UNDERSTANDING YOUR CHILD'S HENRY REPORT CARD

SY 2022-2023

5th Grade | Third Nine Weeks

LEARNING GUIDES

What will my child learn?

English Language Arts	Mathematics	Science	Social Studies
All students should know and/or be able to:	All students should know and/or be able to:	All students should know and/or be able to:	All students should know and/or be able to:
Describe how the narrator or speaker point of view influences description of events. Compare and contrast stories in the same genre with similar themes and topics. Analyze multiple accounts of the same topic from different points of view. Explain how the author supports points in a text. Know and apply 5th grade phonics and word analysis skills to decode words, read with accuracy, and read fluently. Write opinion pieces on topics or texts, supporting a point of view with reasons. Recognize and correct inappropriate shifts in verb tense and aspect. Use a comma to separate an introductory element from the rest of the sentence. Communicate and work with peers and adults during daily learning	Solve word problems involving division of a fraction by a whole number or a whole number by a fraction Solve word problems using fractions and mixed numbers Convert measurements within the same system. For example, know that 1 quart is the same as 2 pints. Measure the volume of solid figures and solve word problems involving the measurements of volume	Identify surface features on Earth as being caused by processes that destroy landforms and/or processes that build up landforms. Develop simple interactive models to collect data that shows how changes in surface features on Earth are/were caused by processes that destroy landforms and/or processes that build up a landforms. Ask questions about how technology is used to limit and/or predict the impact of processes that destroy landforms and/or processes that build up landforms. Plan and carry out experiments of physical changes by separating and mixing dry and liquid materials. Explain how the physical changes in the state of water are due to temperature changes, which cause small particles that cannot be seen to move differently. Experiment to determine if a chemical change happened based on color, gas, temperature change, odor, or new substance produced.	Describe important developments in America from 1975 to 2001, including the collapse of the Soviet Union and the events of September 11, 2001. Explain the impact of personal computers and the Internet on American Life. Locate important man-made places in the United States (Chisholm Trail; Pittsburgh, PA; Kitty Hawk, NC; Pearl Harbor, HI; Montgomery, AL). Explain the reasons for the spatial patterns of economic activities. Explain how citizen's rights are protected under the U.S. Constitution & how amendments are made. Explain how voting rights are protected by the 15 th , 19 th , 23 rd , 24 th , and 26 th amendments to the U. S. Constitution and have maintained a representative democracy/republic.
