

7th Grade

First 9 Weeks Newsletter

August 2 - October 4

Language Arts

Our seventh grade Louisville Middle School eagles have been soaring in regards to reading! Students are covering various texts focusing on narrative historical. This unit includes many articles, video clips, writing activities, short stories, and peer editing exercises along with the texts, [Across Five Aprils](#) by and [Esperanza Rising](#) by Pam Munoz Ryan . The goal is not only for students to be able to understand what they read, but to also practice active reading in which they are constantly questioning texts and connecting reading material to other pieces of literature. Seventh grade English Language Arts teachers are on a mission to prepare students to communicate and collaborate using critical thinking skills when writing, reading and discussing informational text and real world issues.

Math

In 7th grade, students begin learning about integer operations. They apply their knowledge of fractions, decimals, and whole numbers. They will continue to use and develop their integer knowledge through the remainder of 7th grade. After completing Unit 1 on integers, students will begin applying their knowledge of integers to solve one-step, two-step, and multi-step equations and inequalities. They will continue to apply their mathematical knowledge in real world scenarios.

Ms. Nevetral

7th Grade has started the year off with a BANG!

The seventh grade school year has started off well as students are being introduced to rigorous academic material across all four subjects. Teachers meet continuously to assure all students are being serviced and challenged appropriately. Seventh grade is excited for our upcoming STEAM Project, which will provide students with the opportunity to have their own Farmer's Market!

Science

Ask your student, if plant and animal cells were in a survival contest, who do you think would win? One of the most of important needs that must be met to survive is the need for food. Since plants can make their own food, they have a huge advantage over animals. All animals must hunt their own food, whether that food is a plant or another animal. Its this discussion that 7th graders will enter into next.

KNOWLEDGE CHECK:

See how many organelles your student can name!

Social Studies

In social studies, we are studying Southwest Asia. This includes all the countries of the Middle East. We will learn about the geography and culture of these countries as well as their governments, economy and some of their history. Additionally, we have are completing an interactive project on the five themes of geography, using chromebooks. We will be using chromebooks almost daily for assignments and assessments this year. Please call me at the school or on my cell if you have any questions or concerns.
