# **Introduction - Grade 5 Science**

The following released test questions are taken from the Grade 5 Science Standards Test. This test is one of the California Standards Tests administered as part of the Standardized Testing and Reporting (STAR) Program under policies set by the State Board of Education.

All questions on the California Standards Tests are evaluated by committees of content experts, including teachers and administrators, to ensure their appropriateness for measuring the California academic content standards in Grade 5 Science. In addition to content, all items are reviewed and approved to ensure their adherence to the principles of fairness and to ensure no bias exists with respect to characteristics such as gender, ethnicity, and language.

This document contains released test questions from the California Standards Test forms in 2004, 2005, 2006, 2007, and 2008. First on the pages that follow are lists of the Grades 4 and 5 standards assessed on the Grade 5 Science Test. Note that Grade 5 Earth Sciences Standard 3.e is not assessed on the Grade 5 Science Test and, therefore, is not represented in these released test questions. Next are released test questions. Following the questions is a table that gives the correct answer for each question, the content standard that each question is measuring, and the year each question appeared on the test. Reference sheets, provided for students taking the test, are also included as they are necessary in answering some of the questions.

The following table lists each reporting cluster, the number of items that appear on the exam, and the number of released test questions that appear in this document. Note that the questions testing the Investigation and Experimentation content standards are embedded within the correlating reporting cluster (i.e. Grade 5 Life Sciences).

<b>REPORTING CLUSTER</b>	NUMBER OF QUESTIONS ON EXAM	NUMBER OF RELEASED TEST QUESTIONS
Physical Sciences		
Grade 5 (Standards: 5PS1. a-i)	11	13
Grade 4 (Standards: 4PS1. a-g)	8	11
Life Sciences		
Grade 5 (Standards: 5LS2. a-g)	13	16
Grade 4 (Standards: 4LS2. a-c, 4LS3. a-d)	9	12
Earth Sciences		
Grade 5 (Standards: 5ES3. a-e, 5ES4. a-e, 5ES5. a-c)	11	14
Grade 4 (Standards: 4ES4. a-b, 4ES5. a-c)	8	9
TOTAL	60	75

In selecting test questions for release, three criteria are used: (1) the questions adequately cover a selection of the academic content standards assessed on the Grade 5 Science Test; (2) the questions demonstrate a range of difficulty; and (3) the questions present a variety of ways standards can be assessed. These released test questions do not reflect all of the ways the standards may be assessed. Released test questions will not appear on future tests.

For more information about the California Standards Tests, visit the California Department of Education's Web site at <u>http://www.cde.ca.gov/ta/tg/sr/resources.asp</u>.

Science

### THE PHYSICAL SCIENCES REPORTING CLUSTER

The following nine California content standards are included in the Grade 5 Physical Sciences reporting cluster and are represented in this booklet by 13 test questions. These questions represent only some ways in which these standards may be assessed on the California Grade 5 Science Standards Test.

#### **Physical Sciences** Grade 5 Standards 5PS1. Elements and their combinations account for all the varied types of matter in the world. As a basis for understanding this concept: 5PS1.a. Students know that during chemical reactions the atom in the reactants rearrange to form products with different properties. 5PS1.b. Students know all matter is made of atoms, which may combine to form molecules. 5PS1.c. Students know metals have properties in common, such as high electrical and thermal conductivity. Some metals, such as aluminum (AI), iron (Fe), nickel (Ni), copper (Cu), silver (Ag), and gold (Au), are pure elements; others, such as steel and brass, are composed of a combination of elemental metals. 5PS1.d. Students know that each element is made of one kind of atom and that the elements are organized in the periodic table by their chemical properties. 5PS1.e. Students know scientists have developed instruments that can create discrete images of atoms and molecules that show that the atoms and molecules often occur in wellordered arrays. 5PS1.f. Students know differences in chemical and physical properties of substances are used to separate mixtures and identify compounds. 5PS1.q. Students know properties of solid, liquid, and gaseous substances, such as sugar $(C_{e}H_{12}O_{e})$ , water $(H_{2}O)$ , helium (He), oxygen $(O_{2})$ , nitrogen $(N_{2})$ , and carbon dioxide $(CO_{2})$ . 5PS1.h. Students know living organisms and most materials are composed of just a few elements. 5PS1.i. Students know the common properties of salts, such as sodium chloride (NaCI).

