Math Inventory

- ▶ The Math Inventory is a computerized test that results in a score, or Quantile®, that indicates how well a student understands mathematical skills and concepts along a developmental continuum. A student who scores at the Proficient level by the end of the school year is considered to be performing on grade level and is on track to meet the demands of college and career by the end of high school.

Canvas

Due to the inclement weather that Paulding County has experienced in previous years, we will be providing some make-up learning time through a digital learning format during inclement weather.

Teachers will provide assignments via Canvas, our learning management system, for students to complete if inclement weather occurs. Teachers will also be available for virtual "office hours" through Canvas should students or parents have questions on the material or need assistance with their learning during this time.
