**the premier business education
association preparing students for
careers in business**

Did you know?

As technology continues to impact business and industry, today's employee, whether managerial or support staff, needs extensive knowledge of software applications and database management. Proficiency in keyboarding, spelling, punctuation, grammar, and oral communication is expected across all economic sectors.

Increasing office automation and organizational restructuring will continue to require that men and women alike be more productive and skilled in coming years.

Business Technology Education provides the knowledge and skills in demand today.