#### CALIFORNIA CONTENT STANDARDS IN THIS REPORTING CLUSTER

### THE PHYSICAL SCIENCES REPORTING CLUSTER

The following seven California content standards are included in the Grade 4 Physical Sciences reporting cluster and are represented in this booklet by 9 test questions. These questions represent only some ways in which these standards may be assessed on the California Grade 5 Science Standards Test.

#### CALIFORNIA CONTENT STANDARDS IN THIS REPORTING CLUSTER

Physical S	Physical Sciences		
	Grade 4 Standards		
4PS1. Electricity and magnetism are related effects that have many useful everyday life. As a basis for understanding this concept:			
4PS1.a.	Students know how to design and build simple series and parallel circuits by using components such as wires, batteries, and bulbs.		
4PS1.b.	<i>Students know</i> how to build a simple compass and use it to detect magnetic effects, including Earth's magnetic field.		
4PS1.c.	Students know electric currents produce magnetic fields and know how to build a simple electromagnet.		
4PS1.d.	Students know the role of electromagnets in the construction of electric motors, electric generators, and simple devices, such as doorbells and earphones.		
4PS1.e.	Students know electrically charged objects attract or repel each other.		
4PS1.f.	Students know that magnets have two poles (north and south) and that like poles repel each other while unlike poles attract each other.		
4PS1.g.	Students know electrical energy can be converted to heat, light, and motion.		

Science

### THE LIFE SCIENCES REPORTING CLUSTER

The following seven California content standards are included in the Grade 5 Life Sciences reporting cluster and are represented in this booklet by 12 test questions. These questions represent only some ways in which these standards may be assessed on the California Grade 5 Science Standards Test.

### CALIFORNIA CONTENT STANDARDS IN THIS REPORTING CLUSTER

Life Sciences			
	Grade 5 Standards		
5LS2.	Plants and animals have structures for respiration, digestion, waste disposal, and transport of materials. As a basis for understanding this concept:		
5LS2.a.	<i>Students know</i> many multicellular organisms have specialized structures to support the transport of materials.		
5LS2.b.	<i>Students know</i> how blood circulates through the heart chambers, lungs, and body and how carbon dioxide $(CO_2)$ and oxygen $(O_2)$ are exchanged in the lungs and tissues.		
5LS2.c.	<i>Students know</i> the sequential steps of digestion and the roles of teeth and the mouth, esophagus, stomach, small intestine, large intestine, and colon in the function of the digestive system.		
5LS2.d.	Students know the role of the kidney in removing cellular waste from blood and converting it into urine, which is stored in the bladder.		
5LS2.e.	Students know how sugar, water, and minerals are transported in a vascular plant.		
5LS2.f.	Students know plants use carbon dioxide $(CO_2)$ and energy from sunlight to build molecules of sugar and release oxygen.		
5LS2.g.	Students know plant and animal cells break down sugar to obtain energy, a process resulting in carbon dioxide $(CO_2)$ and water (respiration).

### THE LIFE SCIENCES REPORTING CLUSTER

The following seven California content standards are included in the Grade 4 Life Sciences reporting cluster and are represented in this booklet by 11 test questions. These questions represent only some ways in which these standards may be assessed on the California Grade 5 Science Standards Test.

