

BIG PICTURE QUESTIONS FOR KNOWLEDGE

Based on my data, what do I want to know more about relating to my practice as a school counselor?

What evidence is there that demonstrates my knowledge has positively impacted student services and learning?

What activities can I participate in to develop knowledge in my areas of interest/challenge?

How will I acquire this knowledge? What is offered at universities, workshops, through professional organizations such as ASCA or other upcoming professional development activities?

If nothing is readily available, is there a book study, case study or other literature that might help me acquire the knowledge and skills?

What resources will I need to acquire this knowledge? (*Staff, books, technology*)
