

Welcome to AP Statistics. This class is an honors math course, and will require your dedicated effort through the next year, starting this summer.

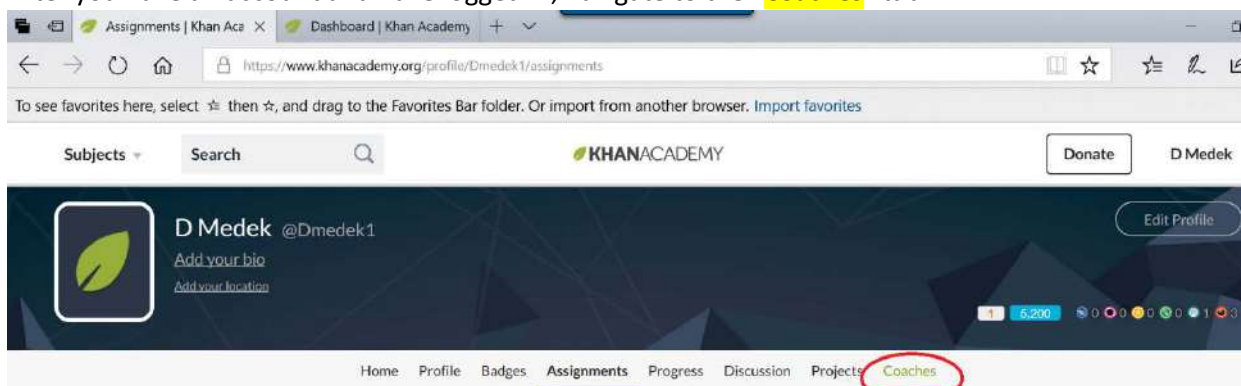

Your summer assignment begins with this: send an email introducing yourself to dmedek@tusd.net. Put “AP Statistics 2020-2021” in the Subject line.

Then copy these questions in the email and write your response after each.

- Are you able to do the Summer Assignment online with Khan Academy?
- What grade are you entering this year (senior, junior, or . . .) ?
- Why are you taking this class?
- What plans do you have for the future?
- Tell me about something fun you have planned for the summer.

Your work this summer is designed to reinforce basic statistics skills that you will need to know before starting this year.

1. Copy this code: 48YKB3M9 (or click on this link: <https://www.khanacademy.org/join/48YKB3M9>)
2. With a compatible browser, (Edge, Chrome, Firefox, not Explorer), Navigate to www.khanacademy.org. If you have an account, sign in. If not, create an account.
3. After you have an account and have logged in, navigate to the “Coaches” tab.

4. the code in the “Join a class” box. The teacher will get a message that you are joining the class and will approve your entry.
5. You are assigned all of the quizzes and tests. You can do this in one of two ways.
 - a. If you have learned some of these concepts already, take the quizzes and tests. If you pass them, move on to the next topic.
 - b. If you don’t remember these concepts, or you’ve never seen them, you can do the lessons in order first, then take the quizzes and tests.
6. When you have trouble with a topic, do the recommended assignment and retake the quiz or test. I will only be counting the graded assignments (exercises, quizzes and Unit Tests).
7. Email me if you are having any issues. I will check on your progress during the summer.

I made a video explaining how to do the work for PreCalculus Honors. If you want, you can watch that video too to know how to sign up on Khan Academy and make the system work for you. Just use the code above instead of the code for PreCalculus Honors.
