Family
## Exploration Academy +

Do you have a story to tell? Do you want to learn more about how your students harness the power of computer science to tell their stories? The Google CS First Storytelling club is your chance to bring your stories to life on the computer and share them with others. Develop characters and dialogue, build intriguing plots, and use computer-generated effects to add excitement, mystery, and interactivity to your stories. In this club, you'll combine classic elements of storytelling, like characterization, premise, dialogue, and setting, with computer programming. Your audience won't just read these stories – they'll experience them.

Here's how to join:

1. All club members must visit https://csfirst.withgoogle.com/user/login, click "Enter Club Code" and follow the directions to be assigned to your theme and club. New club members will receive a username and password. Returning club members may reuse their username and password. Each theme and club have a different club code.
2. Once you join, the club leader will contact you to get started. You can participate at home with your family at any time you choose OR you can come to our CS First Meet ups to work with your club leader and ask questions.

CLUB CODE: DKH7H9

If you have questions about your account or the club, please contact Kristin Sweeney at 407-320-5428 or kristin_sweeney@scps.k12.fl.us