#### CALIFORNIA CONTENT STANDARDS IN THIS REPORTING CLUSTER

Life Scien	Life Sciences			
	Grade 4 Standards			
4LS2.	All organisms need energy and matter to live and grow. As a basis for understanding this concept:			
4LS2.a.	<i>Students know</i> plants are the primary source of matter and energy entering most food chains.			
4LS2.b.	<i>Students know</i> producers and consumers (herbivores, carnivores, omnivores, and decomposers) are related in food chains and food webs and may compete with each other for resources in an ecosystem.			
4LS2.c.	Students know decomposers, including many fungi, insects, and microorganisms, recycle matter from dead plants and animals.			
4LS3.	Living organisms depend on one another and on their environment for survival. As a basis for understanding this concept:			
4LS3.a.	Students know ecosystems can be characterized by their living and nonliving components.			
4LS3.b.	Students know that in any particular environment, some kinds of plants and animals survive well, some survive less well, and some cannot survive at all.			
4LS3.c.	Students know many plants depend on animals for pollination and seed dispersal, and animals depend on plants for food and shelter.			
4LS3.d.	<i>Students know</i> that most microorganisms do not cause disease and that many are beneficial.

### THE EARTH SCIENCES REPORTING CLUSTER

The following 13 California content standards are included in the Grade 5 Earth Sciences reporting cluster and are represented in this booklet by 14 test questions. These questions represent only some ways in which these standards may be assessed on the California Grade 5 Science Standards Test.

#### CALIFORNIA CONTENT STANDARDS IN THIS REPORTING CLUSTER

Earth Sciences				
	Grade 5 Standards			
5ES3.	Water on Earth moves between the oceans and land through the processes of evaporation and condensation. As a basis for understanding this concept:			
5ES3.a.	Students know most of Earth's water is present as salt water in the oceans, which cover most of Earth's surface.			
5ES3.b.	Students know when liquid water evaporates, it turns into water vapor in the air and can reappear as a liquid when cooled or as a solid if cooled below the freezing point of water			
5ES3.c.	Students know water vapor in the air moves from one place to another and can form fog or clouds, which are tiny droplets of water or ice, and can fall to Earth as rain, hail, sleet, or snow.			
5ES3.d.	Students know that the amount of fresh water located in rivers, lakes, underground sources, and glaciers is limited and that its availability can be extended by recycling and decreasing the use of water.			
5ES3.e.	Students know the origin of the water used by their local communities.			
5ES4.	Energy from the Sun heats Earth unevenly, causing air movements that result in changing weather patterns. As a basis for understanding this concept:			
5ES4.a.	Students know uneven heating of Earth causes air movements (convection currents).			
5ES4.b.	Students know the influence that the ocean has on the weather and the role that the water cycle plays in weather patterns.			
5ES4.c.	Students know the causes and effects of different types of severe weather.			
5ES4.d.	Students know how to use weather maps and data to predict local weather and know that weather forecasts depend on many variables.			
5ES4.e.	Students know that Earth's atmosphere exerts a pressure that decreases with distance above Earth's surface and that at any point it exerts this pressure equally in all directions.			
5ES5.	The solar system consists of planets and other bodies that orbit the Sun in predictable paths. As a basis for understanding this concept:			
5ES5.a.	Students know the Sun, an average star, is the central and largest body in the solar system and is composed primarily of hydrogen and helium.			
5ES5.b.	Students know the solar system includes the planet Earth, the Moon, the Sun, eight other planets and their satellites, and smaller objects, such as asteroids and comets.			
5ES5.c.	<i>Students know</i> the path of a planet around the Sun is due to the gravitational attraction between the Sun and the planet.			

# THE EARTH SCIENCES REPORTING CLUSTER

The following five California content standards are included in the Grade 4 Earth Sciences reporting cluster and are represented in this booklet by nine test questions. These questions represent only some ways in which these standards may be assessed on the California Grade 5 Science Standards Test.

### CALIFORNIA CONTENT STANDARDS IN THIS REPORTING CLUSTER

Earth Scie	Earth Sciences		
	Grade 4 Standards		
4ES4.	The properties of rocks and minerals reflect the processes that formed them. As a basis for understanding this concept:		
4ES4.a.	Students know how to differentiate among igneous, sedimentary, and metamorphic rocks by referring to their properties and methods of formation (the rock cycle).		
4ES4.b.	<i>Students know</i> how to identify common rock-forming minerals (including quartz, calcite, feldspar, mica, and hornblende) and ore minerals by using a table of diagnostic properties.		
4ES5.	Waves, wind, water, and ice shape and reshape Earth's land surface. As a basis for understanding this concept:		
4ES5.a.	<i>Students know</i> some changes in the earth are due to slow processes, such as erosion, and some changes are due to rapid processes, such as landslides, volcanic eruptions, and earthquakes.		
4ES5.b.	Students know natural processes, including freezing and thawing and the growth of roots, cause rocks to break down into smaller pieces.		
4ES5.c.	<i>Students know</i> moving water erodes landforms, reshaping the land by taking it away from some places and depositing it as pebbles, sand, silt, and mud in other places (weathering, transport, and deposition).

