

Welcome to 3rd Grade

2018-2019

Clark Creek Elementary STEM Academy

Welcome

We are excited to have you join the 3rd grade family! Becoming a 3rd grader is a big deal. Students learn to be independent thinkers and take greater responsibility in their learning. As with every passing grade level, the work in 3rd grade becomes more challenging, which can initially intimidate an 8 year old. However, with focus and motivation your child can make major strides throughout the school year. We are a team and here to help!
