Mr. Miller informed the Board on the basic facts of the special education programs: there is always more to learn, legality of programs consistently growing and changing, IEP balancing, programs are full with an average increase of 100 students per year, collaborating with other districts and researching innovative ways to help with growth. The first workgroup consisted of 19 parents, teachers, Board members, and administration which represented over 300 years of educational experience and the spring workgroup consisted of 32 people which represented over 450 years of experience. Areas of focus included keeping students together and not segregated from the general student population, consolidating programs to help students intertwine medical and academic needs, PLC collaboration between teachers is needed, and maintaining IEPs.