### INVESTIGATION AND EXPERIMENTATION

The following nine California content standards are distributed among the Grade 5 reporting clusters and are represented in this booklet by four test questions. These questions represent only some ways in which these standards may be assessed on the California Grade 5 Science Standards Test.

Investiga	Investigation and Experimentation		
	Grade 5 Standards		
5IE6.	Scientific progress is made by asking meaningful questions and conducting careful investigations. As a basis for understanding this concept and addressing the content in the other three strands, students should develop their own questions and perform investigations. Students will:		
5IE6.a.	Classify objects (e.g., rocks, plants, leaves) in accordance with appropriate criteria.		
5IE6.b.	Develop a testable question.		
5IE6.c.	Plan and conduct a simple investigation based on a student-developed question and write instructions others can follow to carry out the procedure.		
5IE6.d.	Identify the dependent and controlled variables in an investigation.		
5IE6.e.	Identify a single independent variable in a scientific investigation and explain how this variable can be used to collect information to answer a question about the results of the experiment.		
5IE6.f.	Select appropriate tools (e.g., thermometers, meter sticks, balances, and graduated cylinders) and make quantitative observations.		
5IE6.g.	Record data by using appropriate graphic representations (including charts, graphs, and labeled diagrams) and make inferences based on those data.		
5IE6.h.	Draw conclusions from scientific evidence and indicate whether further information is needed to support a specific conclusion.		
5IE6.i.	Write a report of an investigation that includes conducting tests, collecting data or examining evidence, and drawing conclusions.		

#### CALIFORNIA CONTENT STANDARDS IN THIS REPORTING CLUSTER

### INVESTIGATION AND EXPERIMENTATION

The following six California content standards are distributed among the Grade 4 reporting clusters and are represented in this booklet by three test questions. These questions represent only some ways in which these standards may be assessed on the California Grade 5 Science Standards Test.

#### CALIFORNIA CONTENT STANDARDS IN THIS REPORTING CLUSTER

Investiga	Investigation and Experimentation		
	Grade 4 Standards		
4IE6.	Scientific progress is made by asking meaningful questions and conducting careful investigations. As a basis for understanding this concept and addressing the content in the other three strands, students should develop their own questions and perform investigations. Students will:		
4IE6.a.	Differentiate observation from inference (interpretation) and know scientists' explanations come partly from what they observe and partly from how they interpret their observations.		
4IE6.b.	Measure and estimate the weight, length, or volume of objects.		
4IE6.c.	Formulate and justify predictions based on cause-and-effect relationships.		
4IE6.d.	Conduct multiple trials to test a prediction and draw conclusions about the relationships between predictions and results.		
4IE6.e.	Construct and interpret graphs from measurements.		
4IE6.f.	Follow a set of written instructions for a scientific investigation.		

1 Which action will result in a product with new chemical properties?

- A shredding a newspaper
- **B** breaking a mirror
- C cutting wood
- **D** popping popcorn

CSZ20059

3

# Which of the following represents a chemical reaction?

- A a sugar cube dissolving in water
- **B** ice cubes forming in a freezer
- **C** ice cream melting in a bowl
- **D** a cake baking in an oven

CSZ20560

# What do water, aluminum, redwood trees, and valley quail all have in common?

- A They are all pure elements.
- **B** They are all made of cells.
- **C** They are all living creatures.
- **D** They are all made of atoms.

CSZ10068

4 Sterling silver is a combination of silver and copper. Which of the following is also a combination of two or more metals?

