**Let's describe  
ways figures  
can move  
in the plane.**

# Today's Goal

- I can describe how a figure moves and turns to get from one position to another.

# Which One Doesn't Belong: Diagrams

## Warm Up 1.1

- Think Pair Share
- Compare and Connect

Which one doesn't belong?

A

B

C

D

# Can you explain the meaning of the following terms?

- ray
- degree
- acute angle
- right angle
- straight line

# Triangle Square Dance

Activity 1.2

Discussion Supports

Collect & Display

# Triangle Square Dance (10 min)

Your teacher will give you 3 pictures. Each shows a different set of dance moves.

- Arrange the 3 pictures so one of you can see them right way up.  
Choose who will start the game.
  - The starting player chooses A, B, or C and describes the dance to the other player.
  - The other player identifies which dance is being talked about.
- Switch roles! When you have described all 3 dances, come to an agreement on the words you use to describe the moves in each dance.
- With your partner, write a description of the moves in each dance.

A

B

C

Let's list words for different types of dance moves from this activity!

**What was most  
challenging about  
describing the dances?**

**Were you sometimes able to identify the dance before their partner finished describing *all* the moves?**

# “Are you ready for more?”

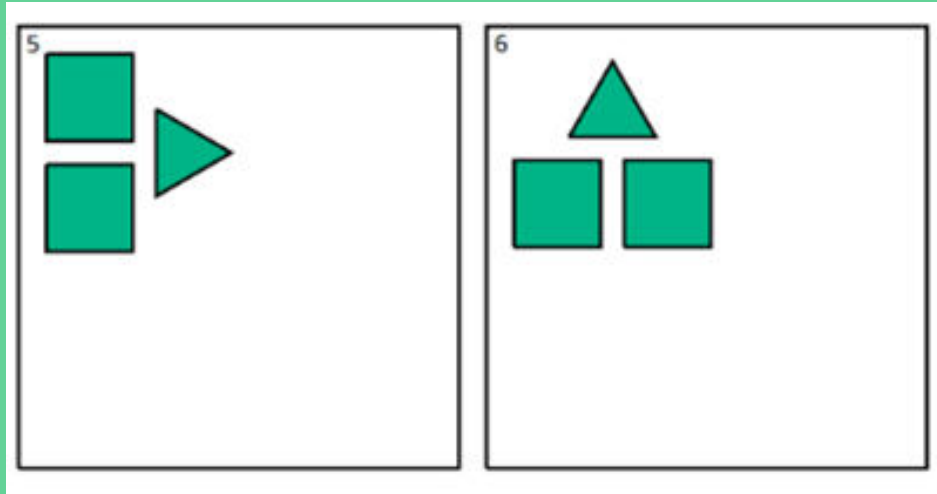

We could think of each dance as a new dance by running it in reverse, starting in the 6th frame and working backwards to the first.

1. Pick a dance and describe in words one of these reversed dances.
2. How do the directions for running your dance in the forward direction and the reverse direction compare?

**What language would you use to describe these movements?**

How might you  
*quantify* each  
move?

In the first half of this unit,  
we will examine these movements  
you have seen in the Triangle  
Dance and put formal language to  
describe the movements.

# Today's Goal

- ☐ I can describe how a figure moves and turns to get from one position to another.

# Frame to Frame
