

Math Vocabulary - Chapter 8

Make a vocab card for each word. Draw an example on the front of the card.

empty set	a set with no elements
equivalent equations	expressions that have the same value
identity	an equation that is true for every value of the variable
inverse operations	operation that undoes another
null set	a set with no elements
solution	a value for the variable that makes an equation true
two-step equation	an equation that contains two operations