- A aluminum
- B lead
- C gold
- **D** brass

CSZ10110

5

A metal spoon was left in a pot of boiling soup. The cook burned a finger by touching the spoon. Why did the finger get burned?

Science

- A The metal spoon chemically reacted with the cook's hand.
- **B** The metal spoon conducted electricity to the cook's hand.
- C The metal spoon conducted heat to the cook's hand.
- **D** The metal spoon insulated the cook's hand.

CSZ10266

Students are gathering materials and building an electrical circuit.

Which material will allow electricity to flow between the battery and the light bulb?

- A copper wire
- **B** wooden rod
- C cotton string
- **D** rubber tube

## Science

### **Released Test Questions**

7 A scientist uses an instrument to observe the pattern of molecules in a substance. The picture below shows what the scientist sees.

What state of matter is the scientist *most* likely observing?

- A gas
- **B** liquid
- C vapor
- **D** solid

8

CSZ20171

A scientist needs to take a picture of the well-ordered arrangements of the atoms and molecules within a substance. Which of the following instruments would be *best* for the scientist to use?

- A a laser light with holograph
- **B** a seismograph
- C an electron microscope
- **D** a stereoscope

CSZ10300

9 The diagram below shows a mixture.

Which of the following pieces of equipment should be used to separate this mixture?

- A magnet
- **B** balance
- C funnel
- **D** hot plate

CSZ10130

#### 10 Which of the following is a property of CO<sub>2</sub> gas?

- A It feels like a rock.
- **B** It smells like a lemon.
- C It is colorless.
- **D** It is hard.

CSZ10302

#### 11 All living things contain which element?

- A helium
- **B** sodium
- C copper
- **D** carbon

# **12** Plants and animals are composed of organic compounds. Which of the following are the common elements found in organic compounds?

- A iron, oxygen, nickel, copper
- **B** sodium, potassium, gold, hydrogen
- C helium, neon, argon, krypton
- D carbon, hydrogen, oxygen, nitrogen

CSZ10233

**13** When homemade ice cream is made, salt is added to the ice that surrounds the ice cream chamber.

# Which property of salt is important when making ice cream?

- A Salt conducts electricity in water.
- **B** Salt dissolves in water.
- C Salt lowers the freezing point of water.
- **D** Salt adds flavor to the ice cream mixture.

CSZ10027

#### Which best describes a parallel circuit?

Science

- A Electricity flows along one pathway.
- **B** The flow of electricity comes from one source.
- **C** Electricity flows along more than one pathway.
- **D** The flow of electricity comes from more than one source.

CSZ10383

#### This circuit is a series circuit because

- A it has two light bulbs.
- **B** the same current flows through both light bulbs.
- C it uses a single battery.
- **D** the current is divided between the light bulbs.

# Science

16

GRADE

#### Which of the following is shown above?

- A electromagnet
- **B** electric motor
- C electric generator
- **D** transformer

CSZ10350

17 Which of the following electromagnets would have the greatest magnetic field?

CSZ10387

#### – 14 –

Science

- 18
- A balloon has a negative charge. A glass rod has a positive charge.

# What will happen when the glass rod is brought near the balloon?

- A The balloon will be attracted to the rod.
- **B** The balloon will be repelled by the rod.
- **C** The balloon will remain in place.
- **D** The balloon will spin in circles.

CSZ10182

**19** Iron filings and bar magnets were placed on a sheet of paper. The following diagram shows the pattern made on the paper.

# At which location is the magnetic field the strongest?

- **A** 1
- **B** 2
- **C** 3
- **D** 4

### **Released Test Questions**

# Which characteristic of the plants would *most* likely affect the plants' growth in this location?

- A leaf shape
- **B** light requirement
- C plant price
- **D** flower color

Which animals are *most* likely to carry the seeds found in berries from the parent plant to another area?

A bees

43

- **B** birds
- C flies
- D caterpillars

CSZ10356

CSZ10001

44	Peach trees have sweet-smelling blossoms and		
	produce rich fruit. What is the main purpose of		
	the flowers of a peach tree?		

