

Marine Biology PowerPoint Presentation

Each member of your class will be assigned (or select) one of the ten marine biomes we have covered in class. You are responsible for creating a PowerPoint brochure advertising your biome as an optimal place for a family to spend their vacation. Your PowerPoint should include the following information:

1. Where in the world your biome is found
 - a. A highlighted map would be best
2. Average winter and summer temperatures for some key spots
3. Most abundant plant life (at least 3 species)
4. Most abundant animal life (at least 7 species)
5. 10 unique characteristics about your biome
6. 5 'things to do' that would interest tourists most
7. A catchy slogan
8. Disclaimer: Threats to your biome and ways to preserve it

Besides content, you will also be graded on design. The presentation should be eye-catching, witty and uncluttered. Copy-and-paste will not fly here. Your peers will vote on which presentations they find the most convincing. Feel free to include pictures, slide designs and music, but they should all be APPROPRIATE and DONE IN GOOD TASTE.
