Computer and Mathematical

Analyze, test, troubleshoot, and evaluate existing network systems, such as a local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network. Perform network maintenance to ensure networks operate correctly with minimal interruption.

- Keep computer systems running properly.
- Test systems to see if there are any problems that need to be fixed.
- Observe computer systems at work and reduce interruptions and errors before they occur.
- Note how much computer systems are being used.
- Check to see how much disk space is available.
- Develop guidelines for installing and testing new hardware.
- Make sure that networks provide fast access and speed.