- A to attract bees for pollination
- **B** to create flower arrangements
- **C** to protect the tree from disease
- **D** to feed migratory birds

CSZ10336

#### 45 Many animals depend on plants for

- A shelter.
- **B** pollination.
- C seed dispersal.
- **D** sunlight.

CSZ10358

#### 46 Where is *most* of Earth's water located?

- A glaciers
- **B** lakes
- C oceans
- **D** rivers

CSZ10053

47 Which of the following processes is responsible for changing liquid water into water vapor?

- A photosynthesis
- **B** condensation
- C evaporation
- **D** precipitation

- **48** Above a continent, a warm air mass slowly passes over a cold air mass. As the warm air begins to cool, clouds form. What will *most* likely happen next?
  - A Rain will fall.
  - **B** Hurricanes will form.
  - C Lightning will strike.
  - **D** Hail will form.

CSZ10148

# 49 Why is watering plants and grass in the early morning a way to conserve water?

- A There is always more water in the morning.
- **B** Smaller amounts of water evaporate in the cool morning.
- **C** Water used in the morning can be recycled for afternoon use.
- **D** Grass can absorb water only in the morning.

CSZ10021

Which location on Earth receives the most direct sunlight?

A the deserts

50

- **B** the South Pole
- C the equator
- **D** the Western Hemisphere

CSZ20228

51

The picture below shows a place where air currents will form due to the uneven heating of Earth.

Science

# In which direction will air currents *most* likely move?

- A straight down over the land
- **B** from the land toward the sea
- **C** straight up above the sea
- **D** from the sea toward the land

CSZ20229

- 24 —

55

#### **Released Test Questions**

53 Which of the following factors would *most* likely cause a hurricane to decrease in strength?

- A staying over a warm body of water for a long time
- **B** increasing the number of large clouds
- C moving over a continent
- **D** moving toward tropical waters

CSZ10022

A city has a temperature of 75 °F, with partly cloudy skies. Weather forecasters are predicting that the air pressure and temperature will drop during the day. Which type of weather is *most* likely for this area in the late afternoon?

A rainy

54

- **B** sunny
- C snowing
- **D** hailing

CSZ10256

# Where in the diagram would the air pressure be the greatest?

Ocean

A at the beach

舟台

- **B** on top of the mountain
- **C** at the bottom of the clouds
- **D** above Earth's atmosphere

CSZ10108

GRADE

## Science

75 The chart below shows the results of an experiment designed to study how exercise affects heart rate.

Activity Stage	Heart Rate of Person A (beats per min.)	Heart Rate of Person B (beats per min.)	Heart Rate of Person C (beats per min.)
Before exercise	75	62	70
After exercise	120	110	130

# Which of the following statements is the *best* conclusion for this experiment?

- A Exercise triples a person's heart rate.
- **B** Exercise decreases a person's heart rate.
- **C** Heart rate is not affected by exercise.
- **D** Heart rate is increased by exercise.

		Mineral Identification Table	entificatic	on Table		<b>Mohs Hard</b>
Mineral	Hardness	Luster	Streak	Color	Other	Mineral
Calcite	3	nonmetallic	white	colorless, white	bubbles when	Talc
					acid is placed on it	Gypsum
Feldspar	6	nonmetallic	none	colorless, beige, pink		Calcite
Galena	2.5 – 3	metallic	gray	lead-gray	heavy for its size	Fluorite
Gold	2.5 – 3	metallic	golden yellow	yellow	used for jewelry	Apatite
Graphite	1 – 2	metallic	black	gray to black	feels greasy	Feldspar
Hematite	5   6.5	metallic or nonmetallic	reddish brown	silver-gray or red		Quartz
Hornblende	5 - 6	nonmetallic	none	dark green to black		Corundum
Magnetite	6	metallic	black	black	magnetic	Diamond
Mica	2 – 2.5	nonmetallic	none	dark brown, black or silver-white	flakes when peeled	
Pyrite	6 – 6.5	metallic	greenish black	brassy yellow	called "fool's gold"	
Quartz	7	nonmetallic	none	colorless, white, rose, smoky, purple, brown		
Talc		nonmetallic	white	white, greenish to gray	feels greasy
