Section scores

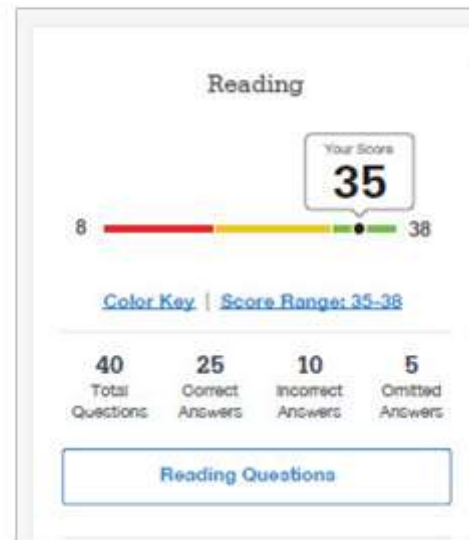

Need to Strengthen Skills = below grade-level benchmark by more than one year

Approaching Benchmark = below grade-level benchmark by one year or less

Meets or Exceeds Benchmark = at or above grade-level benchmark

What Is My AP Potential?

AP Potential uses scores from the PSAT/NMSQT® to provide predictions for 21 AP® Exams.

- College Board research shows that students who score a 3 or higher on an AP Exam typically experience greater academic success in college and are more likely to earn a college degree on time than non-AP students.

AP Potential and Coursework

What is AP?
Advanced Placement is a College Board program that enables students to pursue college-level studies - with the opportunity to earn college credit, advanced placement or both - while still in high school. The program offers courses in more than 30 subjects. For a full list of courses, click here. If you've taken a College Board assessment in 9th grade or higher, see below for a list of AP courses that you are likely to succeed in. If you've taken an assessment in 10th grade or higher but don't see any AP courses listed below, click here to link the scores to this account or contact Customer Service at (800)796-7346 for assistance and questions.

High School Core Coursework
Colleges have different high school course requirements, but all expect you to take classes that challenge your skills. Try to take a core course load of 4 years of English and at least 3 years of Math, Science, and Social Studies. As you work towards your high school diploma, you should consider taking courses that align with your future career interest and college major, which may require more than the standard core course load. You may also want to think about taking Advanced Placement courses in your later years of high school.
