebooks. We continue to research additional academic support and intervention material for our afterschool staff and children.
