HOSA

[Health Occupations Students of America](#)

HOSA is active at K-Tech! Students have adopted an initiative to help K-Tech. This initiative is called “Stop the Bleed”. It is HOSA’s intention to educate our K-Tech community about how to stop hemorrhagic bleeding and supply materials kits around campus. “Stop the Bleed continues to empower the general public to make a difference in a life-threatening emergency by teaching them the basic techniques of bleeding control.” ([BleedingControl.org](#))

[Stop the Bleed is being used in sports stadiums.](#)
