

Writing Story Problems

Multiplication Story Problem

Ex: Melanie went to the grocery store and bought 5 bags of clementines. Each bag has 7 clementines in it. How many clementines did she buy in all?

$$5 \times 7 = \underline{\quad} \text{ clementines}$$

Your turn: (Name) went to the store and bought # _____ bags of _____. Each bag has # _____ in it. How many _____ did they buy in all?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Division Story Problem

Ex: Sabuur went to the sporting goods store and bought 32 tennis balls in all. If each box has 8 tennis balls in it, how many boxes did he buy?

$$32 \div 8 = \underline{\quad} \text{ boxes of tennis balls}$$

Your turn: (Name) went to the store and bought # _____ in all. If each box has # _____ in it, how many boxes did he buy in all?

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$
