

Costume Designer

The Costume Designer is responsible for designing the look of the costumes for your idea of West Side Story today. First the costume designer should look in magazines in order to gather ideas for their own designs. A good designer always cuts out pictures and creates a ‘morgue’ of ideas to draw from when designing. I will be looking for your costume morgue at the front of the design book you will create. The designer will need to design one costume for each of 10 characters from the play. Designs should be well made and creatively done. The colors should blend or match not only with each other, but with the overall color scheme you decided upon. Your grade will reflect how creative, thorough, and neat your designs are placed into a booklet of your own creation.
