

Distributive Property

Standards

- **MCC7.EE.1 Apply properties of operations as strategies to add, subtract, factor, and expand linear expressions with rational coefficients.**
- **MCC7.NS.2 Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers.**
- **MCC7.NS.1 Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram.**

Distributive Property

A creative story approach

The Party!!!

- You are going to your friend's house for a costume party
- You are dressed up as an apple, so your nickname will be *a*.
- Your friend is a banana, so we'll call your friend, *b*.
- Your friend's house has walls, and the walls will be the parenthesis: ().

- When you get to the house, you are very polite, so you knock and wait for someone to answer the door.

$$a (\quad)$$

- Your friend, the banana, comes to the door, but your friend is not alone!
- Someone dressed up like a cherry is there also! We'll call this person, c .
- This is what it looks like:

$$a(b + c)$$

- Of course, your friend answers the door and you are so excited, you have to say “hi” to your friend, and this is what it looks like:

- And once you say hi, the walls of the house go away (only when you are working with variables though). It looks like this:

$$ab + ac$$

- But what if there are more people in the house?
- Don't be rude! Give them a hug or high five as well!

$ab + ac + ad + ae + af$

And the walls fall down!

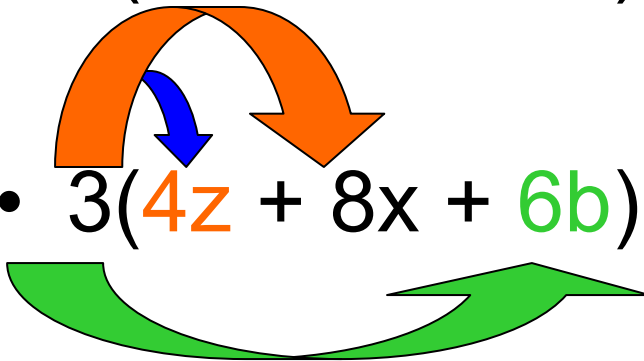

Ok—so let's see this
algebraically 😊

- Use the distributive property and combine the like terms

The 3 has to say hi to every term

- $3(4z + 8x + 6b)$

- $3(4z + 8x + 6b)$

$$3(4z) = 3 \times 4 = 12z$$

$$3(8x) = 3 \times 8 = 24x$$

$$3(6) = 18b$$

$$12z + 24x + 18b$$

$$5(x + 2y)$$

$$5(r - 2) + 2k$$

Distribute & Combine 😊

$$5(r - 2) + 2r$$

$$1 - 3(5x + 2)$$

$$2 - 5(-x - 5)$$

$$x + 5x + 8(x + 2)$$

$$4(x + 2) + 3(x + 5)$$

$$2(r + 3) + 3(r + 7) - 10$$

$$3[9(x + 4) + 2(x + 1)]$$

HW: Practice worksheet

Homework Review

Area and Algebra 😊

Basic problem no letters

Ex.1

Find the perimeter

Find the area

What if $x = 4$

7

$2x$

$5x + 2$

4

Ex.2

Find the perimeter

Find the area

$$5 - 3m$$

What if $m = \frac{3}{4}$

8

10

$$-3m$$

Homework: Area and Algebra

Homework Review

Warm up- put hw in red tray

1. Find the perimeter
2. Find the area
3. What if $x = \frac{1}{2}$?

Hw- review

1. Find an expression for the perimeter of the rectangle. Write your expression in simplified form.
2. What is the perimeter of the rectangle if $a = \frac{3}{4}$ inch?
3. Find an expression for the area of the rectangle. Write your expression in simplified form.
4. What is the area of the rectangle if $a = 1.8$ feet?

Class work: Design your own...

- Create an “area and algebra” type problem
- Must be L shaped- six sides
- Must have at least one variable
- 4 values must be given with 2 missing
- Must have 4 problems (**Q** & **A**):
 - Find perimeter Find Area
 - Substitute a fraction Substitute a decimal
