## Warm Up:

Before you start, write down as many of the 6 properties of parallelograms from memory as you can.

Given the parallelogram at the right, find the value of  $x$  and the measure of each angle. What property of parallelograms allows you to solve this problem?

Given the parallelogram at the right, find the value of  $x$  and the measure of  $BD$ . What property of parallelograms allows you to solve this problem?

$$DE = 3x - 16$$

$$BD = 4x + 6$$

# TI-NSpire Activity

Welcome to "Rectangles and Squares."

To move through the tabs, you can use your mouse, or press [ctrl] and then left/right

If you need help, please ask your team!

notes - notes -

## Rectangles

Special parallelograms that have the normal 6 characteristics PLUS:

- consecutive sides are perpendicular
- diagonals are congruent

## Squares

Special parallelograms that have the normal 6 characteristics PLUS:

- consecutive sides are perpendicular
- diagonals are congruent
- all sides are congruent
- diagonals bisect the angles

## Left-Side Practice

Given the following slopes, write the slope of the line parallel to it and the slope of the line perpendicular to it.

1.  $m = 1/2$

2.  $m = -3$

3.  $m = 3/4$

4.  $m = -1$

5.  $m = 1$

6. For rectangle ABCD, the slope of AB is  $1/2$ . Fill in the slopes for the remaining sides.

Slope of AB =  $1/2$

Slope of BC = \_\_\_\_\_

Slope of CD = \_\_\_\_\_

Slope of AD = \_\_\_\_\_

**Right Side...**

Write a summary that answers the essential question.

**Left Side...**

1. Which is the most precise name of this figure?

- A parallelogram       C rectangle
- B rhombus               D square

2. Which of the following conditions or set of conditions must be met for a parallelogram to be a rectangle?

- F Diagonals are perpendicular.
- G Diagonals are congruent.
- H All sides are congruent.
- I The length of a diagonal is equal to the length of a side.

Warm-up Warm-up

## Warm Up:

- (a) Given the following diagrams, solve for x and y.
- (b) What property of parallelograms did you use to solve the problem?

Rectangle

notes - notes - notes - notes - notes - notes - notes - notes - notes - notes - notes - notes - notes - notes - notes - notes -

rhombus

a parallelogram with 4 congruent sides

trapezoid

a quadrilateral having one pair of parallel sides (called the bases) and one pair of non-parallel sides (called the legs)

an isosceles trapezoid is a trapezoid with two congruent legs

Summary:

## Left-Side Practice

1. Determine the most precise name for each quadrilateral AND write your reason why.

2. Use the figure below to answer the following questions.

(a) What is the most precise name for this quadrilateral? What property identifies it as this shape?

(b) Solve for  $x$ .

(c) Find the length of the shorter side.

3. Use the figure below to answer the following questions.

(a) What is the most precise name for this quadrilateral? What property identifies it as this shape?

(b) Find the value of  $x$  and the length of the diagonal.

4. Complete the following proof.

Given:  $\square ABCD$   
 Prove:  $\overline{AB} \cong \overline{CD}, \overline{BC} \cong \overline{AD}$

STATEMENTS		REASONS	
1	$\square ABCD$	1	Given
2	Draw segment from $A$ to $C$	2	Two points determine exactly one line.
3	$\overline{AB} \parallel \overline{CD}, \overline{AD} \parallel \overline{BC}$	3	
4	$\angle 1 \cong \angle 2, \angle 3 \cong \angle 4$	4	
5	$\overline{AC} \cong \overline{AC}$	5	
6	$\triangle ABC \cong \triangle CDA$	6	
7	$\overline{AB} \cong \overline{CD}, \overline{BC} \cong \overline{AD}$	7	

Classifying Quadrilaterals

State the most specific name for each figure.

-1-

State all possible name for each figure.

**Warm Up:**

1. (a) Given the quadrilateral below, what is the most specific name for it? What property justifies it as this shape?

(b) Solve for  $y$ . Then, find the length of the side.

## Quadrilaterals Project

For this project, you will be working in your groups. There are THREE parts to the project. All 3 parts must be completed to receive full credit.

### Part 1: Scavenger Hunt

You must take a picture on your phones of EACH of the following shapes ON-CAMPUS:

- \_\_\_ a triangle
- \_\_\_ a right triangle
- \_\_\_ a set of parallel lines
- \_\_\_ vertical angles
- \_\_\_ a rectangle
- \_\_\_ a square
- \_\_\_ a parallelogram
- \_\_\_ adjacent angles
- \_\_\_ supplementary angles

At least ONE group member must be in each picture, or it will not be counted.

### Part 2: Poster

For EACH of the following terms, you must

1. cut out an accurate picture of the shape
2. include all of the appropriate marks on the picture (e.g. hash marks, 90° angles, etc)
3. write all of its characteristics next to the shape

Terms:

- \_\_\_ parallelogram
- \_\_\_ rectangle
- \_\_\_ rhombus
- \_\_\_ square
- \_\_\_ trapezoid

### Part 3: Riddles

On your poster, you will make 3 riddles about 3 DIFFERENT shapes.

Ex: If you're hot, I'll help you cool down, but only in an emergency. Break this!  
What am I and what shape?

Answer: ???

### How will I be graded?

Since it's a group project, you will be graded on several different components:

1. How well you worked with others – Were you working the entire time? Were you off-task? Were you a dependable group member?
2. Does your group have pictures for each of the shapes in Part 1 AND is a group member in each picture?
3. Does your group have a poster with a cut-out and a description for each of the shapes in Part 2?
4. Does your group have 3 riddles completed for Part 3?

### Warm Up:

To prepare for the quiz, take a few minutes to review pages 70-79 in your IAN. Then, self-assess with the following questions:

1. Do you remember the properties of parallelograms?
2. Do you know how to solve algebra problems based on the properties of parallelograms?
3. Do you remember how to complete a proof?
