	Chapter 26 Assisting with Oxygen Needs
THE PROPERTY OF THE PROPERTY O	
	Breathing is slow, shallow & occasionally irregular
һурохіа	
flow rate	
****	Respirations gradually increase in depth & rate and then become shallow & slow / apnea for 10-20 seconds
bradypnea	
orthopneic position	
apnea	
	very deep & rapid respirations / sometimes known as "air hunger"
tachypnea	
cyanosis	
	cells do not have enough oxygen
orthopnea	
CO2	
L/min	
Sp02	
02	
name 8 altered respiratory	
coughing g. doop broathing	
cougning & deep preatning	
	amount of oxygen in the blood is less than normal
	amount of hemoglobin in the blood carrying oxygen
Pulse ox sites	
pulse ox observations	
define "pursed lips"	

and the second of the second o

	Chapter 31 assisting with emergency care
cardiac arrest	
SCA	
AED	
Adult CPR 1 man ratio	
Adult CPR 2 men ratio	
infamt CPR 1 man ratio	
Infant CPR 2 men ratio	
***************************************	sudden loss of consciousness from an inadequate blood supply to the brain
what is a seizure?	
name 3 types of seizures	
	breathing stops but heart action continues for several minutes
shock	
anaphylaxis	
convulsions	
	excessive loss of blood in a short period of time
BLS	
EMS
