

Weekly Agenda

*6th Grade Earth Science
August 31st - September 4th*

Materials you will need this week:

1. Chromebook/Headphones
2. 5 Subject Notebook
3. Pencil

Standards addressed:

S6E1. Obtain, evaluate, and communicate information about current scientific views of the universe and how those views evolved.

- a. Ask questions to determine changes in models of Earth's position in the solar system, and origins of the universe as evidence that scientific theories change with the addition of new information.

Agenda Overview:

1. We will begin the study of the formation of our universe and solar system by first exploring early and current views of the solar.
2. We will be using the HMH textbook for this course and will explore features of this resource.
3. We will be introduced to early views of the universe/solar system and will be asked to model and explain why we no longer accept the earlier views of the universe/solar system. They will also be introduced to the current view of the universe/solar system. They should be able to model the current view of the universe/solar system and accurately depict the differences between the two models. They will learn about key persons who contributed to both views of the universe and solar system.
4. You will work on this on the following activities: Unit 1 Pre-Assessment and HMH Student Digital Lesson (Unit 1: Lesson 2)

You need to submit:

1. Formative Assessment (HMH Lesson 1.2 Quiz)
