## Introduction

This toolkit was developed by the Delaware Department of Education (DDOE) and other state agency partners to provide districts and charter schools with a list of resources designed to improve outcomes for all students. All resources are considered either evidence-based or promising practices.

**Evidence-based** - Strategies, activities, or approaches that have been shown through scientific research and evaluation to be effective at preventing and/or delaying a negative outcome.

**Promising practices** - Programs and strategies that have strong quantitative and qualitative data showing positive outcomes but do not yet have enough research or replication to support generalizable outcomes.

The document's structure is focused on the domains of **Leadership**, **Talent Development**, **Instructional Transformation**, and **Culture Shift**. Some **Key Questions** have been posed. **Data Considerations** will help answer those questions. **Resources** can assist with addressing the needs identified by data.

It is important to note that the resources included in this document do not represent an exhaustive list. DDOE will continue to build on this toolkit as more information is gathered under the four domains.

*This toolkit was originally created by DDOE to offer districts and charter schools support in developing Opportunity Fund plans. Opportunity Funding is three-year weighted funding program for districts and charter schools across the state to enhance services that support the success of students identified as English learners (EL) and/or low income. While the toolkit focused on supporting students identified as English learners (EL) and/or low income, use or implementation of many of the resources will improve student outcomes for all students.*

## Abbreviations

ASCA – American School Counselor Association

DSCA – Delaware School Counselor Association

NASP – National Association of School Psychologists

NASW – National Association of Social Workers

OELA - Office of English Language Acquisition

SSWAA – School Social Work Association of America

## Supporting Academics

Targeted academic supports and intentional strategies for students identified as English learners and/or low income have been proven to significantly close the achievement gap and lead to improved outcomes. The questions below are intended to promote a deeper examination of your current system to identify areas for growth. Each question also connects to possible resources that can be used in the identified area. These resources are not exhaustive.

## Supporting the Whole Learner

Research shows that a whole learner approach to education leads to higher academic achievement and overall improvement of student outcomes. The questions below have been developed in collaboration with the Delaware Department of Health and Social Services (DHSS) and the Delaware Division of Public Health (DPH) to promote a deeper examination of your current system to identify areas for growth. Each question also connects to possible resources that can be used in the identified area. These resources are not exhaustive.
