S.T.E..M. Pathways	Pathway Description
Biotechnology Research & Development	Uses living cells and materials produced by cells to create pharmaceutical, diagnostic, agricultural, environmental, and other products to benefit society.
Green Engineering, Science & Technology	Incorporates development and implementation of technologically and economically viable products, processes, and systems that promote human welfare while protecting human health and elevating the protection of the biosphere as a criterion in engineering solutions.
Interactive Media	The Interactive Media program allows students to work with the latest technological tools and innovative curriculum in hands-on learning projects that include web page production, managing databases, and writing programming code. Students will master ethical and privacy issues pertaining to multi-media.
